Summary:

- Certified Quality Assurance Tester having 15+ years' of experience in different SDLCs including Waterfall and Agile.
- 12 years' experience as QA and UAT team lead coordinating, monitoring and leading test efforts between onshore and offshore resources to ensure timely completion of activities.
- Oversee all aspects of quality assurance including establishing metrics, applying industry best practices, and developing new tools and processes to ensure quality goals are met.
- Experience of being involved in all agile ceremonies, working with Product Owners, architecture team and development team to ensure QA deliverables are met.
- Experience in working as key point of contact for all QA and UAT aspects of releases, providing QA services and coordinating QA resources internally and externally.
- Experience in managing and guiding the offshore team for test design, definition of done and execution.
- Experience building test automation framework using Selenium WebDriver, TestNG, Cucumber, Maven etc
- Extensive knowledge and experience of Tosca, Selenium IDE, Selenium RC, Selenium Web driver, Selenium Grid using Java, for developing automation scripts in Eclipse IDE.
- Consistent Performer, creative & zealous self-starter with excellent communication skills and professional skills.

Education:

- Bachelors Of Engineering

Certifications:

- ISTQB - International Software Testing Qualifications Board
- ISTQB - Agile Tester Foundation Extension
- Diploma in Software Testing
- CSI – Computer Society of India – Software Testing
- Tosca Automation Specialist (AS1 and AS2)

Experience:

Client: Southern Company, Naperville. IL - 60563

04/19/2021 – Till Date

Domain: Gas and Electric Utility

Role: QA/UAT Lead

Responsibilities:

- Participated in Requirements/Product configurations sessions with vendors, business stakeholders and business system analysts to understand product capabilities and business requirements.
- Created UAT Test Plan with Scope, Objective, Entry/Exit Criteria, Roles & Responsibilities, testing calendar etc
- Led Test Environment and Data readiness in QA, UAT, vendor and integrated systems to facilitate production-like testing for all testing cycles.
- Managed onshore/offshore QA and UAT Teams, their allocation, testing activities etc
- Scheduled Test Case walk through's with business to demonstrate coverage, traceability back to Business requirements, understanding Business Priority/Severity of flows, test cases.
- Provided walkthrough of Defect Management Process from logging of defects, informing Business and getting Priority, hosting Defect Triage Calls to follow-ups to ensure timely delivery of defects, validating and closing them in ALM.
- Built dashboards in ALM to capture testing progress and published metrics on a daily basis.
- Coordinated formal review and approvals of all user acceptance testing deliverables with business and all the involved stakeholders.

Tools: SQL Server Management Studio, Oracle, Microsoft Test Manager 2013, TFS, HP ALM, Tosca, Mobile (iOS and Android), SharePoint, MS Visio, MS Office, Power BI reporting.

Client: SWBC, San Antonio. TX-78219

06/17/2014 – 04/16/2021

Domain: Auto Insurance & Mortgage

Role: QA Lead

Responsibilities:

- Participated in the user story walk through to discuss the requirements, estimates and the team capacity.
- Involved in sprint planning meeting and provided milestone for each story involved in a sprint.
- Attended sprint call every morning to provide updates and list of impediments if any.
- Extensively involved in providing testing estimates, updating the tasks for each story and its status from time to time in TFS tool.
- Daily coordination with offshore developers and testers for everyday activities.
- Updated the defect mapping in TFS depending in what sprint they were fixed.
- Created queries in TFS to identify defects in each sprint and to generate different reports.
- Upon completion of each sprint, worked with Business Analyst and Product Owners to confirm the results and to provide the sign off.
- Involved in scrum of scrum meetings to represent the project and its sprint status.
- Involved in identifying the test cases from each sprint to update the automation regression suite.
- Participated in agile retrospective meetings and provided feedback at the end of each iteration.
- Involved in handling daily production questions and requests.
- Involved in creating and validating user guides and maintaining the same in SharePoint site.

Tools: AS400, SQL Server Management Studio, Microsoft Test Manager 2013, TFS, Visual Studio, DQC, HP ALM, Mobile (iOS and Android), SharePoint, MS Visio, MS Office, Postman (Version 4.9.3)

