

Summary

- **Over 3 years** of experience as a **QA Automation Engineer- SDET**, extensive worked on **Manual, Automation, API, and Web service** applications, experience in various domain such as Web development using **HTML, CSS, and JavaScript**.
- Expertise in Manual & Automation Testing of Client/Server, Mobile, Web-based Apps by **Selenium Web Driver, Grid & IDE**.
- Experience in writing good quality object oriented code for testing purpose, following **Java** coding standards.
- Excellent knowledge & implementation skills in complete Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle (**STLC**).
- Expertise in business requirement specifications, design documentation & converting min to Test scenarios.
- Experience in **Waterfall & Agile** projects, worked very closely with products owners, and attended different Ceremonies like **Sprint Planning Meeting, Scrum, Backlog grooming, Sprint review & Retrospective**.
- Performed Database/Backed Testing by Writing Complex **SQL**, Queries for data validation and integrity, good writing complex joins using **MySQL** relation Database.
- Experience in **Java**, Development by applying different concepts like **OOPs, Collections, String & Exception Handling**.
- Excellent knowledge about **Agile** and **waterfall** methodologies and **Test-Driven Development**.
- Experience in installations and using version control such as **GIT** and **GitHub**.

Skills

Java	HTML	CSS	JavaScript	SQL
MySQL	SQL Server	MongoDB	Selenium WebDriver	Selenium Grid
TestNG	JUnit	Cucumber	TestRail	Lambda Test
BrowserStack	Postman	Jenkins	Maven	Gradle
GitHub	GitLab	Bitbucket	Eclipse	IntelliJ IDEA
SDLC	Agile(Scrum/Waterfall)	Windows	Mac OS	Linux/Unix

Education

- **B. S. in Computer Forensics & Digital Investigations - Champlain College, Remote** | Dec 2021
- **Summer Immersion Program: Girls Who Code.** | Aug 2017
- **Certified SAE 5 Practitioner.** | Feb 2023
- **Udemy Course - Selenium Web Driver with Java by Rahul Shetty.** | May 2023
- **TestPro IO - QA Automation Certificate.** | Jul 2023

Experience

SumatoSoft, Remote, USA

QA Software Engineer

Responsibilities:

| Jun 2021 to Present

- Involve in various meeting with Business Analyst and developers.
- Conduct Functional Testing Regression Testing using Selenium.
- Utilise Maven for Dependency management for Test Execution and crested Profile of grouped test cases to run Sanity and Regression Testing.
- Implement test cases & methods for regression testing by TestNG annotation like groups, parameters & data provider.
- Perform Cross Browser & parallel Testing on Chrome, Firefox and Safari Using TestNg on Selenium Grid.
- Involves with developers in Development of UI modules using HTML, CSS and JavaScript.
- Share Daily Reports with All team Members, Team Leads and Managers.
- Develop and Automate Test cases execute this test Scripts from lab and logged defects in JIRA/ALM.
