

DIVYA MOGULOJU

Data Analyst | +1 334-498-2416 | divyamoguloju1607@gmail.com

PROFESSIONAL SUMMARY

- Results-driven Data Analyst with 4+ years of experience driving business insights and supporting strategic decision-making using large-scale data across telecom and technology environments.
- Proficient in SQL and Python (Pandas, NumPy) for data extraction, transformation, and analysis supporting business reporting and operational decision-making needs.
- Analyzed large-scale datasets using advanced SQL queries including joins, CTEs, subqueries, and window functions to identify key business trends and performance drivers.
- Developed scalable ETL pipelines and data workflows integrating data from multiple sources using Snowflake, AWS, and Power Query, ensuring clean and analysis-ready datasets.
- Designed and developed interactive Power BI and Tableau dashboards tracking 15+ KPIs related to operational performance, customer behavior, and business efficiency.
- Experienced in statistical analysis including A/B testing, hypothesis testing, regression analysis, and forecasting to support data-driven business decisions.
- Proven ability to automate reporting workflows using Python, Excel, and Power BI, reducing manual reporting effort by up to 40% and improving turnaround time by 30%.
- Strong collaborator with cross-functional stakeholders — business, operations, and engineering teams — to gather requirements and translate them into actionable analytical solutions.
- Experienced in cloud and data platforms including AWS (S3, Redshift, Athena), Azure (Data Lake, Synapse), Snowflake, and Databricks for scalable analytics and reporting.

TECHNICAL SKILLS

Programming & Scripting	SQL (Joins, CTEs, Subqueries, Window Functions, Query Optimization, Data Profiling), Python (Pandas, NumPy, Matplotlib, Seaborn)
Data Visualization & BI	Power BI (DAX, Power Query, Data Modeling, KPI Dashboards, Drill-through Reports, Report Automation), Tableau, Looker, Qlik
Database Technologies	MySQL, SQL Server, Oracle, PostgreSQL, Relational Databases, Database Management
Cloud & Data Platforms	AWS (S3, Redshift, Athena, QuickSight), Azure (Data Lake, Synapse, Power BI Service), Snowflake, Databricks
ETL & Data Processing	ETL/ELT Processes, Data Integration, Data Reconciliation, Data Migration, Workflow Automation, Data Transformation
Statistical & Analytical	Trend Analysis, Variance Analysis, A/B Testing, Hypothesis Testing, Regression Analysis, Predictive Analytics, Time Series Forecasting, Statistical Process Limits
Excel Skills	Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Excel Macros, VBA Programming, Excel Template Development, Dashboard Automation, Data Validation, Conditional Formatting, Google Sheets, CSV
Data Governance & Quality	Data Quality Checks, Data Integrity Validation, Reporting Accuracy, Anomaly Detection, Data Governance
Business & Domain Skills	Business Analysis, Requirement Gathering, KPI Development, Data Storytelling, Process Improvement, Stakeholder Management, Healthcare Analytics, Insurance Data Analysis
Collaboration & Tools	Jira, Confluence, Agile/Scrum, UAT, BRD Documentation, Cross-Functional Collaboration, GitHub
AI/ML	Machine Learning, Predictive Modeling, NLP, Supervised & Unsupervised Learning, Classification, Clustering

Skills

Jupyter Notebook, Visual Studio, Google Sheets, Looker

PROFESSIONAL EXPERIENCE**Data Analyst** | Divisions Maintenance Group, Ohio, USA*Sep 2025 – Present*

- Analyzed operational, financial, and business datasets (1M+ records) using SQL, Python (Pandas, NumPy), and Power BI to support reporting and strategic decision-making across multiple departments.
- Developed and maintained interactive Power BI dashboards tracking 15+ KPIs including operational performance, productivity metrics, and business efficiency across cross-functional teams.
- Built scalable ETL pipelines integrating data from multiple business systems using SQL and Power Query, ensuring clean, consistent, and analysis-ready datasets for reporting.
- Collaborated with 10+ business stakeholders to gather requirements and deliver KPI dashboards and operational reports supporting weekly business reviews and leadership decision-making.
- Automated recurring reports and optimized reporting workflows using Python, Excel, and Power BI, reducing manual reporting effort by 40% and improving reporting turnaround time by 30%.
- Implemented data quality controls, validation frameworks, and reconciliation processes to improve accuracy and reliability of operational datasets and reporting systems.
- Performed data mining, defect trend analysis, and root cause investigations to identify operational issues and support process improvement initiatives across departments.
- Created and optimized complex SQL queries for data extraction, analysis, and report generation from relational databases and internal business systems.
- Designed and documented dashboard logic, reporting procedures, data transformation rules, and business workflows to ensure reporting consistency and process standardization.
- Delivered actionable business insights through dashboard reporting, trend analysis, KPI monitoring, and operational performance evaluations supporting executive-level strategic decisions.
- Supported data movement, transformation, reconciliation, and reporting activities aligned with ETL best practices to improve overall data quality and operational reporting accuracy.
- Applied NLP and machine learning techniques to analyze unstructured text data and generate actionable business insights supporting operational decision-making.

