

EDUCATION

University of Virginia

B.A. Biology, Statistics *with a concentration in Biology*

Charlottesville, VA

May 2021

PROFESSIONAL EXPERIENCE

KSA Integration

Quantico, VA

Junior Research Scientist III

October 2024 -Present

- Served as a project manager and scientific liaison supporting Department of Defense's Joint Intermediate Force Capabilities Office human effects research and technology development programs.
- Provided analytical support for program budgets, forecasts, and milestone reports, maintaining alignment with mission objectives and ensuring on-time and on-budget performance.
- Developed and reviewed technical reports, regulatory documentation, and scientific summaries supporting evidence-based decision making.

NeoImmuneTech

Rockville, MD

Research Associate

June 2022 – September 2024

- Managed over 20 preclinical collaborations, overseeing immuno-oncology research-related project management, communications and activities.
 - Collaborated with the NIAID RNCP program for product development of Medical Countermeasures for Acute Radiation Syndrome.
 - Authored and reviewed experimental proposals, study plans, feasibility reports, data report summaries, abstracts and manuscript publications. Supported regulatory documentation including Orphan Drug Designation, grant RO1 submissions, and preclinical IND-enabling reports.
 - Coordinated the execution of contracts and reagent shipments, following proper legal and CMC SOPs.
- Conducted extensive research on emerging cytokine and T cell therapies and competing companies, effectively relaying information to internal and external stakeholders.
- Collaborated with Bioinformatics teams on omics-based datasets and predictive modeling to identify correlations of therapeutic response using R, Python, FlowJo, FlowSom, and Excel.

Martha Jefferson Hospital

Charlottesville, VA

Emergency Department Technician

August 2020 – June 2022

- Optimized patient health outcomes while adhering to all applicable health, safety, and hospital regulations.
- Performed patient procedures and treatments under the supervision of physicians and nurses including EKGs, splints, and vital signs.
- Documented and communicated data to designated medical command authority.

Lum Immuno-Oncology Laboratory at University of Virginia Hospital

Charlottesville, VA

Undergraduate Research Assistant

June 2018 – May 2021

- Designed and executed wet-lab experiments examining the efficacy of Ofatumumab x OKT3 bispecific antibody against lymphatic leukemia cells using methods including flow cytometry, ELISA, PCR, and staining.
- Prepared and filtered media, buffers, and reagents for T-cell culture and immunological assays.
- Operated and maintained analytical and wet-lab equipment, including centrifuges, biosafety cabinets, and flow cytometers.

CERTIFICATIONS & SKILLS

GCP for Clinical Trials with Investigational Drugs and Biologics

Python, R, FlowJo, FlowSom, SAS, SQL, SQLite, Microsoft Office

Regression Analysis, Data Visualization, data mining, database management

NREMT, EMT-B, BLS, and First Aid Certified

Classical Guitar
