PROFESSIONAL OVERVIEW

Data Analyst with 2+ years of experience in research and data analysis. 7 years of total professional experience. Expertise in deriving actionable insights and business intelligence through statistical analysis, data visualization. Experience working with global teams across multiple industries. No visa sponsorship needed.

SKILLS

Data Analysis: SQL, Python (NumPy, pandas), Excel, Statistical analysis, Product usage analysis

Data Visualization: Tableau, PowerPoint

Research: Primary research, Market intelligence, Consumer behavior analysis

WORK EXPERIENCE

Azira | Bangalore, India

March 2022 – May 2023

Data Analyst

Led data analysis initiatives to extract valuable consumer behavior insights from human location and movement data for leading brands across retail, travel, and F&B sectors. Translated complex datasets to portray consumer journeys and came up with strategic recommendations for clients.

Key Achievements:

- Worked with global brands to create insights on their customer movement patterns. Utilized SQL queries to extract customer movement data and used Python (pandas) and spreadsheets to clean and analyze data to derive insights on customer behavior patterns
- Delivered data visualization dashboards in Tableau to clients that communicated key consumer journey insights, resulting in improved client engagement
- Collaborated with cross-functional teams in a global team setting to develop and present comprehensive consumer insight reports

StartUs Insights | Vienna, Austria

September 2020 – August 2021

Data Analyst

Led in-depth research on emerging technologies and identified innovative startups disrupting various sectors. Analyzed startup and technology data sets to come up with insights for the global businesses looking for an acquisition opportunity or collaboration with specific startups.

Key Achievements:

- Led research initiatives in micromobility, last-mile delivery, sustainable packaging, and healthcare domains delivering actionable insights based on client requirements
- Analyzed startup ecosystem data and market trends to evaluate technological innovations and investment potential

- Cultivated relationships with 50+ startup founders in different technological sectors through targeted outreach, gathering insights on technical roadmaps and go-to-market strategies to inform investment recommendations.
- Created comprehensive research reports and thought leadership content to guide client decision-making
