

Dharmendra Basava

Data Analyst

USA | Phone: (551) 220-9918 | Email: dharmendrabasava10@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience transforming complex healthcare and banking data into actionable business insights. Experienced in analyzing customer behavior, operational performance, utilization trends, and financial outcomes to support forecasting, performance monitoring, process optimization, and strategic decision-making. Proven ability to partner with cross-functional stakeholders, improve reporting effectiveness, and deliver data-driven recommendations that enhance business performance and operational efficiency.

TECHNICAL SKILLS

Data Analysis & Visualization:	SQL, Python, Java, R, SAS, Tableau, Power BI
Machine Learning:	Scikit-learn, TensorFlow, Supervised & Unsupervised Learning
Statistical Analysis:	Hypothesis Testing, A/B Testing, Regression Analysis, Time Series Forecasting, ANOVA, Predictive Modeling
ETL & Data Processing:	Apache Spark, Talend, SSIS, Azure Data Factory, Data Cleaning & Transformation
Project Management:	Timeline Management, Milestone Tracking, Jira, MS Project
Cloud Technology:	AWS (S3, Athena), Microsoft Azure
Databases:	MySQL, SQL Server, Snowflake, Amazon Redshift, Azure Synapse Analytics, NoSQL
Project & Collaboration Tools:	Jira, MS Project, Agile/Scrum, SDLC

WORK EXPERIENCE

Data Analyst | Frost Bank, USA

Sep 2024 – Present

- Supported retail banking analytics ecosystem integrating customer engagement metrics, deposit activity, profitability indicators, and retention reporting frameworks for strategic decision support across banking operations teams.
- Analyzed customer behavior and relationship banking trends using **Python** data exploration techniques, uncovering attrition drivers and deposit growth opportunities that improved customer retention outcomes by **14%**.
- Processed over **120M** banking transactions and account activities within **Snowflake**, performing trend identification, reconciliation, and profitability analysis to strengthen portfolio performance monitoring and reporting accuracy.
- Leveraged **Scikit-learn** to perform customer segmentation and churn prediction analysis, applying supervised learning insights to prioritize retention strategies and enhance marketing campaign planning effectiveness.
- Evaluated digital banking engagement initiatives using **A/B Testing**, measuring product adoption patterns and campaign effectiveness, increasing response rates by **18%** while guiding optimization decisions.
- Generated **Time Series Forecasting** analyses through predictive modeling techniques, improving forecast accuracy by **16%** while supporting executive planning and deposit performance monitoring discussions.
- Validated **Azure Data Factory** pipelines and **Apache Spark** transformation outputs, resolving data quality discrepancies and ensuring reliable KPI reporting for banking stakeholders and operations teams.
- Collaborated with **Agile/Scrum** delivery teams to build **Power BI** dashboards from **AWS Athena** datasets, enabling executive visibility into customer profitability and portfolio performance trends.

Data Analyst | Zensar Technologies, India

Aug 2020 – Jul 2023

- Supported healthcare analytics environment integrating claims, reimbursement, provider performance, and population health datasets to strengthen utilization monitoring, care quality measurement, and strategic decision support.
- Analyzed healthcare claims and reimbursement trends using **SQL**, identifying payment variances and utilization patterns that improved reimbursement reporting accuracy by **15%** across operations.
- Processed over **35M** healthcare claims and patient encounter records within **SQL Server**, performing reconciliation and trend analysis to support population health reporting initiatives.
- Evaluated provider performance metrics through **Tableau** dashboards, uncovering care delivery inefficiencies and enhancing utilization visibility by **18%** for healthcare leadership reviews.
- Conducted **Hypothesis Testing** to validate utilization management assumptions and applied **ANOVA** to compare provider performance variations, supporting evidence-based decisions for care quality improvement initiatives.
- Assessed reimbursement and service utilization patterns using **Regression Analysis**, identifying key performance drivers that improved provider performance monitoring effectiveness by **16%** across business units.
- Validated healthcare datasets through **SSIS** data transformation workflows, resolving reporting inconsistencies and improving healthcare data quality by **21%** for downstream analytics consumption.
- Performed root cause analysis on population health and operational KPIs using **Python**, applying data cleaning techniques to generate actionable insights supporting stakeholder reporting initiatives.
- Collaborated with cross-functional teams using **Jira** to track reporting deliverables and followed **SDLC** governance practices, leveraging **Microsoft Azure** reporting environments and **Talend** integrated datasets to support executive reporting and operational monitoring.

EDUCATION

Master of Science in Advanced Data Analytics - University of North Texas, Denton, Texas, USA

Bachelor of Electronics and Communication Engineering - Aditya Engineering College, Surampalem, Andhra Pradesh, India