Data Analyst | Verizon, Dallas, TX*Nov 2024 – Jul 2025*

- Analyzed large-scale customer and operational datasets (100K+ records) using SQL, Python (Pandas, NumPy), and Power BI to support business reporting and performance tracking initiatives.
- Developed Power BI dashboards tracking 15+ KPIs related to network performance, customer operations, and SLA adherence, enabling data-driven prioritization and strategic planning.
- Built scalable data pipelines and automated reporting workflows using Python, Excel, and Power BI, reducing manual reporting effort by 40% and improving business decision-making speed.
- Optimized complex SQL queries to analyze and manage 100K+ customer and operational records from relational databases, reducing query execution time and improving reporting latency by 25–30%.
- Performed data cleansing, validation, and transformation using Python (Pandas) and Power Query, ensuring data accuracy and consistency across multiple operational systems.
- Designed and analyzed A/B tests and controlled experiments using hypothesis testing, p-values, and confidence intervals to evaluate business changes and support operational strategy improvements.
- Conducted trend analysis and forecasting using statistical methods to support strategic planning, resource optimization, and operational performance improvements.
- Collaborated with cross-functional teams including business, operations, and engineering teams to gather requirements and deliver data-driven analytical solutions.
- Integrated and analyzed data using AWS (S3, Redshift, Athena) and Snowflake, enabling scalable analytics and ensuring consistent, reliable datasets for reporting and business intelligence.
- Prepared detailed reports, dashboards, and data visualizations for stakeholders and leadership teams, standardizing KPI definitions and reducing discrepancies in business reporting.

Data Analyst Intern | Arcos, Columbus, OH*Mar 2024 – Oct 2024*

- Analyzed customer behavior, sales performance, and operational datasets using SQL, Python (Pandas), Excel, and Tableau to generate actionable business insights supporting strategic planning.
- Developed and maintained interactive Tableau and Excel dashboards to monitor KPIs, sales trends, and operational performance metrics for business stakeholders and leadership teams.
- Assisted in forecasting and performance analysis by comparing historical data trends with current business metrics using regression analysis and time series techniques.
- Designed ETL workflows to extract, transform, and load data from multiple business sources, improving data accuracy and consistency across operational and financial reporting systems.
- Performed competitor and market trend analysis using internal and external datasets to support strategic planning, budgeting, and resource allocation decision-making.
- Monitored daily business operations data, identified gaps and performance bottlenecks, and delivered analytical reports supporting process improvements across multiple departments.
- Collaborated with finance, operations, and customer support teams to gather reporting requirements and deliver accurate, business-aligned analytical reports and dashboards.
- Performed data quality checks, validation, and troubleshooting to improve data consistency, minimize reporting errors, and maintain reliable reporting standards.
- Coordinated with cross-functional teams to deliver reports and dashboards supporting budgeting, forecasting, and operational planning activities aligned with business growth objectives.
- Identified operational inefficiencies through trend and variance analysis, contributing to process improvements, cost optimization, and reporting workflow enhancements.

Jr. Data Analyst | Cloud Technologies, Hyderabad, India

Jul 2021 – Oct 2023

- Analyzed business and customer datasets using SQL, Python (Pandas), Excel, and Power BI to support reporting, operational decision-making, and business performance tracking.
- Developed and maintained Power BI and Tableau dashboards to track KPIs, project performance, and business metrics, improving reporting visibility for internal stakeholders.
- Wrote optimized SQL queries to extract and validate data from relational databases (MySQL, SQL Server) supporting ad-hoc business requests and scheduled analytical reports.
- Cleaned and transformed large datasets from multiple sources using Python (Pandas) and Excel, improving reporting consistency, data accuracy, and overall data reliability.
- Automated Excel reporting tasks using Pivot Tables, Power Query, and VBA Macros, reducing manual reporting time by 20% and improving team productivity.
- Performed data quality checks, validation, and troubleshooting to improve data consistency and minimize reporting errors across multiple systems and reports.
- Supported senior analysts in preparing weekly and monthly analytical reports by identifying trends, patterns, and performance insights from large, structured datasets.
- Collaborated with cross-functional teams to gather reporting requirements and deliver data-driven solutions aligned with business needs and operational objectives.
- Assisted in ETL-related activities including data extraction, transformation, and post-migration validation, improving data accuracy and system reliability.

EDUCATION

Master of Science in Computer Science

2024 – 2025

Auburn University, Montgomery, AL

Bachelor of Technology in Computer Science

2018 – 2022

JNTUH University, Hyderabad, India

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Business Analytics with Excel – Simplilearn, 2025
- SQL for Data Analysis – Simplilearn, 2025
