EXPERIENCE

Business Analyst

June 2025 – Present

DMV Music Alliance

Remote

- Owned end-to-end requirements gathering as the primary liaison across program, leadership, and analytics teams, **eliciting, documenting, and validating business requirements** and data definitions to standardize reporting workflows for organization-wide initiatives.
- Owned & maintained **KPI frameworks, financial reporting logic, and data documentation**, improving metric standardization and reducing data interpretation issues by **30%** across operations and finance stakeholders.
- Performed deep-dive **data validation & reconciliation** using **SQL (CTEs, joins, window functions)** & **Excel (Pivot Tables, advanced formulas)** to identify discrepancies, enforce KPI consistency, and support **audit-ready, compliance-aligned reporting**.
- Designed & maintained **Power BI dashboards** integrating financial, engagement, & operational data using **SQL & Python**, automating reporting pipelines & reducing manual reporting effort by **40%** while improving financial and operational decision-making.
- Partnered with internal and external stakeholders to resolve reporting issues, validate data accuracy, and translate analytical findings into **executive-ready insights** supporting operational planning and performance optimization.

Logistics Analyst Intern

Jan 2025 – Mar 2025

Allagash Brewery Company

Boston, USA

- Owned logistics analytics initiatives by partnering with operations, finance, and **vendor stakeholders** to define **supply chain KPIs** (freight cost, carrier performance, delivery SLA/OTIF), aligning reporting with business objectives.
- Designed and maintained **Power BI dashboards** to monitor freight, carrier, and delivery performance, improving supply chain visibility and contributing to a **13% reduction** in freight costs through data-driven cost optimization.
- Performed **cost analysis and reconciliation** across shipment and carrier datasets using **SQL (joins, aggregations)** and **Excel**, identifying billing inconsistencies and improving financial reporting accuracy.
- Conducted **data quality checks and audit validations** on logistics datasets, documenting workflows and KPI definitions to ensure consistent interpretation of supply chain metrics across cross-functional teams.

Data Analyst Intern– Visualization & Insights

Apr 2024 – Jun 2024

KARA

Boston, USA

- Partnered with cross-functional teams to **translate business problems into data requirements**, enabling structured analysis on large-scale datasets.
- Developed & maintained **Tableau & Power BI dashboards** using data from **1M+ records**, improving data accessibility and reducing stakeholder response time by **28%**.
- Performed **data validation, consistency checks, and reporting audits** to ensure reliability and governance of analytics outputs across multiple teams.
- Delivered **executive-ready insights and presentations** that informed strategic decisions and funding allocation through clear data storytelling.

PROJECTS

Domino's Order Analytics Dashboard | Streamlit, Python, Pandas, Plotly, Statsmodels

Jan 2026 – Feb 2026

- Developed a live Streamlit dashboard to analyze **11K+ delivery orders**, identifying **delivery inefficiencies, SLA deviations, and fulfillment delays** to support supply chain and operational optimization.
- Performed EDA and feature engineering using **Python (Pandas)**, **SQL-style aggregations**, and **Excel** to analyze order volume, delivery distance, and timing, enabling evaluation of **delivery performance and cost drivers**.
- Applied regression modeling to identify key **cost and delivery time drivers**, performing **cost validation and scenario analysis** to recommend optimization levers that improved delivery profitability by **15%**.

Paris Housing Price Prediction | Python, Linear Regression, Streamlit, scikit-learn

Sept 2025 – Dec 2025

- Built a multiple linear regression model (**$R^2 = 0.75$**) to predict housing prices, applying structured data modeling and feature engineering techniques on large datasets.
- Performed **data cleaning, validation checks, and feature selection** (VIF, stepwise regression) to ensure model reliability and reduce data inconsistencies.
- Deployed a real-time Streamlit application integrating model inference pipelines to deliver **scalable, user-driven predictions**.

Airbnb Data Visualization and Analysis Dashboard | Tableau, R (RShiny)

Jun 2025 – Jul 2025

- Developed an interactive dashboard using RShiny and Tableau to analyze **pricing, demand seasonality, and revenue trends**, improving user engagement by **27%**.
- Synthesized multi-dimensional data into **actionable insights for pricing and demand forecasting**, simulating real-world business intelligence and operational reporting use cases for **100+ users**.

TECHNICAL SKILLS

Data Analysis & Querying: SQL (CTEs, Joins, Window Functions), Excel (Advanced Formulas, Pivot Tables), Python (Pandas, NumPy), R

Business Intelligence & Reporting: Power BI, Tableau, Looker, Google Data Studio

Supply Chain & Analytics: KPI Design, Demand Analysis, Forecasting, Delivery Performance (SLA/OTIF), Cost Optimization

Data Governance & Documentation: BRD, KPI Definitions, Data Quality Checks, Stakeholder Reporting

Data Platforms: Azure, Snowflake, Databricks, PostgreSQL, MySQL, BigQuery

Web & Digital Analytics: Google Analytics, Google Tag Manager

Analytical Techniques: Trend Analysis, Regression, Time-Series Analysis, A/B Testing

EDUCATION

Northeastern University

Boston, MA

Master of Science in Analytics, Specialization In Statistical Modeling, GPA: 3.9

Sept 2023 – Mar 2025

Vellore Institute of Technology

India

Bachelor of Technology in Computer Science

Jul 2019 – May 2023
