

DEVAKI NANDAKISHORE MARELLA

DATA ANALYST

Charlotte, NC, USA 28262 | Phone: (980) 216-6704 | Email Id: nandakishoremarella@gmail.com

SUMMARY

- As a dedicated **Data Analyst** above **4+ years** of experience, specialized in transforming raw data into actionable insights that drive informed **decision-making**.
- Specialized in transforming raw data into actionable insights, leveraging **SQL** for **complex database queries**, **R** for **statistical analysis**, **Python** for **data science**.
- Proficient in **Python** libraries like **NumPy**, **Pandas**, **Matplotlib**, **SciPy**, **Scikit-learn**, and **Seaborn** for advanced **data processing**, **analysis**, and **visualization**, delivering insightful, **data-driven** results.
- Skilled in employing various methodologies such as **Waterfall** and **Agile** throughout the **Software Development Life Cycle (SDLC)**, demonstrating versatility and commitment to project success.
- Expertise in utilizing tools like **SQL**, **Excel**, **Power BI**, and **Tableau** for efficient querying, in-depth **analysis**, and creating compelling visuals, along with database administration in **MySQL** and **NoSQL** environments including **MongoDB**.
- Ensured the seamless flow of data between **AWS** services, enabling streamlined data processing and analysis for informed decision-making as a Data Analyst.
- Employed Amazon RDS for efficient database management, optimizing data access and retrieval while maintaining data integrity.

WORK EXPERIENCE

BCBS, NC

Jun 2023-

Current

Data Analyst

- Developed custom **Python** scripts for **data extraction, transformation, and loading (ETL)**, leading to decrease in manual labor by automating intricate data processes.
- Utilized **SQL** to create innovative stored procedures and triggers, significantly improving data reliability and automating maintenance tasks.
- Led analytical projects following **Agile (SCRUM)** methodologies, consistently achieving on-time delivery rate, ensuring projects were completed efficiently within scope.
- Performed **Data Analysis** and **Data profiling** using complex **SQL** on various sources systems including **MS SQL Server**.
- Integrated **Tableau** with multiple data sources, including databases, **Excel** files, and cloud storage, to consolidate and visualize data from diverse platforms in a single dashboard.
- Analyzed healthcare datasets using **Python** and its libraries, including **NumPy**, **Pandas**, **SciKit-Learn**, **Matplotlib**, **Seaborn** and **Plotly**, driving informed decision-making in healthcare management.
- Proficient in using advanced **Excel** functions, including **VLOOKUP**, **HLOOKUP**, **INDEX-MATCH**, and **SUMIFS** for **data manipulation and analysis**, enabling quick and accurate data retrieval.
- Crafted and implemented comprehensive dashboards using **Tableau**, employing various chart types for clear data presentation, leading to improved patient-caregiver engagement and operational cost savings.
- Engineered automated **data cleansing** pipelines in **Python**, reducing **data cleaning** time and enhancing data accuracy through the detection and correction of data anomalies.
- Efficiently used **Power Query** for establishing connections and transforming data from various sources, streamlining data preparation processes and elevating data accuracy standards.
- Utilized **Amazon EC2** instances to perform data analysis and processing tasks, leveraging the scalable computing power of the cloud for efficient **data manipulation and modeling**.
- Employed **Amazon S3** buckets for secure and scalable data storage, ensuring data availability and durability while facilitating data sharing and collaboration among team members.
- Built ETL pipelines to retrieve data from **NoSQL** databases and load aggregated data into the analytical platform.

McKinsey, NC

Jan 2023- May

2023

Data Analyst Intern

- Utilized **Python** for **advanced data analysis and visualization**, developing scripts and algorithms with libraries like **Matplotlib**, **Pandas**, and **NumPy** to uncover insights, predict trends, and support data-driven decisions. Gained experience in creating interactive visuals and presenting complex analytical findings to stakeholders.
- Skilled in using **SQL** for **data cleaning** and preprocessing tasks, such as handling missing values, duplicates, and data format transformation.
- Conducted data analysis using **SQL** on various source systems, including **MS SQL Server**, to extract valuable insights and support data-driven decision-making.
- Applied **Python** to real-world datasets for data manipulation and cleansing using **Pandas**, **NumPy** and employed **Matplotlib** and **Seaborn** for initial insightful visualizations. Contributed to the development of predictive models with **SciKit-Learn**, enhancing business decision-making with tangible data insights.
- Participated in the development of **Python** scripts to automate the customer query system, contributing to a reduction in client query resolution time.
- Created complex **Excel** formulas and functions to perform data calculations, such as financial modeling, trend analysis, and forecasting.
- Assisted with automating reporting functionality using **Power BI** tools, including **Power BI reporting**, **Dashboards & Scorecards (KPI)**, and **MySQL**, Data warehouse data sources, streamlining reporting processes.
- Developed various solution-driven views and dashboards by creating different chart types, including Pie Charts, Bar Charts, Tree Maps, Circle Views, Line Charts, Area Charts, and **Scatter Plots** in **Power BI**, fulfilling the reporting requirements.
- Designed and developed **Power BI** graphical and **visualization** solutions for the majority of projects with business requirement documents, ensuring the creation of interactive dashboards that align with project goals and objectives.
- Collaborated under senior management's guidance to assist in comprehensive **data analysis**, supporting data mining and mapping techniques with **Python**. Applied meticulous **data cleansing** processes to ensure high reporting standards and support informed **decision-making**.

