SKILLS

Network traffic flow monitoring and analysis software, Microsoft Sentinel, Microsoft Azure, Splunk, Security Compliance, Quality Assurance (QA), Maintenance, Risk Analysis, Security Policies, CyberSecurity Asset Management(CSAM), Critical Thinking, Controls and Frameworks, Computer Systems, and Process Improvement, Vulnerability Management Foundation

TECHNICAL Skills

Problem-solving skills, Consistency, Sound Judgement, Collaboration, Customer Service, and adaptability.

CERTIFICATIONS

Google Cybersecurity Certification, Google IT Support Certification, CompTIA Security+ Expected date May 2025

WORK EXPERIENCE

United States Army

Various

Security Operations Specialist/Information Technology Specialist August 2018 – Current

- Assisted with the receipt, storage, issue, maintenance, modification, destruction, and demilitarization of explosive items; performed ammunition supply stock control and accounting duties using automated procedures; assisted with the preparation of transportation of ammunition components and explosives.
- Performed maintenance (unit, direct support, and general support), modification, destruction, and demilitarization of ammunition and explosive parts; operated computer hardware and software/utilities manual records to perform stock control. Experience with ammunition supply stock control and accounting related to my ability to track and monitor security events in an SIEM tool.
- Streamlined inventory management procedures, identified inefficiencies, and implemented process improvements that enhanced accuracy and compliance. Experience with streamlining inventory management procedures relates to my ability to develop and implement efficient and effective security processes and workflows.
- Worked seamlessly within diverse teams, fostering effective communication and collaboration with colleagues to achieve shared goals.
- Trained junior employees and provided technical guidance and support. Experience with training junior employees and providing technical guidance and support relates to my ability to mentor and train other security professionals.

Amazon**Associate I****Oak Creek, WI****September 2021 – September 2023**

- Monitored inventory levels, conducted cycle counts, and ensured accurate stock levels to support order fulfillment.
- Operated material handling equipment, including forklifts and pallet jacks, to transport items safely into the facility.
- Suggested process improvements that enhanced efficiency and accuracy in order fulfillment, contributing to streamlined operations.
- Committed to strict adherence to safety protocols, promoting a secure work environment for all team members.

Circle 1 Network**Software Developer Intern****Milwaukee, WI****January 2016 – August 2016**

- Designed, developed, and maintained high-quality software applications using languages such as Java or C++, delivering efficient, scalable, and well-documented code within Unity software.
- Created innovative algorithms and logical solutions to complex technical challenges, optimizing code performance and enhancing application efficiency.
- Compiled application documentation and prepared operating instructions for users
- Participated in code reviews, offering constructive feedback, and enhancing code quality through collaboration.
- Proactively stayed updated with emerging programming languages, frameworks, and industry trends, attending workshops and online courses to refine skills and stay relevant in a rapidly evolving field.

EDUCATION**University Of Maryland Global Campus****B.S in CyberSecurity Technology: Expected Graduation Date: Dec, 2025**
