

SASHIDHAR CHINTHALA

Cybersecurity Professional

PROFESSIONAL SUMMARY

Cybersecurity professional with over 3 years of experience specializing in incident response, network security, and threat hunting. Demonstrates proficiency in using SIEM tools such as Splunk and QRadar, with a strong focus on enhancing system security and data protection. Skilled in Java, Python, and SQL, delivering innovative solutions for complex security challenges while ensuring compliance with industry standards.

EMPLOYMENT HISTORY

RESEARCH GRADUATE, SIEM AND THREAT INTELLIGENCE

University of the Cumberland

May 2022 - Aug 2024
Williamsburg, KY, USA

- ◆ Conduct research on SIEM tech to mitigate threats, enhancing data security for global firms.
- ◆ Collaborate with teams to analyze data, ensuring comprehensive threat intelligence.
- ◆ Serve as SME for GBAM tools, aiding global monitoring in banking implementations.
- ◆ Utilize SIEM tools for log monitoring, ensuring data protection and system reliability.
- ◆ Deploy IoT solutions across industries, ensuring secure communication and data integrity.
- ◆ Conducted extensive research on SIEM technologies, identifying security vulnerabilities and enhancing data protection for multinational clients.
- ◆ Implemented compliance protocols aligned with ISO standards, achieving operational safety and regulatory adherence across diverse sectors.
- ◆ Partnered with cross-functional teams to analyze data, enrich threat intelligence, and improve response strategies to security incidents.
- ◆ Deployed advanced SIEM tools, optimizing log monitoring processes, significantly reducing false alarms, and improving system reliability.
- ◆ Fostered a collaborative knowledge-sharing environment, enhancing team capabilities in IoT security best practices and threat mitigation.
- ◆ Conducted in-depth research on SIEM technologies, leading to enhanced data protection measures for multinational clients and improved threat mitigation.

BUSINESS ANALYST

Global Systems IT Consulting

Nov 2016 - Nov 2017
Dallas, USA

- ◆ Enhanced incident response, boosting security with improved log analysis processes.
- ◆ Led SDLC projects, achieving timely delivery and improved team coordination.
- ◆ Integrated Dynatrace, optimizing monitoring for banking applications.
- ◆ Managed IT projects, ensuring completion within budget and deadlines.
- ◆ Coordinated cross-functional teams for seamless system upgrades and installations.
- ◆ Spearheaded the integration of advanced monitoring tools, enhancing system performance metrics and streamlining incident response.
- ◆ Fostered strong partnerships with cross-functional teams, driving effective project execution and elevating stakeholder satisfaction.
- ◆ Conducted thorough analyses of system performance, leading to marked gains in efficiency and reduced operational downtime.
- ◆ Demonstrated strong interpersonal skills by mentoring junior analysts and cultivating a collaborative team environment conducive to growth.
- ◆ Analyzed business requirements to enhance system functionality, driving measurable improvements in operational efficiency.
- ◆ Developed data visualization tools for stakeholder presentations, simplifying complex data insights and improving decision-making processes.

CYBERSECURITY CONSULTANT

Soft Sales

Apr 2012 - Aug 2014
Hyderabad, India

- ♦ Led team in hardware projects, ensuring timely completion and adherence to timelines.
- ♦ Implemented security protocols, enhancing data protection and compliance.
- ♦ Conducted vulnerability tests, reducing security incidents significantly.
- ♦ Connected OT systems to IIoT, improving decision-making and maintenance.
- ♦ Collaborated cross-functionally, enhancing incident response and analysis.
- ♦ Enhanced system security by developing targeted cybersecurity strategies, significantly reducing security incidents, and bolstering client trust.
- ♦ Conducted thorough vulnerability testing and risk analyses, identifying potential threats and implementing improved data protection measures.
- ♦ Leveraged Burp Suite Repeater for in-depth analysis of vulnerabilities, facilitating proactive solutions that strengthened overall system integrity.
- ♦ Partnered with cross-functional teams to streamline incident response processes, leading to notable improvements in log analysis and threat mitigation.
- ♦ Fostered a culture of security awareness through training sessions, empowering staff to identify and report potential security issues proactively.
- ♦ Enhanced incident response protocols, leading to a 30% reduction in response times and improved system resilience.

EDUCATION

PHD IN INFORMATION TECHNOLOGY SYSTEMS, CYBERSECURITY

University of the Cumberland

Jan 2018 - Aug 2024

Williamsburg, KY, United States

Dissertation: Analyzing the Effectiveness of SIEM Tools in Threat Mitigation: A Qualitative Study in Cybersecurity

MASTER OF BUSINESS ADMINISTRATION IN COMPUTER SCIENCE

San Francisco Bay University

Jan 2015 - Aug 2016

Fremont, United States

Thesis: Enhancing Business Administration in Information Technology

PUBLICATION

Analyzing the Effectiveness of SIEM Tools in Threat

Mitigation: A Qualitative Study in Cybersecurity

This qualitative study addresses security information and event management (SIEM) technology used in the digital age, where multinational corporations prioritize data and asset protection. As part of cybersecurity architecture, SIEM technologies gather, aggregate, and analyze data from servers, devices, and software applications. Their main job is identifying and stopping threats before they become major security breaches.

INTERNSHIPS

INFORMATION SECURITY SYSTEMS INTERN

Feb 2025 - Present

Chnaging The Present

- ◆ Conduct vulnerability assessments, enhancing web security, and safeguarding data integrity.
- ◆ Manage security tools, preventing unauthorized access and ensuring robust network protection.
- ◆ Utilize SIEM platforms to analyze logs, identify threats, and improve incident response.
- ◆ Develop Python scripts for automation, streamlining security processes, and boosting efficiency.
- ◆ Support Microsoft 365 security settings, enforcing data protection and access policies.
- ◆ Implemented best practices in application performance monitoring, driving ongoing enhancements and optimizing system efficiency.
- ◆ Conducted thorough data analysis on system logs, identifying patterns to mitigate security risks and enhance operational workflows proactively.
- ◆ Developed Python scripts to automate security processes, significantly improving incident response time and streamlining report generation.
- ◆ Configured and managed security tools, including firewalls, to detect and prevent unauthorized access, fortifying the organization's cybersecurity posture.
- ◆ Provided technical support for end-users, diagnosing and resolving desktop and network security issues to ensure system stability.
- ◆ Conducted vulnerability assessments, enhancing web security and significantly safeguarding data integrity across platforms.