KPMG, India

Nov 2020-

Dec 2021

Data Analyst

- Developed and maintained reports and dashboards with **QuickSight** and **Looker** to provide valuable insights to internal teams such as marketing, finance, and product, enabling data-driven decision-making across various departments.
- Developed custom **Python** scripts and algorithms to automate data processing tasks, resulting in significant time savings and improved data accuracy.
- Created interactive and dynamic **data visualizations** using **Matplotlib** and **Seaborn**, allowing for better data exploration and presentation of insights to stakeholders.
- Applied **Python** for statistical analysis, hypothesis testing, and predictive modeling, contributing to data-driven decision-making in various projects.
- Query, clean, combine, and organize data from various sources, including databases, **APIs**, and external data providers, to support company-wide analytical needs for nearly all data-related tasks.
- Ensured **data quality** and accuracy across multiple business platforms by implementing **data validation** processes, performing data cleansing activities, and monitoring data integrity across a wide range of projects.
- Cleaned data and processed third-party spending data into maneuverable deliverables within a specific format with **Excel macros** and **Python** libraries such as **NumPy**, **Pandas**, and **Matplotlib** for a significant portion of data processing tasks.

- Proficient in data transformation and cleaning within **Power BI**, ensuring data accuracy and consistency across reporting dashboards.
- Collaborated with **cross-functional** teams to gather data requirements and translate them into effective data visualizations in **Power BI**, facilitating better communication of insights.
- Developed and maintained **SQL** queries, scripts, stored procedures, and functions to extract and manipulate data efficiently and effectively.
- Used **Oracle's SQL** Loader utility for bulk data loading, enhancing the speed and efficiency of data integration processes.
- Utilized **MS SQL Server's Integration Services (SSIS)** to design and implement **ETL (Extract, Transform, Load)** processes, ensuring seamless data integration from various sources.

Accenture, India

Jun 2018- Oct 2020

Data Analyst/ Application Development Analyst

- Employed agile Scrum techniques to enhance data analysis workflows, promoting rapid response to change and fostering a dynamic, collaborative environment for project development.
- Led the data management initiatives for a boutique law firm, utilizing advanced **Excel** techniques and cloud solutions to streamline data organization and accessibility.
- Innovatively applied **Python's Pandas, NumPy, and Matplotlib** libraries to construct and refine machine learning models, significantly boosting resource management efficiency by 15% through detailed graphical analysis and capacity planning.
- Revolutionized data processing efficiency by introducing **SQL Server Integration Services (SSIS) for ETL** tasks and formulating sophisticated **SQL** queries to optimize data retrieval and manipulation.
- Executed targeted data improvement strategies, successfully elevating report precision by 15% and enhancing client contentment levels by 20% through meticulous analysis and recommendations.
- Undertook detailed **Exploratory Data Analysis (EDA)** on a vast dataset of 800k records, employing **Excel** and **MySQL** techniques to ensure high data accuracy and integrity.
- Applied **Python** to automate the customer query system, contributing to a substantial 15% reduction in client query resolution time.
- Utilized **Python** for statistical analysis, hypothesis testing, and predictive modeling, driving data-driven decision-making in various projects.
- Collaborated with cross-functional teams to gather data requirements and translate them into effective data analysis solutions using **Python**.
- Utilized **Tableau** and **MS Office Suite**, particularly **Advanced Excel**, to create interactive dashboards, visualizations, and reports for data analysis and presentation to stakeholders.
- Created **Tableau** dashboards with responsive design to ensure optimal viewing across different devices and screen sizes.
- Adopted **Power Query** for streamlined data cleansing operations, achieving a 40% cost reduction in tools while maintaining an 80% standard in data quality, significantly boosting operational efficiency and accuracy.
- Leveraged the flexibility and scalability of **Amazon EC2 and Amazon S3** to accommodate varying data volumes and processing demands in data analysis projects.
- Conceptualized and deployed comprehensive dashboards on **Tableau Server**, dramatically reducing data loss and boosting the effectiveness of **key performance indicators (KPIs)**, thereby enhancing organizational strategic insight and decision-making.

TECHNICAL SKILLS

Languages:	SQL, R & Python.
Visualization tools:	Tableau, Power BI, MS Excel
Database:	MySQL, MongoDB, SQL server, RDBMS, PostgreSQL, NoSQL
Python Libraries:	NumPy, matplotlib, Scikit-learn, TensorFlow, PyTorch.
Cloud Technologies:	AWS, RDS, EC2, S3, Quicksight, Azure.
Data Engineer Tools:	Gits, Jira & Jenkins.
Methodologies:	Agile (Scrum) & Water fall.
Other Tools:	Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Oracle CRM, ETL development tools

EDUCATION

Master of Science in Information Technology	2023
University of North Carolina at Charlotte	
Bachelors of Technology in ECE	
2018	
Amrita School of Engineering, India	

PROJECTS

Big Data Analytics Project
• Utilized Python and Hadoop ecosystem tools to extract insights from large datasets. • Applied statistical analysis and machine learning techniques for informed decision-making.
GUPT Project (Privacy Preserving Data Analysis):
• Designed project architecture and implemented the Sample and Aggregate methodology. • Enhanced privacy budget allocation, demonstrating improved accuracy and usability compared to traditional differential privacy systems.
