

With over 3+ years of hands-on experience, specialize in designing and optimizing data pipelines and ETL processes. Proficient in Python, Bash, PowerShell scripting, with expertise in data analytics and visualization using Tableau, Power BI. Skilled in big data technologies like Apache Hadoop, Spark, cloud platforms like Azure, AWS, GCP and managing databases including Snowflake, Redshift, MySQL. Well-versed in ETL tools, data warehousing, and various data modeling techniques.

EXPERIENCE

CVS HEALTH, MO, USA

FEB 2024 – TILL DATE

DATA ENGINEER

- Implemented Agile Methodology to streamline configuration, develop, and establish standards to ensure efficient project execution.
- Leveraged in Python packages such as SciPy, NumPy, and pandas for comprehensive data analysis and manipulation,enhancing data-driven decision-making.
- Orchestrated the migration of a legacy on-premises data infrastructure to Azure cloud platform, leveraging Azure Data Factory for data ingestion, transformation, and integration.
- Reduced the cost of data storage and processing by 20% by migrating to a cloud-based data platform.
- Developed end-to-end ETL (Extract, Transform, Load) pipelines using Azure Data Factory, Blob Storage and Azure Databricks, ensuring seamless data ingestion, transformation, and loading from various sources into Azure SQL Data Warehouse.
- Worked on migrating MapReduce programs into Spark transformations using Spark and Scala.
- Utilized SQL Server Reporting Services (SSRS) to generate insightful periodic reports, combining statistical analysis with data visualization for enhanced decision support.
- Employed Snowflake as a cloud-based data warehouse solution to store and query structured and semi-structured data, enhancing the efficiency of data storage and retrieval.

STATE FARM INSURANCE, MO, USA

JUN 2023 – DEC 2023

DATA ENGINEER INTERN

- Experienced in the Hadoop ecosystem components like Spark with Scala for data processing.
- Worked with cloud-based data platforms such as GCP, AWS including services like Google cloud Storage (GCS), Google cloud compute engine (GCE), AWS EC2, AWS S3, AWS Glue, Amazon Redshift.
- Improved ETL processes, resulting in a 20% reduction in data loading time using SSIS.
- Developed and maintained scalable data pipelines and workflows using Python and SQL.
- Utilized Google Cloud Scheduler and Cloud Functions for automated data pipeline orchestration and management.
- Established robust data monitoring solutions, reducing system downtime by 25% and ensuring data availability.

KARVY DATA MANAGEMENT SERVICES LIMITED, INDIA

JUN 2019 – DEC 2021

DATA ENGINEER

- Designed and implemented a scalable data lake architecture on Azure Blob Storage, utilizing Azure Data Lake Storage Gen2 and Azure Databricks, Synapse for data processing and analytics.
- Identified data quality issues and implemented data cleaning and data validation processes, reducing errors by 25%.
- Developed complex SQL queries to extract and manipulate data from relational databases.
- Conducted performance tuning and optimization of Azure SQL databases and data processing workflows, resulting in a 40% reduction in query response times and a 20% decrease in infrastructure costs.
- Utilized JIRA for tracking automation process and service management, integrating with Azure DevOps for comprehensive project management and collaboration.
- Performed exploratory data analysis (EDA) and statistical analysis to uncover trends and insights.
- Implemented automated monitoring and alerting solutions using Azure Monitor and Azure Log Analytics, enabling proactive detection and resolution of performance issues.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Languages:	SQL, PL/SQL, Python, Scala, Shell, Bash
Libraries:	Pandas, NumPy, Matplotlib, SciPy, scikit-learn, seaborn
IDEs:	Visual Studio, Eclipse, NetBeans
ETL:	SSIS, SSAS, Informatica
Big Data Ecosystem:	Hadoop, MapReduce, Hive, Apache Spark, Databricks
Data Warehousing:	Snowflake, Redshift
Database:	MySQL, Teradata, SQL Server, Oracle, Db2
Reporting Tools:	Tableau, Power BI, SSRS
Cloud Technologies:	SnowSQL, SnowpipeAWS, IAM, Spinnaker
Version Control & Other Tools:	Star Schema, Fact Tables, Dimensional Tables, Pivot tables, VLOOKUP, KPI, OLAP, JIRA, MS Office, Jenkins, ERP, CRM, GIT
Operating System:	Windows, Linux

EDUCATION & CERTIFICATIONS

Master’s in Information Technology Management| Webster University, MO

Microsoft Certified Azure Data Engineer Associate | Microsoft-DP203
