SUMMARY

Data Engineer with 3+ years of experience designing, building, and optimizing **data pipelines, cloud architectures, and real-time streaming systems** across healthcare, retail, and enterprise domains. Proficient in **AWS, Azure, GCP, Snowflake, Hadoop, and Delta Lake** with expertise in **ETL/ELT, PySpark, Kafka, Airflow, and dbt**. Skilled in **data warehousing, data modeling, governance, compliance automation, and performance optimization** to enable advanced analytics, machine learning, and BI initiatives.

WORK EXPERIENCE

Tungsten Automation – United States

Data Engineer | May 2025 - Present

- Designed and deployed end-to-end **ETL/ELT pipelines** on AWS (S3, Lambda, ECS, RDS) and Azure Data Factory, integrating structured, semi-structured, and unstructured data into **Snowflake and Delta Lake**.
- Built **real-time streaming pipelines** using Apache Kafka, Spark Structured Streaming, and AWS Kinesis to power operational dashboards with sub-second latency.
- Automated data workflows with **Airflow** and **dbt**, reducing failures by 35% and improving deployment efficiency by 40%.
- Integrated **machine learning models** into production pipelines to support predictive analytics and demand forecasting.
- Implemented **data governance and security policies**, ensuring compliance with **HIPAA and SOC2** standards.

Magna Infotech – Chennai, India

Data Engineer | Aug 2020 – July 2023

- Designed and optimized **PySpark pipelines** for Hive and HDFS, improving data transfer efficiency by 30%.
- Built and maintained **data models (Star and Snowflake schema)** and dictionaries to standardize reporting.
- Developed **Tableau dashboards** with Hive queries, reducing analysis turnaround time by 30%.
- Improved **data governance and metadata management** for regulatory compliance (GDPR, HIPAA).
- Supported cross-functional teams in resolving **data quality and master data management issues**.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, R, Shell Scripting

Data Engineering & ETL: Apache Airflow, SSIS, Informatica, DataStage, PySpark

Databases & Data Warehousing: SQL Server, MySQL, Snowflake, Teradata, MongoDB, Hive

Big Data & Cloud Platforms: Hadoop, AWS (EC2, S3, Lambda, RDS, ECS, Athena), Azure

Data Formats & Processing: JSON, XML, Pandas, NumPy, Matplotlib, SQLAlchemy

Visualization & BI Tools: Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)

Containerization & CI/CD: Docker, Kubernetes, Jenkins, Maven, Gradle

EDUCATION

University of Central Missouri

Master's in Computer Science

Warrensburg, MO

Aug 2023 – May 2025

Veltech University

Bachelor of Technology in Computer Science Engineering

Chennai, IND

Aug 2019 – May 2023

PROJECTS

Gomoku AI | Python, Tensorflow, Scipy, sklearn, Numpy |

- Created an AI system that plays Gomoku and implemented a sequential neural network (CNN) with 7 layers, utilizing the ReLU activation function in the first 6 layers and a sigmoid activation function in the output layer.
- Developed a heuristic function in minimax, trained the AI using 2880 game states from 2022 Gomoku-Cup competition, optimizing to an accuracy of 87% and a loss of 0.003 over 10 Gradient updates, achieving a win rate of over 80% ± 12%.
