SUMMARY

Business Analyst with 3+ years of experience supporting enterprise IT and healthcare transformation initiatives through data-driven requirement analysis, stakeholder collaboration, and Agile delivery practices. Skilled in translating complex business needs into functional specifications, user stories, and actionable solutions that improve operational efficiency, reporting accuracy, and system performance. Experienced in healthcare platforms, workflow optimization, and analytics-supported decision making, with a strong focus on requirement traceability, UAT coordination, and cross-functional communication within fast-paced Agile environments.

PROFESSIONAL EXPERIENCE

Business Analyst Syneos Health USA	Sept 2025 – Current
- Collaborate with healthcare stakeholders and product teams to gather and document functional requirements, translating business workflows into detailed user stories and acceptance criteria that improved sprint delivery efficiency by 25 percent. - Conduct gap analysis and process evaluations across healthcare operations, identifying improvement opportunities that reduced manual reporting efforts by 30 percent through workflow enhancements and automation recommendations. - Develop requirement documentation including BRDs, FRDs, and process flow diagrams using Visio and Confluence, ensuring full requirement traceability and alignment with regulatory and compliance standards. - Support Agile ceremonies including sprint planning, backlog refinement, and retrospectives, helping product teams prioritize high-impact features that accelerated release cycles by 20 percent. - Partner with QA teams during UAT cycles by validating test scenarios, reviewing defects, and coordinating stakeholder sign-offs, improving deployment readiness and reducing post-release issues by 18 percent. - Analyze healthcare operational data using SQL and Excel to support reporting requirements, enabling leadership teams to track KPIs and improve data-driven decision making across programs. - Facilitate communication between technical teams and business users by simplifying complex system requirements into clear documentation, improving stakeholder understanding and reducing rework during development. - Assist in dashboard requirement definition for Power BI reporting initiatives, ensuring accurate visualization of performance metrics and operational insights aligned with business goals. - Monitor change requests and enhancement tickets in JIRA, maintaining backlog clarity and ensuring development tasks align with evolving healthcare business priorities.	

Business Analyst Accenture India	July 2020 – June 2023
- Gathered and documented business requirements through stakeholder workshops and discovery sessions, producing structured user stories and functional specifications that improved requirement clarity and reduced development rework by 22 percent. - Supported Agile delivery teams by managing backlog items, refining acceptance criteria, and ensuring alignment between business expectations and technical implementation timelines. - Conducted data analysis using SQL and Excel to evaluate business performance trends, contributing to reporting improvements that enhanced operational visibility for leadership teams. - Created process maps and workflow diagrams to identify inefficiencies in existing systems, helping streamline operations and reduce manual effort by 28 percent through optimized workflows. - Assisted product owners in defining feature scope and prioritization, ensuring deliverables aligned with business value and supported enterprise digital transformation initiatives. - Coordinated UAT activities including test planning, defect tracking, and stakeholder communication, improving release quality and reducing production defects across multiple deployments. - Prepared executive-level presentations and requirement summaries that supported decision making and improved cross-functional communication between business and IT teams. - Collaborated with developers and QA teams to clarify requirements, review change requests, and validate solution designs, ensuring solutions met functional expectations. - Maintained detailed documentation in Confluence and JIRA, improving project transparency and enabling smoother onboarding of new team members within Agile programs.	

TECHNICAL SKILLS

- Business Analysis & Documentation:** BRDs, FRDs, User Stories, Acceptance Criteria, Requirement Traceability Matrix (RTM), Functional Specifications
- Agile & Project Management:** Scrum, Kanban, JIRA, Confluence, Sprint Planning, Backlog Grooming, Stakeholder Reporting
- Data Analysis & Reporting:** SQL, Advanced Excel, Power BI, Tableau, KPI Tracking, Data Validation
- Process Modeling & Visualization:** Visio, Lucidchart, Workflow Diagrams, Process Mapping, Gap Analysis
- Requirements Elicitation:** Workshops, Interviews, Stakeholder Analysis, Functional Decomposition
- Healthcare Domain Knowledge:** HIPAA Compliance, Healthcare Workflows, Claims Systems, Patient Data Processes
- UAT & Testing Support:** Test Case Review, Defect Tracking, User Acceptance Testing Coordination
- System Implementation Support:** Change Requests, Release Documentation, Feature Enhancements
- Business Intelligence Concepts:** Dashboard Requirements, Data Interpretation, Performance Metrics
- Collaboration Tools:** MS Teams, SharePoint, Confluence, Slack
- Documentation & Reporting:** Executive Reports, Requirement Analysis Documents, Business Presentations
- Analytical Techniques:** Root Cause Analysis, Trend Analysis, Process Improvement, Risk Assessment

Education

Master Lindsey Wilson college, USA	Jan 2024 - Aug 2025
Bachelor Matrusri Engineering College, India	June 2018 - May 2022
