

SRI SINDHURA DEVINENI

Data Analyst | Business Intelligence | Data-Driven Storytelling | ETL Pipelines & Automation
(779) 276-7467 · srisindhuradevineni@gmail.com · [linkedin.com/in/sindhura-devineni](https://www.linkedin.com/in/sindhura-devineni) · github.com/sindhura12490

PROFESSIONAL SUMMARY

Results-driven Data Analyst with **4 years of experience** delivering healthcare analytics and turning raw data into business decisions across **pharma, healthcare IT, consulting, and academic environments**. Skilled in **SQL, Power BI, Tableau, Python, and ETL pipelines** for building dashboards, automating reporting, enforcing data governance and data quality, and driving KPI visibility for executive and cross-functional stakeholders. Experienced gathering requirements (**BRD/FRD**), leading **UAT**, and partnering with **Agile teams** to translate business questions into data-driven answers. Adds differentiated value through **IEEE-published research in deep learning forecasting, cutting manual reporting by up to 40%**.

TECHNICAL SKILLS

Analytics & BI: SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy), Tableau, Power BI (DAX), R, SAS, Snowflake, Healthcare Analytics, Data Visualization, KPI Frameworks, Trend Analysis, Ad-Hoc Analysis, Google Analytics, Google Suite

Data Engineering: ETL Pipelines, Data Modeling, Data Warehousing, Data Cleaning, Data Governance, Data Validation, PySpark, Data Quality, Automated Reporting, Survey Analysis, CRM Data Analytics

Machine Learning: Scikit-learn, XGBoost, LSTM, Predictive Modeling, Anomaly Detection, A/B Testing, Hypothesis Testing, Time-Series Forecasting

Business Analysis: Requirements Gathering, BRD/FRD, UAT, Stakeholder Reporting, User Stories, Process Mapping, Cross-Functional Collaboration, Agile/Scrum

Tools & Platforms: Excel (VBA, Pivot Tables), JIRA, Confluence, Databricks, Azure, AWS, BigQuery, Git/GitHub, Jupyter Notebook, MLflow

PROFESSIONAL EXPERIENCE

Data Analyst · LTIMindtree

Aug 2024 – Present

SQL · Python · Power BI (DAX) · Tableau · Snowflake · AWS · ETL · Agile/Scrum · JIRA · Confluence

- Analyzed **5M+ healthcare claims records** using SQL and Python to surface cost trends, utilization patterns, and billing anomalies, supporting decision-making across **3 business units**.
- Designed and maintained **10+ Power BI dashboards** with DAX measures and drill-through capabilities for **20+ stakeholders**, reducing ad-hoc reporting requests by **35%**.
- Built automated ETL pipelines consolidating data from **4+ source systems**, cutting data preparation time from **10 hrs to 4 hrs/week** and a **60% reduction in manual processing**.
- Conducted **A/B testing and hypothesis testing** to evaluate process changes, surfacing insights that directly informed **3 strategic initiatives**.
- Gathered requirements via **BRD/FRD sessions** with business stakeholders; led **UAT cycles** to validate dashboards and reporting outputs across **Agile sprints**.
- Enforced **HIPAA-compliant data governance** standards across all workflows and maintained **zero compliance incidents** throughout project lifecycle.

Data Graduate Assistant · Northern Illinois University

Aug 2023 – Mar 2024

SQL · Python · R · Tableau · Excel · Matplotlib · Jupyter Notebook · Hypothesis Testing

- Gathered requirements from faculty and leadership stakeholders to define analytics scope, KPIs, and reporting deliverables across **3 active research projects**.
- Built **Tableau and SQL-driven BI dashboards** tracking university leadership KPIs, supporting data-informed academic planning and resource allocation decisions.
- Streamlined ETL and data prep workflows using Python and R, applying **hypothesis testing and cross-validation**, reducing manual processing time by **30%** and improving reporting reliability.
- Mentored **50+ graduate students** in dashboard design and data storytelling; delivered workshops on SQL and Python for data analysis.
- Enforced database validation rules across **4 research databases**, eliminating **~18% duplicate records** and ensuring data integrity for published research outputs.

Data Analyst · Emertech Innovations

Aug 2021 – Jul 2023

SQL (PostgreSQL) · Python (Pandas, NumPy) · Power BI (DAX) · Tableau · Excel · ICD-10 · EDI 837/835

- Analyzed **3M+ pharma & claims records** identifying cost trends and billing anomalies, supporting **actionable insights for clinical** and finance leadership.

- Built **12+ DAX-driven Power BI dashboards** for **25+ stakeholders**; automated ETL (EDI 837/835) reducing data prep time by **60%**.
- Defined **8 new KPIs** with analytics and clinical teams; monthly scorecards directly informed **3 strategic decisions**.

PROJECTS

Healthcare Claims Analytics Dashboard | *SQL · Python (Pandas) · Power BI · ICD-10*

- End-to-end pipeline on **500K+ claims records**; detected **\$180K in anomalous billing** via IQR + Z-score analysis on ICD-10 coded data.

Climate Change & Agriculture Analysis | *Tableau · Python · Geographic & Time-Series Analysis*

- Built interactive Tableau dashboards with heat maps and geographic & time-series analysis for sustainability reporting across multiple regions.

Customer Churn Prediction | *Python · XGBoost · Scikit-learn · SQL*

- XGBoost + Random Forest ensemble: **82% accuracy, 0.87 AUC-ROC** on 70K+ customers; SHAP analysis identified top 5 churn drivers.

PUBLICATION

LSTM Based Stock Price Prediction on Daily Charts.

- Proposed and validated a multi-layer **LSTM deep learning architecture** for stock price forecasting using OHLCV data + fundamental ratios (P/B, P/S, P/E) for NSE large-cap equities, achieving **87.86% accuracy**.
- Demonstrated improved forecasting accuracy over price-only baselines; evaluated using **RMSE, MAE, and MAPE** across Reliance, TCS, and ITC stocks.

EDUCATION

M.S. Management Information Systems · **Northern Illinois University, DeKalb IL** *Aug 2023 – May 2025*

Coursework: Machine Learning · Statistical Analysis · Database Systems · Data Visualization · Big Data Analytics · Business Intelligence · MIS Strategy
