PROFESSIONAL SUMMARY

Data Analyst with 6 years of experience delivering SQL, Python, ETL, data visualization, and statistical analytics solutions across financial services, healthcare, marketing analytics, and supply chain environments. Proven record building data pipelines, dimensional models, executive dashboards, KPI frameworks, predictive models, and data quality controls that improve reporting speed, accuracy, risk visibility, and stakeholder decision-making. Strong background in Tableau, Power BI, Snowflake, PostgreSQL, BigQuery, AWS, Azure Data Factory, A/B testing, forecasting, regression analysis, and Agile cross-functional delivery.

CORE TECHNICAL SKILLS

Analytics & BI: Data Analysis, KPI Reporting, Executive Dashboards, Data Storytelling, Ad Hoc Analysis, Root Cause Analysis, Forecasting, A/B Testing, Marketing Mix Modeling, Campaign Performance Analysis

Programming & Databases: SQL, Python, R, Scala, SAS, PostgreSQL, SQL Server, MySQL, NoSQL, MongoDB, Cassandra

Visualization & Reporting: Tableau, Power BI, Qlik Sense, DAX, Power Query, Advanced Excel, VBA, Pivot Tables, VLOOKUP, SSRS

ETL, Warehousing & Cloud: ETL/ELT, Data Warehousing, Dimensional Modeling, Snowflake, Amazon Redshift, Google BigQuery, AWS S3, AWS Glue, AWS Lambda, Azure Data Factory, Databricks, Apache Airflow, Talend, Informatica, SSIS

Statistics & Machine Learning: Regression, ANOVA, Correlation, Classification, Clustering, Predictive Modeling, Scikit-learn, TensorFlow, Pandas, NumPy, SciPy, Matplotlib, Seaborn

Governance & Delivery: Data Quality, Data Validation, Data Governance, HIPAA, GDPR, Requirements Gathering, Agile, SDLC, Waterfall, Git/GitHub

PROFESSIONAL EXPERIENCE

Data Analyst | Finz Fintech | New York, NY | Sep 2025 - Present

- Led capital portfolio integration by consolidating treasury, portfolio, and liquidity datasets, improving reconciliation accuracy, strengthening risk controls, and accelerating executive reporting for capital planning.
- Built Python ETL pipelines processing 2,500+ daily transactions, improving validation rules, exception handling, and audit readiness while reducing processing time by 15%.
- Normalized PostgreSQL tables across 10+ treasury datasets, increasing query performance by 30% and enabling scalable liquidity analysis, stress testing, and regulatory-ready financial reporting.
- Developed Tableau dashboards for 18+ liquidity, cash flow, and risk KPIs, improving leadership visibility and reducing weekly ad hoc reporting cycles by 30%.
- Implemented Azure Data Factory integrations for secure cloud-to-on-prem data movement, improving pipeline reliability and supporting scenario modeling, stress testing, and compliance reporting.
- Analyzed A/B test and simulation results for liquidity and product strategy, identifying reporting gaps and accelerating data-backed decision-making for treasury stakeholders.

Data Analyst | Ipsos MMA | New York, NY | Mar 2025 - Aug 2025

- Supported marketing mix modeling initiatives for Fortune 500 clients, preparing analytics-ready datasets that informed \$100M+ in media investment decisions and channel allocation strategies.
- Implemented data validation protocols across 20+ marketing and media datasets, reducing preparation and validation time by 20% and improving model input accuracy.
- Designed SQL and Snowflake data models and ETL pipelines that enabled self-service analytics and reduced manual reporting effort by 40%.
- Conducted deep-dive analyses to detect anomalies, data quality gaps, and performance drivers across marketing channels, improving issue resolution and insight reliability.
- Built campaign performance, attribution, incrementality, and experimentation reporting to support budget optimization and executive-level marketing measurement decisions.

Data Analyst | Axtria | New Jersey, USA | Nov 2021 - Feb 2025

- Built an end-to-end healthcare analytics framework combining clinical data ingestion, cloud-scale ETL, and predictive risk scoring to support patient stratification and operational decision-making.
- Created ingestion pipelines using AWS Glue, SQL, and AWS S3 to synchronize multi-source clinical event streams, improve pipeline stability, and enable near real-time analytics for enterprise research teams.
- Standardized data cleansing and transformation with Python and Pandas across four EHR platforms, reducing data anomalies by 22% and strengthening longitudinal RWE and outcomes studies.
- Developed Scikit-learn predictive models using logistic regression and random forest to forecast patient outcomes, improving model accuracy by 12% and supporting evidence-based care pathway recommendations.

- Delivered Power BI dashboards with DAX-driven KPIs for patient journeys, utilization trends, and clinical outcomes, improving performance monitoring and strategic planning for healthcare stakeholders.
- Optimized BigQuery architecture for large-scale RWE aggregation and cohort analytics, reducing query latency by 24% and accelerating segmentation workflows for compliance-driven reporting.
- Managed HIPAA-compliant pipelines loading 2TB+ curated clinical data into Amazon Redshift, strengthening data governance, privacy controls, and secure enterprise analytics scalability.
- Performed statistical validation using ANOVA, correlation, and regression to quantify treatment-response variability, validate real-world outcomes, and support clinical trial optimization.
- Partnered with clinicians, engineers, and AI teams in Agile delivery to define requirements, enforce governance standards, mentor junior analysts, and deliver standardized executive reports that reduced reporting cycles by 11%.

Junior Data Analyst | Hudl | India | Sep 2017 - Nov 2018

- Analyzed athlete performance, match events, wearable telemetry, and fan engagement datasets to provide actionable insights for coaching, roster optimization, and operational planning.
- Built SQL pipelines processing 1,500+ daily match and telemetry records to identify trends, seasonality, workload patterns, and performance drivers.
- Consolidated a Snowflake analytics warehouse containing 30,000+ athlete, team, and fan attributes, enabling KPI tracking, fast reporting, and predictive insights for scouting and training decisions.
- Refined Talend ETL workflows processing 40,000+ daily wearable and tracking events, improving data quality and reducing processing errors by 4%.
- Applied SAS predictive models to 60,000+ historical performance records to forecast injury risk, detect fatigue anomalies, and recommend proactive performance interventions.
- Created Qlik Sense dashboards covering readiness, tactical efficiency, and fan engagement KPIs, accelerating strategic decision-making and proactive performance monitoring.

CERTIFICATIONS

- Microsoft Power BI Data Analyst
- Tableau Desktop Specialist
- MySQL for Data Analytics and Business Intelligence

EDUCATION

Master of Science in Information Systems, Specialization: Business Intelligence and Analytics | Stevens Institute of Technology, Hoboken, NJ | Aug 2019 - May 2021

Bachelor of Engineering in Information Technology | Don Bosco Institute of Technology, Mumbai, India | Jul 2013 - May 2017
