SUMMARY

QA Automation Engineer with over **3 years of experience** driving quality and efficiency across web, API, and mobile applications. Experienced in designing and implementing automation frameworks, improving application stability, and ensuring seamless integration in CI/CD pipelines. Adept at enhancing defect detection, supporting Agile sprint goals, and collaborating with cross-functional teams to deliver reliable, high-quality software solutions while optimizing testing processes and accelerating release cycles.

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, Cypress, Playwright, TestNG, JUnit, Cucumber (BDD), RestAssured, Robot Framework
Programming & Scripting: Java, Python, JavaScript, TypeScript, SQL, Bash, PowerShell
API & Microservices Testing: Postman, REST Assured, Swagger, SOAP UI, Karate DSL, Pact (Contract Testing), Newman (CLI for Postman)
Performance & Security Testing: JMeter, Gatling, K6, BlazeMeter, OWASP ZAP, Burp Suite, SonarQube, SAST/DAST tools
CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, CircleCI, Maven, Gradle, Docker, Kubernetes, AWS, Azure DevOps
Monitoring & Observability: Grafana, Kibana, Prometheus, Splunk, ELK Stack (log analysis and validation)
Test Environment & Data Management: WireMock, TestContainers, Service Virtualization, Mock Servers, Data Masking, BrowserStack, Sauce Labs
Test Management & Agile Practices: Jira, TestRail, Zephyr, qTest, ALM, SDLC, STLC, Agile/Scrum, TDD, BDD, Shift-Left Testing, Continuous Testing
Modern QA Skills: AI-based Testing (Testim, Mabl), Visual Testing (Applitools), Accessibility Testing (AXE, WAVE), Chaos Testing (Gremlin, LitmusChaos), Visual Regression Testing

PROFESSIONAL EXPERIENCE

Service Now

QA Automation Engineer

USA

Feb 2025 – Current

- Reduced regression cycle time by 40% by creating scalable UI automation frameworks using Selenium WebDriver, Playwright, and Cypress for multiple enterprise applications.
- Improved API reliability by 35% by automating REST and SOAP API validations using Postman, RestAssured, and Swagger, ensuring contract compliance before production environment deployments.
- Lowered post-release defect rates by 25% by integrating automated test suites into Jenkins and GitHub Actions pipelines, strengthening overall build stability and deployment confidence.
- Achieved full cross-platform coverage by executing browser and mobile tests using BrowserStack and Appium, eliminating UI inconsistencies across different devices, browsers, and operating systems.
- Accelerated Agile sprint feedback loops by 30% by aligning automation coverage with developers and product owners during standups, sprint reviews, and backlog grooming sessions.

Cognizant

Performance Test Engineer / QA Engineer

India

Sep 2021 - Jul 2023

- Increased application response time by 30% by executing load, stress, and endurance tests using JMeter, Gatling, and K6 to identify and resolve bottlenecks.
- Reduced downtime incidents by 20% by analyzing Grafana and Kibana dashboards, collaborating with developers to fine-tune backend performance during peak usage periods.
- Prevented 95% of critical vulnerabilities by executing OWASP ZAP and Burp Suite security scans on pre-production builds, strengthening application security posture and compliance.
- Boosted defect traceability by 40% by managing QA planning, execution, and reporting through Jira and TestRail across multiple Agile sprints and product releases.
- Improved release decision accuracy by 25% by preparing detailed performance reports and optimization recommendations for product stakeholders and senior engineering leadership.

Cognizant

Test Automation Engineer

India

Feb 2021 - Aug 2021

- Reduced manual testing effort by 60% by automating UI regression suites using Selenium WebDriver, TestNG, and JUnit across several business-critical application modules.
- Increased defect detection rate by 35% by developing BDD test scenarios with Cucumber and executing them via Jenkins pipelines during early SDLC phases.
- Enhanced test environment stability by 40% by simulating microservices dependencies using WireMock and TestContainers during integration, regression, and end-to-end testing activities.
- Improved build execution speed by 30% by managing version-controlled test code in GitLab CI and optimizing Maven and Gradle build pipelines.
- Delivered 100% on-time automation coverage by aligning testing priorities with sprint goals through close coordination with cross-functional teams under tight release timelines.

EDUCATION

Master of Science in Computer Science

Apr 2025

Rivier University, Nashua, New Hampshire

Bachelor of Technology in Computer Science Engineering

Jun 2022

Vignana Bharathi Institute of Technology, JNTUH University

CERTIFICATION

- Microsoft Certified: Azure Database Administrator Associate
- Oracle Database Administrator Certified Professional
- AWS Certified Database – Specialty