Client: Walgreens Co., Deerfield, IL-60065

08/03/2010 – 02/01/2014

Domain: Pharmaceutical

Role: QA Lead**Responsibilities:**

- Led a testing team of size 11(6 onsite and 5 offshore) to test the eRx (electronic prescription) project.
- Project resource allocation and continuous performance assessment of team members.
- Created test plans, test approach document and traceability matrix.
- Provided testing estimation, planning execution, status reporting, metrics and evaluating the daily deliverables.
- Participated in sign off meetings for the projects and the enhancements with the business and QA team.
- Assigning test scripts, change requests and corresponding responsibilities to team members.
- Automation feasibility analysis of the application and test cases, hiring/onboarding resources, resource allocation, providing testing estimates etc
- Involved in design and implementation of automation framework for smoke and regression test suites using Selenium Web Driver and TestNG
- Monitor daily automation tests, troubleshoot test runs, investigate test results and baseline tests for next regression cycle.
- Conducted defect meetings on a daily basis and work with BSA (business system analysts) closely to resolve the issues and to clarify the business requirements.
- Attended go-no-go meeting for each enhancement/change request and new project.
- Created New/Enhanced Functionality Handbook to be used by end-users in production and maintaining them in SharePoint.
- Used TestNG to generate test execution result in HTML format.
- Generated project reports, defect reports and requirement coverage reports from ALM. Created graphical representations of each report for meetings and presentations.

Tools: HP ALM, JIRA, iPad, Mobile, SQL Server, POS, , MS Office, Mobile (iOS and Android), Selenium WebDriver, Firebug, TestNG, Eclipse

Client: Citibank

02/01/2010 – 04/30/2010

Domain: Finance (Funds Transfer)

Role: Sr. UAT Analyst/Tester

Responsibilities:

- Extensively involved in functional testing of web based and client-server applications and environment.
- Involved in preparing the Requirement Traceability Matrix (RTM) to accommodate functional and business requirements to identify the coverage gaps.
- Developed positive and negative test cases based on the functional requirements.
- Created scenarios involving multiple countries in the funds transaction without having any direct relationship (funds entities) between them.
- Validated high rate of transactions per seconds for banking deposits.
- Validated the bill pay utility and various transactions within and outside of the banking account.
- Validated some secured transactions as part of security testing.
- Performed data base testing to confirm the banking account transactions and various activities.
- Uploading test scripts in HP QC and mapping them to the corresponding requirements to have the complete test coverage.
- Executed test scripts on various funds transfer transactions considering different currencies and exchange rates.
- Worked with the team to determine automation feasibility of the test cases and providing efforts required.
- Involved in design and implementation of automation framework for regression test cases using Selenium Web Driver and TestNG.
- Testing Security & Authorization objects like Analytic privilege, System privilege, SQL privilege & Package privilege in SAP HANA
- Drafting test scripts based on test conditions to cover all potential positive and negative flows and peer-reviewing UAT test scripts for the Driver Based Performance Management(BPC)
- Validating UI and data for all Reports, Input Forms in the DBPM to conform to Business requirements

- Monitored, retested defects and changed the defect status accordingly in HP QC.
- Provided execution status report on daily basis.

Testing Methodology: Functional Testing, User Acceptance Testing, Regression Testing

Tools: HP Quality Center (QC) 9.0, MS SharePoint, TOAD, MS Office, Selenium WebDriver, Firebug, TestNG, Eclipse, SAP BPC, SAP HANA, SAP SuccessFactors

Pearson Education Inc.

11/05/2007 – 01/15/2010

Domain: E-Learning/LMS

Role: Testing Engineer

Responsibilities:

- Reviewed Functional Requirements and wrote test cases with pre-conditions wherever applicable.
- Deployed the build from FTP on server as well as on client machines.
- Extensively involved in Smoke testing, System Integration Testing, Regression testing and Compatibility testing.
- Executed test scripts, updated the actual results along with the screenshots in HP QC.
- Performed backend data validation using SQL queries.
- Used Rational Clear Quest (CQ) and Quality Center (QC) for logging defects and issues.
- Co-coordinated with the onsite team for resolution of queries and routine follow-up for updates on outstanding defects.
- Attended the conference calls with the client regarding the testing status and updates in functional requirements.
- Involved in training new team member on different functionalities of the application.
- Wrote Test Scripts using Quick Test Pro and WinRunner for automation of regression testing and verified application's expected behaviour at different stages by using various check point options.
- Involved in preparing execution summary report and defect report.

Tools: Quality Center 8.2 (QC), ClearQuest (CQ) 7.0, Test Director 8.0, Bugzilla, SQL Server 2000/2005, MS Office, SQL Server 2000/2005

Raymond UCO Denim Pvt. Ltd.

10/25/2005 – 02/28/2007

Domain: Retail

Role: Quality Assurance Analyst

Responsibilities:

- Extensively involved in understanding the functionality & requirement of the software used for determining the strength of apparel.
- Involved in developing test cases for the Functional testing and Regression testing.
- Involved in modification and updating of the test cases as per the changed requirements.
- Executed GUI and functional test cases.
- Used Test Director for logging the defects and issues.
- Retesting of the fixed defects and verified the actual results against the expected.
- Prepared a report in excel for the comparison of actual result with expected result for different types of apparel.
- Provided and sent weekly status reports to the lead.

Environment: Java 1.5 J2EE, SQL Server 2000/2005, Test Director, MS Office.
