

EDMUND ROBERTS

Huntingtown, MD 20639 • 443-985-2756 • Edmundooberts17@gmail.com

PROFESSIONAL SUMMARY

Data-driven professional with a Master's in Bioinformatics and experience working with scientific, clinical, and educational datasets. Skilled in Python, R, SQL, and data visualization tools to clean, analyze, and communicate insights. Adept at reporting, stakeholder communication, and transforming complex data into actionable findings. Seeking an entry-level data analyst role in healthcare, biotech, or research-driven environments.

EDUCATION

M.S. Bioinformatics, University of Maryland Global Campus, 2025

B.S. Biology, Oakwood University, 2020

Google Data Analytics Professional Certificate, Coursera/Google, 2025

TECHNICAL SKILLS

Languages & Tools: Python (Pandas, NumPy), R (tidyverse), SQL, Tableau, Power BI, Excel (PivotTables, VLOOKUP), GitHub

Data Skills: Data cleaning, EDA, dashboarding, reporting, KPI tracking, documentation, statistical analysis

Domain Knowledge: Healthcare data, genomics, molecular biology, lab workflows

EXPERIENCE

High School Chemistry Teacher — Calvert High School, Prince Frederick, MD (Aug 2024 – Present)

- Collected, analyzed, and reported student performance data to inform instructional decisions and intervention strategies.
- Designed assessments, tracked outcomes, and generated analytical progress reports for administrators and parents.
- Delivered complex scientific concepts through data visualization, structured explanations, and curriculum mapping.
- Developed lab-based learning modules, managed safety compliance, and documented lab activities.
- Provided tutoring and academic support, utilizing differentiated instruction and data-driven feedback.

NIH NIA CARD — Lab Technician, Bethesda, MD (Dec 2021 – Apr 2023)

- Processed clinical specimens and maintained accurate sample metadata within LIMS systems, ensuring data integrity and traceability.
- Performed Oxford Nanopore sequencing and associated QC, generating high-dimensional genomic datasets.
- Followed GCLP, BSL-2, and biospecimen handling protocols for compliant data collection and documentation.
- Assisted with SOP development, freezer audits, and biorepository record management to support clinical research operations.

Bioinformatics App Developer (Capstone) — UMGC, Remote (Jan 2025 – May 2025)

- Built a DNA classification pipeline using Kraken2 and Bracken to predict microbial spoilage in meat samples.
- Used Python and R for data preprocessing, abundance profiling, visualization, and model interpretation.
- Applied Google Data Analytics methodologies for reproducible data cleaning, analysis, and reporting.
- Managed code using Git/GitHub and developed a prototype UI for non-technical stakeholders.

Clinical Research Associate — Curative, Washington, DC (Jul 2020 – Sep 2021)

- Performed PCR-based testing and RNA extraction for large-scale COVID-19 diagnostics.
- Supported automation workflows (HAMILTON STAR), improving throughput and data accuracy.
- Collaborated with multi-disciplinary teams to ensure compliance, documentation, and reporting standards.

PROJECTS

- COVID Data Analysis Dashboard: Cleaned CDC datasets using Python, aggregated metrics, and built Tableau dashboards to visualize case trends and demographic KPIs.
- Medical Cost Analysis (Kaggle): Explored healthcare cost drivers using Python (Pandas, Seaborn), produced visualizations, and summarized findings for non-technical audiences.

CERTIFICATIONS

Google Data Analytics Certificate (2025) — Tableau, SQL, R, Excel, Data Cleaning, EDA

ADDITIONAL INFORMATION

Authorized to work in the U.S. | Strong communication & analytical reporting skills
