

GEETHIKA VULISE

College Point, 11356 NY | 917-667-3477 | geethikavulise@gmail.com

Professional Summary

Graduate student in Computer Science with strong analytical and business problem-solving skills. Experienced in e-commerce analytics, AI-driven business automation, and global IT outsourcing strategies through academic projects. Skilled at applying data analysis, visualization, and competitor benchmarking to generate actionable insights that improve efficiency and decision-making. Proficient in SQL, Excel, Tableau, and Power BI for reporting, dashboards, and business performance tracking. Adept at requirements gathering, stakeholder communication, and documentation, with exposure to cross-cultural business practices and risk assessment. Strong ability to connect technology with organizational needs to deliver measurable business value.

Education

Masters in Computer Science	2026
St. Francis College	Brooklyn, NY
Bachelor of Technology in Computer Science	2024
St. Martin’s Engineering College, Hyderabad	Hyderabad, INDIA

Technical Skills

• Data Analysis & Interpretation (Excel/SQL) • Data Visualization (Tableau/Power BI) • Process Mapping • Business Analysis • Outsourcing Strategy Evaluation • Requirements Gathering • E-commerce Analytics • Risk Assessment & Mitigation	• AI & Business Automation Concepts • Market & Competitor Analysis • Cost-Benefit Analysis • Report Writing & Documentation • Project Management • Problem-Solving & Critical Thinking • Communication & Presentation • Time Management & Prioritization
---	--

Academic Projects

Commercial Website Analysis - eBay

- . Conducted a comprehensive analysis of eBay’s e-commerce platform, focusing on customer behavior, pricing strategies, and overall user experience.
- . Evaluated the website’s navigation flow and product listing structure to assess ease of use and its impact on buyer decision-making.
- . Performed competitor benchmarking using data sets of 1,000+ records, applying Excel/SQL analysis and Tableau dashboards to highlight market gaps.
- . Interpreted consumer engagement patterns using research data and suggested improvements to enhance user retention and satisfaction.
- . Developed actionable insights and presented structured recommendations to improve e-commerce efficiency and customer engagement.
- . Strengthened skills in business analytics by transforming research findings into measurable business outcomes.

AI for Business Automation

- . Designed and conceptualized a framework for applying artificial intelligence to optimize business workflows and processes.
- . Explored practical applications of AI in decision-making support, efficiency improvement, and operational cost reduction.
- . Researched real-world automation use cases and identified potential benefits and challenges for businesses adopting AI.
- . Evaluated ethical considerations and risks associated with integrating AI into core business operations.
- . Delivered project findings through reports and presentations, showcasing the business value of AI-driven automation.
- . Enhanced ability to bridge the gap between emerging technologies and real-world business needs.

Global IT Outsourcing

- . Researched and analyzed various IT outsourcing models and their strategic impact on multinational organizations.
- . Conducted cost–benefit evaluations to understand the financial advantages and limitations of outsourcing practices.
- . Assessed major risk factors including data security, vendor dependency, and cultural challenges in global outsourcing.

- . Examined case studies to highlight best practices in vendor management and cross-cultural collaboration.
 - . Compiled findings into professional reports, demonstrating organizational adaptability and strategies for outsourcing success.
 - . Gained practical exposure to global business practices, strengthening analytical and decision-making capabilities.
