WORK EXPERIENCE

Weyerhaeuser

Sep 2023 – Sep 2024

Power Platform Developer

Remote

- Led the development of an AI-powered invoice processing system handling \$20M/month, enhancing AP accuracy and improving invoice lifecycle tracking through Power Platform and AI Builder.
- Developed dynamic dashboards in Power BI linked to Dataverse for real-time metrics and trends, aiding executive decision-making.
- Created custom connectors in Power Automate for seamless integration with external APIs, streamlining real-time data processing.
- Extracted and analyzed data from Snowflake using SQL queries.
- Collaborated with subject matter experts to streamline invoice management processes, boosting financial data integrity and speeding up payment cycles.

Curtiss-Wright

Sep 2022 – Sep 2023

Supply Chain Data Analyst

Pittsburgh, PA

- Developed Excel and Power BI forecasting tools for long-term strategic budgeting.
- Created data visualizations to identify staffing needs, resulting in a 75% decrease in backlogged work within 3 months.
- Conducted financial data reconciliation and transformation to guarantee precise reporting and payment monitoring.

Philips

Dec 2021 – Jul 2022

Data Analyst

Pittsburgh, PA

- Reduced project turnaround time by 50% through data pattern analysis, providing valuable insights to the director.
- Collaborated with cross-functional teams to implement data-driven strategies, demonstrating strong teamwork skills.
- Enhanced data visualization and insights by developing QlikView dashboards for improved data readability.

LANXESS

May 2021 – Mar 2022

Data Analyst

Pittsburgh, PA

- Extracted logistics and supply chain data from SAP ERP (utilizing T-Codes such as SE16N, ME2N, VL06O) for weekly operations reports.
- Automated SAP data extraction to Excel with VBA and scheduled SQL scripts, cutting manual work by 30%.
- Developed standardized Excel templates for monthly freight cost and inventory movement reporting using SAP data exports.

EDUCATION

The Pennsylvania State University

Bachelor of Science in Project and Supply Chain Management

Major GPA: 3.72

CERTIFICATIONS

Google Data Analytics

January 2023

- Data cleaning, analysis, and visualization techniques crucial for model validation and predictive analytics.

SKILLS

- Power Platform: Built apps, flows, dashboards, and custom connectors across Power Apps, Automate, BI, and Dataverse.
- AI Builder: Trained and deployed AI models to extract invoice data and automate document processing.
- SQL: Queried and joined large datasets from Snowflake and MS SQL Server for analytics and reporting.
