

GOPI MUPPURI

Software Engineer

+1 (940)-843-5398 ◇ gopimuppuri630@gmail.com ◇ Denton, Texas, United States, 76205 [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-oriented **Software Engineer with 3 years of experience** developing and deploying **full-stack** web applications, RESTful APIs, and scalable cloud-native solutions. Proficient in **Python, JavaScript, SQL**, and modern frameworks such as **React, Flask, and Node.js**. Experienced in optimizing backend systems, automating infrastructure with tools like Puppet and Chef, and deploying applications across AWS and Azure environments. Strong background in database design, performance tuning, and cross-functional Agile collaboration. Adept at solving complex technical challenges and delivering reliable, high-performance software products.

Skills

- **Programming:** Python, JavaScript (ES6), Java, C++, C#, SQL
- **Web Technologies:** HTML5, CSS3, React.js, Node.js, Angular, Flask, jQuery
- **API Development:** RESTful APIs, SOAP, JSON
- **Databases:** PostgreSQL, MySQL, SQL/PLSQL, AWS RDS
- **Cloud Platforms:** AWS (S3, EC2, Lambda, RDS, IAM), Azure
- **DevOps Tools:** Docker, Jenkins, Puppet, Chef, CI/CD Pipelines
- **Concepts:** OOP, MVC, Microservices, SDLC, Agile/Scrum, TDD
- **Machine Learning:** TensorFlow, Scikit-learn, Pandas, NLTK, Power BI
- **Tools & Utilities:** Git, Linux, Exception Handling, Logging, Monitoring

Certifications

AWS Certified Solutions Architect – Associate

ServiceNow Certified System Administrator (CSA)

Professional Experience

Software Developer

Peer Staffing Inc – McKinney, TX (*Remote*)

Aug 2023 – Present

- Designed a modular system architecture in Python and built 10+ reusable libraries, enhancing code efficiency by 25%.
- Automated routine tasks using Python and Shell scripts, reducing manual effort and cutting task duration by 30%.
- Developed XML SOAP handlers in Python to streamline account creation, trade modification, and security updates, improving processing speed by 30%. Deployed 20+ code artifacts to Azure staging and production environments, reducing deployment complexity by 30%.
- Engineered RESTful APIs to synchronize data between 5+ distributed systems, improving integration efficiency.
- Optimized backend data transactions using SQL and PL/SQL, reducing latency and improving validation accuracy.
- Automated application deployment using Puppet and Chef, cutting manual setup time by 30%.
- Integrated smart MMI interactions using Python's NLTK toolkit, increasing interaction accuracy by 30%.
- Designed and delivered 3 interactive web portals with optimized PostgreSQL databases and responsive front-end (HTML, CSS, jQuery).

Software Engineer

Technomold IT Solutions Pvt Ltd – Bangalore, India

Feb 2022 – June 2023

- Managed and optimized cloud-hosted SQL databases, increasing data processing speed by 30%.
- Partnered with the cloud infrastructure team to refine queries, achieving a 25% improvement in system reliability.

- Created real-time monitoring alerts, reducing unplanned downtime by 30% and enhancing visibility.
- Collaborated with DevOps teams to enhance infrastructure, resulting in a 30% boost in security compliance.
- Resolved 95% of service failures through root-cause analysis and support team coordination.
- Streamlined enterprise data backup and recovery processes for clients like Pacific Life, boosting performance by 30%.
- Built and maintained automated database maintenance plans, including index rebuilding and integrity checks.
- Configured intelligent alerting systems for database metrics like health status, space allocation, and idle sessions.
- Contributed to high-availability managed services for top-tier clients including TCS, Pacific Life and Zurich Insurance

Projects

1. Cloud-Based Task Management System

Overview:

Developed a full-stack task management system that allows users to create, assign, track, and complete tasks in real-time. The backend was built with Python (Flask) and the frontend with React.js, with data persisted using PostgreSQL and hosted on AWS EC2.

Key Highlights:

- Designed **RESTful APIs** in Flask to handle user authentication, task workflows, and role-based access control.
- Integrated PostgreSQL with SQLAlchemy ORM to ensure reliable data persistence and query optimization.
- Deployed the application to **AWS using Nginx and Docker**, enabling auto-scaling and 99.9% uptime.
- Implemented JWT-based authentication and encrypted password storage for secure login flows.
- Set up CI/CD pipelines using **GitHub Actions** and Docker for automated build, test, and deployment.
- Added dashboard analytics using Chart.js to visualize task performance by user, date, and status.

Impact:

Achieved a 35% improvement in team productivity by streamlining task tracking and reducing communication gaps through real-time updates and notifications.

2. Real-Time Stock Price Analytics Platform

Overview:

Built a real-time analytics platform that monitors and visualizes stock price trends using **Python, WebSockets**, and **AWS Cloud**. The system fetches live financial data, stores it in a cloud database, and displays interactive dashboards for insights.

Key Highlights:

- Used Python and the Alpha Vantage API to fetch real-time stock data at fixed intervals.
- Streamed data using WebSockets and stored it in **AWS RDS (PostgreSQL)** for structured storage.
- Built an interactive dashboard with **React.js** and **Chart.js** to show live graphs, moving averages, and price volatility.
- Deployed backend services on **AWS Lambda** and **API Gateway** to ensure scalability and lower cost.
- Implemented alerting logic to notify users via email when price thresholds were breached.
- Used **Docker** and **GitHub Actions** for containerization and CI/CD deployment pipelines.

Impact:

Enabled real-time market trend analysis and alerts, helping users make faster investment decisions; achieved sub-second latency for live data visualization.

Education

University of North Texas — M.S. in Computer Science

Denton, TX | Aug 2023 – May 2025 | GPA: 3.8/4.0

Veltech University — B.Tech in Computer Science

Chennai, India | Aug 2019 – May 2023 | GPA: 8.8/10.0
