

Gangadhar Tadikamalla

Senior Java Developer

Email: tadikamallagangadhar@gmail.com | Phone: +1 270-978-3197

GitHub: github.com/gtadikamalla

Date of Birth: 16th February 1998

Professional Summary

Dynamic and detail-oriented Full Stack Developer with 4+ years of experience in building scalable, robust, and efficient web applications. Proficient in full-stack development, API design, cloud-native application development, and AI/ML technologies. Strong knowledge of software design patterns, containerization, and engineering best practices. Adept at working in agile environments, collaborating with multi-regional teams, and delivering high-quality solutions that meet client requirements. Passionate about learning new technologies and solving complex technical challenges.

Technical Skills

Programming Languages: Python, Java, C++, SQL, JavaScript, TypeScript, Node.js

Frontend Development: React, Angular, HTML5, CSS3, Storybook, JSP, JSF

Backend Development: Spring Boot, Flask, Django, J2EE, REST API Integration, SOAP, Servlets

Cloud Platforms & Tools: AWS (EC2, S3, Lambda, CloudWatch), Azure, OpenShift

Database Management: MySQL, Oracle, Redis, MongoDB, DynamoDB, JPA

DevOps & CI/CD: Jenkins, GitLab CI/CD, Docker, Kubernetes, Terraform

Caching Frameworks: Oracle Coherence, GridGain, Redis

Testing Frameworks: JUnit, TestNG, Karate, Cucumber

Core Competencies: Application Development, Automation, Solution Design, Data Management, Analytical Thinking, Collaboration

Work Experience

Full Stack Developer

Saksoft IT Limited

Client: TransUnion Credit Report Agency

Duration: July 2022 – July 2023

- Designed scalable backend systems using Python, Java, Node.js, and GraphQL APIs.

- Enhanced frontend user experiences with React, TypeScript, and D3.js.
- Implemented AWS services like EC2, S3, and Lambda for cloud-based solutions.
- Participated in Agile workflows and contributed to daily stand-ups, sprint planning, and retrospectives.
- Resolved critical application issues, ensuring system reliability and availability.

Software Developer

Cognizant Technology Solutions

Client: SBI General Insurance

Duration: November 2019 – June 2022

- Built web applications with Angular, Spring Boot, and PostgreSQL, delivering high-performance solutions.
- Developed RESTful APIs and integrated third-party services to optimize workflows.
- Created containerized microservices using Docker and Kubernetes for seamless deployments.
- Mentored junior developers in Agile practices and code quality standards.

Intern

MRFP Training Project, Cognizant

Duration: November 2019 – March 2020

- Assisted in building scalable backend applications using Java and Python.
- Designed and implemented APIs to streamline communication between components.
- Conducted end-to-end testing and participated in the deployment process on cloud platforms.

Education

Master of Science in Information Systems

Murray State University, Murray, KY, USA

Graduation: December 2024

Bachelor of Technology in Information Technology

Sri Venkateswara College of Engineering and Technology

Graduation: 2019

Certifications

- AWS Machine Learning – Amazon (2024)
 - AWS Natural Language Processing – Amazon (2024)
 - Spring MVC and Spring Boot – Cognizant Certification (2020)
 - MySQL - Cognizant Certification (2020)
 - Python Certification – Coursera (2019)
-

Key Projects

Cloud-Native Application for Credit Reporting

- Developed a credit reporting system for TransUnion using Node.js, React, and AWS.
- Built containerized applications deployed on Kubernetes for high availability.
- Designed database schema to ensure scalability and reliability under heavy traffic.

Insurance Management System

- Designed an insurance claim tracking application using Angular and Spring Boot.
- Integrated third-party APIs for payment processing and claim validation.
- Enhanced the performance of backend queries by optimizing indexes and schema.

AI-Driven Predictive Analysis Tool

- Developed a predictive analysis tool leveraging Python and AWS services for data processing.
 - Integrated machine learning models to deliver real-time insights and drive business efficiencies.
 - Ensured production-readiness by automating testing frameworks and monitoring systems.
-

Roles & Responsibilities

- Codes solutions and unit tests to deliver requirements and user stories per defined acceptance criteria.
- Designs, develops, and modifies architecture components, application interfaces, and solution enablers while maintaining principal architecture integrity.

- Mentors other software engineers and coaches teams on Continuous Integration and Continuous Development (CI/CD) practices.
 - Executes story refinement, requirement definition, and work estimation for delivery lifecycles.
 - Performs spikes/proofs of concept to mitigate risks or implement new ideas.
 - Automates manual release activities and designs automated test suites (integration, regression, performance).
 - Builds scalable backend systems and high-performance microservices.
-

Preferred Knowledge and Skills

Required Knowledge

- **Caching Expertise:** Oracle Coherence (patterns, producer-consumer setup, performance tuning), GridGain, Redis.
- **Web Security:** HTTPS/SSL basics, certificate handling (3-way handshake, wildcard vs single domain, key generation to implementation).
- **Frontend Development:** HTML5, CSS, frontend JavaScript frameworks (React, Vue), responsive design.
- **API Integration:** Writing code for internal and 3rd-party APIs.
- **Browser Support:** Expertise in frontend testing frameworks, developer tools, and state management frameworks (Redux, Flux).
- **CMS & Legacy Support:** WordPress, SharePoint design experience.
- **Cloud Integration:** Building scalable cloud infrastructure, mockups for solutions.

Desired Knowledge

- Basic SQL and relational database knowledge.
- Experience creating mockups for solutions.
- Ability to evolve system architecture for efficiency.
- Familiarity with scalable application design principles.

Skills and Abilities

- Proficiency with development tools (IDEs, version control, package managers).

- Strong knowledge of full systems (frontend, backend, database, cloud).
- Expertise in reusable components and lifecycle management in frontend contexts.
- Understanding of RESTful API and Controller-Service-Repository design patterns.
- Excellent problem-solving and team collaboration skills.
- Willingness to learn and adapt to new technologies.
