SUMMARY

Data Analyst with 2+ years of experience analyzing business data, building dashboards, and developing SQL- and Python-based data solutions. Experienced in ETL development, data visualization, Power BI, Tableau, Snowflake, BigQuery, and statistical analysis. Skilled at transforming complex datasets into actionable insights that improve operational efficiency and business decision-making. Strong experience collaborating with cross-functional teams in Agile environments.

EXPERIENCE

Data Analyst | HyperNex Technologies | USA

June 2026 – Present

- Developed and optimized ETL pipelines using SQL, Python, Snowflake, and BigQuery to automate data integration and transformation, reducing data processing time by 35% and improving data accuracy for business reporting.
- Designed and delivered interactive Power BI and Tableau dashboards to monitor KPIs, operational metrics, revenue trends, and business performance, enabling stakeholders to make data-driven decisions and reducing manual reporting efforts by 40%.
- Performed data extraction, data cleaning, exploratory data analysis (EDA), statistical analysis, and data validation on large datasets using SQL, Python, and Excel, identifying actionable insights that improved reporting accuracy by 30%.
- Collaborated with Product, Finance, Operations, and Engineering teams to gather business requirements, define KPIs, develop data models, and deliver scalable business intelligence solutions that supported forecasting and strategic planning.
- Automated recurring reporting and analytics workflows using Python, SQL, Excel, Power Query, and Git, improving reporting efficiency, strengthening data quality, and saving over 10 hours of manual effort each week.

Data Analyst | Xyphramin Technologies | India

Jul 2022 – Jul 2024

- Leveraged Snowflake, SQL, and cloud-based data platforms to optimize data retrieval, support data warehouse initiatives, and enhance query performance while ensuring data quality and compliance with business standards.
- Analyzed large datasets using SQL, Python, Excel, and statistical analysis to identify business trends, measure KPIs, perform root cause analysis, and deliver actionable insights that improved operational efficiency and supported data-driven decision-making.
- Designed and maintained Power BI and Tableau dashboards to visualize business performance, revenue, customer behavior, and operational metrics, reducing manual reporting by 40% and enabling executive stakeholders to monitor key performance indicators in real.
- Partnered with Product, Finance, Marketing, and Engineering teams to gather business requirements, develop data models, validate data accuracy, and deliver scalable Business Intelligence solutions that improved forecasting, reporting, and strategic planning.
- Automated reporting and analytics workflows using Python, SQL, Excel, Power Query, Git, and Snowflake, improving reporting efficiency, strengthening data governance, and saving 10+ hours of manual effort each week through process automation.

SKILLS

- Technical Skills:** Python, SQL, R, Advanced Excel, Power BI, Tableau, Looker Studio, Snowflake, BigQuery, PostgreSQL, MySQL, AWS (S3), Google Cloud Platform (BigQuery).
- Data Analytics:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Data Modeling, Business Analysis, KPI Development, Predictive Analytics, Forecasting, A/B Testing, Data Validation.
- Business Intelligence & Reporting:** ETL Development, Data Integration, Data Transformation, Dashboard Development, Report Automation, Business Intelligence (BI), SQL Query Optimization, Performance Reporting.
- Tools & Technologies:** Pandas, NumPy, Matplotlib, Scikit-learn, Git, GitHub, JIRA, Confluence, Microsoft Office Suite, Power Query, Power Pivot, Pivot Tables.
- Methodologies:** Agile (Scrum), SDLC, Requirements Gathering, Cross-functional Collaboration, Stakeholder Management, Data Governance, Root Cause Analysis, Process Improvement.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Microsoft Power BI Certification

PROJECTS

Steel Energy Consumption Prediction (ML)

- Built end-to-end ML pipeline using H2O AutoML, MLflow, and FastAPI.
- Improved prediction accuracy with GBM and Random Forest models.

Iowa Liquor Sales Big Data Analysis

- Processed 100K+ records using Python, PySpark, and MongoDB.
- Analyzed sales trends and regional business insights.

EDUCATION

Master of Science in Data Science

Sep 2024 – May 2026

Rowan University, Glassboro, NJ

Bachelor of Technology in CSE (Big Data Analytics)

May 2020 – Jun 2024

Amrita Sai Institute of Science and Technology, India
