## EDUCATION

### Master of Science in Computer Science

Arizona State University, Tempe, AZ

05/2024

3.60 CGPA

### Bachelor of Engineering in Computer Engineering

Kadi Sarva Vishwavidyalaya, Gandhinagar, GJ

06/2022

8.57 CGPA

## Relevant Courses

Machine Learning, Data Processing at Scale, Fundamentals of Statistical Learning, Data Mining, Data Visualization, Big Data, Data Structures, Neural Networks and Deep Learning, Knowledge Representation, Database Management, Software Testing

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, C, C++, HTML, VBA

**Frameworks & Tools:** Power BI Dashboard, SSMS, SSRS, Jupyter Notebook, SAS, HubSpot CRM, ASANA, Excel, MS Fabric

**Project Management:** Agile, Documentation, Data Management, Communication, A/B Testing, Data Quality, Business Insights

**Machine Learning:** Pandas, Scikit-Learn, NumPy, TensorFlow, Random Forest, DBScan, Data Warehousing, Data Mining, ETL

**Data Analytics:** Data Modeling, Data Visualization, EDA, Statistical Analysis, Trend Forecasting, Pattern Recognition, KPIs, DAX

## PROFESSIONAL EXPERIENCE

### Cintana Education, Tempe, AZ: Data Analyst Intern

07/2024 – Present

- Developed and maintained data models using Excel, enhancing data accuracy and reducing reporting time by 20%.
- Collected and analyzed KPI data using Power Query and Power BI to create detailed dashboards and reports, providing actionable insights that improved operational efficiency and informed strategic decision-making.
- Managed and organized project files on SharePoint, ensuring data integrity and accessibility and utilizing ASANA for comprehensive project management. Built HubSpot CRM dashboards and reports for actionable insights while automating workflows with Power Automate to enhance efficiency and improve operational processes.

### Arizona State University, Tempe, AZ: Math Grader | Instruction Aide

08/2023 – 05/2024

- Collaborated with mathematics faculty by preparing materials, grading, and leading discussions for over 200 students across multiple sections of calculus, algebra, and statistics courses each semester.

### Yoshops.com, Remote: Data Science Intern

03/2022 – 05/2022

- Developed a Python script with Selenium to automate the extraction of over 300 product listings, improving market analysis efficiency and revealing business insights into consumer trends and pricing strategies.
- Utilized SQL queries and machine-learning techniques to transform over 5000 rows of complex raw data into comprehensive insights, improving decision-making by enabling strategic recommendations and data manipulation.
- Evaluated five years of company order history into Power BI dashboards, enabling strategic decisions that improved business performance and operational efficiency through clear data presentation and analysis.

### Feynn Labs, Remote: Machine Learning & Data Analytics Intern

12/2021 – 02/2022

- Optimized data quality and operational processes by cleaning and preprocessing large datasets with SQL, Excel, and Python, resulting in a 5% increase in data reliability for predictive modeling applications.
- Collaborated on a real estate market segmentation project, analyzing trends, leading strategic meetings, and implementing classification algorithms, which enhanced segmentation algorithm accuracy by 12%.
- Synthesized market research findings of alternative products and delivered analyses and presentations that provided critical insights to refine project direction and guide ongoing development strategies.

### The Sparks Foundation, Remote: Data Science Intern

10/2021 – 11/2021

- Achieved 87% accuracy in predictive modeling by applying supervised ML techniques to a large-scale data project.
- Applied k-means clustering unsupervised learning techniques to analyze over 10,000 data records, uncovering key customer segments and highlighting trends, correlations, and anomalies to inform marketing and improve decisions.

## RELEVANT PROJECTS

### Time Series Analysis using CGM data (Data Analysis, Data Mining, Data Visualization, Python)

01/2023 – 05/2023

- Analyzed over 50,000 data points using advanced machine learning models (K-Means, DBScan) to detect and categorize patterns in glucose levels, significantly enhancing patient treatment plans.
- Implemented advanced feature engineering to extract critical health insights and developed tailored data visualizations, enhancing patient outcomes by driving informed decision-making and optimizing treatment strategies.
