

DIVYA ALIGETI

Full Stack .NET Developer

aligeti.divya1997@gmail.com | www.linkedin.com/in/aligeti-divya | <https://github.com/AligetiDivya> | +1 (806)451-7251 | Charlotte, NC

SUMMARY

- 3+ years of extensive experience in the Software field, with a strong focus on .NET technologies including **C#, .NET Core, ASP.NET MVC, and ASP.NET Web API**.
- Expertise in **Microservices** architecture using **.NET Core**, RESTful services, and message brokers like **Azure Service Bus**.
- Proficient in using orchestration tools like **Docker** and **Kubernetes** for deploying applications.
- Strong understanding of UI/UX design and development with experience in front-end frameworks such as **Angular, React, and Flutter**. I am skilled in web technologies like **HTML5, CSS3, JavaScript**.
- Experienced in **RDBMS** with a solid background in **SQL Server, Azure SQL**. Proficient in writing optimized SQL queries, stored procedures, and utilizing ORM tools like **Entity Framework** and **LINQ**.
- Deep knowledge of design patterns such as MVC, Singleton, Repository, and Unit of Work, and expertise in applying them to develop scalable and maintainable applications.
- Proven track record in setting up CI/CD pipelines using Jenkins, Azure DevOps, and GitHub Actions. Experienced in version control using **Git**.
- Involved in all phases of the Software Development Life Cycle (SDLC), utilizing **Agile** and **Scrum** methodologies to deliver high-quality software efficiently.

TECHNICAL EXPERIENCE

- **Programming Languages:** C#, .NET, JavaScript, Python, VB.NET.
- **Frameworks and Libraries:** ASP.NET Core, Entity Framework, ASP.NET MVC, Web API, Blazor, Web forms, Flutter.
- **Database Technologies:** SQL Server, LINQ, Oracle, PostgreSQL, MySQL, NoSQL.
- **Frontend Technologies:** HTML5, CSS3, JavaScript
- **Testing:** Unit Testing (NUnit, MSTest, xUnit).
- **Version Control Systems:** Git
- **IDE and Development Tools:** Visual Studio, Visual Studio Code, Jira, Postman.
- **Operating systems:** Windows, Linux, Unix, Mac.
- **Cloud Computing:** Microsoft Azure services (Azure Functions, Azure SQL Database, Azure App Service).
- **DevOps Tools:** Git, Jenkins, Docker, Azure DevOps

PROFESSIONAL EXPERIENCE

Full-time: Keyper Systems- Assa Abloy (Remote) – Charlotte, NC
Software Developer

Nov 2024 – Present

Technologies: C#, .NET Core, ASP.NET Web API, Flutter, SQL Server, Azure, Entity Framework, Git, Agile

- Developed and delivered functionality for software platform using **C#, .NET Core, MVC and Web API** covering both **desktop and web-based applications**.
- Designed and implemented **Microservices-based architecture** for scalable solutions.
- Created design specifications and translated functional requirements into technical implementation.
- Created and optimized database solutions using **SQL Server** and **Entity Framework**.
- Worked on Flutter-based **cross-platform mobile and web applications**, ensuring seamless user experience.
- Ensured to build the best possible performance, quality, and responsiveness of applications.
- Contributed the technical knowledge with influencing technology and architectural approaches, helping to shape our solutions for the future.
- Engaged in continuous performance optimization, identifying and resolving bottlenecks.
- Provided **high-level product technical support**.
- Conducted extensive unit testing and debugging to ensure application stability and security compliance.
- Utilized **Azure cloud services** for scalable and efficient application deployment.
- Worked with **JIRA** for **issue tracking and lifecycle management**.
- Leveraged Git for version control and Agile methodologies for efficient project management.

Full-time: - Hyundai Motor India Engineering, Hyderabad, India
Software Engineer

July 2019 – July 2022

Technologies: C#, .NET Core, Azure, SQL Server, CAPL, Vector CANoe, Lauterbach Trace32

- Developed a **configuration validation tool in C#** for ECU platform verification and automation of AUTOSAR

stack checks across multiple processors (Infineon, Renesas, SPC).

- Worked on **testing and integration of communication modules (CAN, CAN-FD, UDS, NM/PN)** for AUTOSAR platforms using scripting tools and CAPL automation.
- Created **custom tooling and utilities in .NET** to streamline functional testing and data verification.
- Developed internal applications to **automate acceptance testing** for ECU configuration and integration, resulting in **significant time savings** and reduced manual errors.
- Involved in defining **test frameworks**, writing test specifications, and building reusable libraries using C# and .NET for automotive diagnostics and communication layers.
- Collaborated with global teams using Jira, PTC Integrity, and Confluence for agile tracking and requirement validation.
- Contributed to validation and debugging of system software using **Trace32 Debugger** and **Azure DevOps** for version control and task management.

EDUCATION

Master of Science, Computer Science

Texas Tech University – Lubbock, TX

August 2022 – May 2024

- Courses: Intelligent Systems, Software Management & Architecture, Network Security, Advanced Operating System, ParallelProcessing, Software Project Management.
