PROFESSIONAL SUMMARY

Data Center Facility Engineer with 3 years of hands-on experience in electrical, mechanical, and HVAC systems across India and USA-based data centers. Skilled in mission-critical infrastructure operations, preventive maintenance, troubleshooting, rack installation/decommissioning, and BMS/EPMS monitoring. Strong knowledge in root cause analysis, incident management, and vendor/contractor coordination ensuring 24/7 availability and compliance with safety standards.

SKILLS

- **Facility Operations & Maintenance:** Data Center Operations, Preventive Maintenance (PM), Incident Management, Root Cause Analysis
- **Electrical Systems:** UPS, PDUs, Switchgear, Generators, Batteries
- **Mechanical Systems:** CRAHU, Chillers, Cooling Towers, Pumps, Motors
- **HVAC & Fire Safety:** HVAC Units, Fire/Life Safety Systems, Suppression Systems
- **Rack Management:** Rack Installation, Decommissioning, Structured Cabling
- **Monitoring & Tools:** BMS, EPMS, Microsoft Office Suite (Word, Excel, PowerPoint)

PROFESSIONAL EXPERIENCE

Data Center Facility Technician

Nextinvo Data Center – Washington, USA

June 2023 – Present

- Performed routine facility rounds to monitor and ensure optimal performance of electrical, mechanical, and fire/life safety systems, maintaining continuous data center uptime.
- Operated and monitored BMS and EPMS systems to detect abnormalities, analyze trends, and support timely troubleshooting of infrastructure issues.
- Executed rack installation, structured cabling, and decommissioning activities in adherence to defined SLAs and operational standards.
- Carried out preventive and corrective maintenance on critical equipment including UPS systems, PDUs, switchgear, diesel generators, and CRAC/CRAH units.
- Assisted in incident response activities, contributing to root cause analysis (RCA) and preparation of technical reports in line with change management procedures.
- Coordinated with vendors and contractors to ensure maintenance activities comply with safety protocols, site standards, and regulatory requirements.
- Supported critical power operations such as load transfers, UPS bypass procedures, and generator synchronization while ensuring zero service disruption.
- Maintained accurate documentation including maintenance logs, incident records, MOPs/SOPs, and emergency response procedures.
- Managed rack-level activities such as elevations, asset tracking, labeling, and assisted in power and cooling capacity planning for new deployments.
- Collaborated with network and server teams to ensure safe execution of power operations, cable patching, and infrastructure alignment.

Data Center Operations Support Engineer

HCL Data Centers – Hyderabad, India

Nov 2021-Dec 2022

- Monitored and maintained critical data center infrastructure, including power and cooling systems such as chillers, cooling towers, HVAC units, pumps, and fire protection systems.
- Operated and monitored BMS (Building Management System) and EPMS (Electrical Power Monitoring System) dashboards to identify anomalies and ensure timely issue resolution.
- Supported data center lifecycle activities including rack installation, decommissioning, and structured cabling management.
- Assisted in executing preventive maintenance plans, safety audits, and maintaining accurate technical documentation for compliance and operational efficiency.
- Collaborated with cross-functional teams and external vendors to ensure seamless, secure, and efficient data center operations.
- Supported engineers during critical operations such as load testing, black building tests, and disaster recovery (DR) drills to validate infrastructure resilience.
- Conducted routine checks including PDU breaker status verification, cable management audits, and monitoring of rack-level power distribution for operational safety.
- Coordinated with vendors for maintenance activities including chiller servicing, UPS health checks, AHU/CRAH maintenance, and fire safety system inspections.
- Contributed to operational documentation by creating runbooks, managing incident tickets, and preparing detailed shift handover reports to ensure transparency and continuity.

EDUCATION

- Master of information sciences 2024.
- Jawaharlal Nehru Technological University Bachelor of Science Electronics and Communication Engineering
