Stony Brook, NY | +1 (934) 949-8144 | dheerajsaikum.meda@stonybrook.edu | [linkedin.com/in/dheeraj](https://www.linkedin.com/in/dheeraj)

EDUCATION

Stony Brook University

Stony Brook, NY

Master of Science in Computer Science, CGPA : 3.5/4

Aug 2024 - May 2026

- Coursework : Data Science Fundamentals, Network Security, Visualization, Machine Learning.

Vellore Institute of Technology

Vellore, India

Bachelor of Technology in Computer Science and Engineering, CGPA : 3.5/4

July 2019 - May 2023

- Coursework : Artificial Intelligence, Computer Architecture, Web Mining, Software Development, Operating Systems, Network and Communication, Web Programming, Object-Oriented Programming.

SKILLS

Languages : Java (Primary), Python, C++, SQL, JavaScript.

Operating Systems : Windows, Linux.

Tools, Frameworks: Amazon Web Services (AWS), Docker (basic), Git, Flask, Django.

Technical Skills : HTML, CSS, MongoDB, REST APIs, Software Development and Architecture.

PROFESSIONAL EXPERIENCE

Stony Brook University

Stony Brook, NY

Research Assistant - (*Flask, React, JavaScript*)

Jan 2025 - Present

- Built a **scalable data extraction and analytics platform** for large choropleth maps using **Flask and React**, transforming unstructured visual data into structured datasets.
- Designed backend APIs and processing pipelines to support computer vision-based extraction, enabling efficient downstream analytics and system scalability.

Teaching Assistant - *IAE 101.30 Digital Intelligence - (Java)*

Sept 2024 - Dec 2024

- Taught and mentored 20+ students in Java, object-oriented programming, data structures and algorithmic problem solving, reinforcing strong CS fundamentals.

Ivy Protech IT Associates

Software Engineering Intern

June 2023 - Feb 2024

- Developed and maintained **Java**-based backend services integrated with Microsoft Dynamics 365, improving workflow automation and reducing manual operations by **20%**.
- Designed and implemented **RESTful APIs** and backend integration services using **Java** and **SQL**, improving data processing efficiency by **35%**.
- Debugged production issues, optimized database queries, and collaborated in Agile sprints, participating in **code reviews** to ensure clean, maintainable code.

PROJECTS

Stress Analysis and Prediction System Using Machine Learning - (Python, ML Algorithms)

- Designed and deployed a Django web app that detects stress levels from EEG signals with **95.3%** accuracy, evaluated SVM, Random Forest, and CNN models using **Scikit-learn and PyTorch**, selected CNN for best accuracy while optimizing inference speed and deployed via Django for real-time use.
- Delivered a production-ready ML pipeline accessible through a web interface, improving usability for non-technical users.

Whatsapp Engagement Monitor - (Python, Django, Sqlite3)

- Built a Django-based web application to analyze WhatsApp chat data and visualize engagement metrics.
- Implemented backend parsing in Python and frontend visualization with HTML/CSS/JS, delivering a scalable and interactive tool for real-time insights.

CERTIFICATIONS

AWS Cloud Foundation, Amazon Web Services

Web Application Technologies and Django, University of Michigan
