EDUCATION

Georgia State University

Master of Science in Computer Science | GPA 3.8/4.0

Coursework: Data Structures/Algorithms, Object-Oriented Programming, Cloud Computing, Advanced Human Computer Interaction

Aug 2023 - May 2025

Atlanta, Georgia

Jawaharlal Nehru Technological University

Bachelor of Technology in Computer Science and Engineering | GPA 3.5/4.0

Aug 2017 - Jun 2021

Hyderabad, India

WORK EXPERIENCE

Software Engineer - Research Assistant

Aug 2024 - Present

Georgia State University

Atlanta, Georgia

- Developed **Node.js RESTful APIs** and integrated with **AWS DynamoDB**, enabling scalable data handling for graduate administration services and increasing system throughput by 30%.
- Implemented **full-stack features with React**, optimizing dashboards using **Redux toolkit**, code-splitting, memoization, and lazy loading to reduce bundle size by 30% and improve responsiveness.
- Built **real-time monitoring dashboards** with **AWS CloudWatch**, reducing mean-time-to-detection for performance issues by 25%.
- Automated **CI/CD pipelines** with **GitHub Actions**, which accelerated release cycles by 40% and ensured high system availability.
- Maintained high system quality and reliability by designing and executing automated tests with **Jest** and **Cypress**, which achieved 92% code coverage and reduced production defects by 20%.

Full Stack Software Engineer Intern

Jun 2024 - Aug 2024

NetTracer

Atlanta, Georgia

- Collaborated with stakeholders to analyze user needs and developed **Spring Boot** backend services, **RESTful APIs** for the claim's platform, automating baggage tracking and reporting for 50K+ users, reducing manual effort by 40% and accelerating claim resolution.
- Revamped the **Angular** frontend of a 200+ component application, improving **UI/UX** and implementing client-specific visibility across 3+ departments, increasing task completion efficiency by 25%.
- Streamlined **MySQL** schemas across 25+ clients, enabling bilingual (**Spanish**) support, boosting query performance by 20% and reducing maintenance overhead.
- Built 5+ end-to-end tests using **Selenium** and **Cucumber**, achieving 95% test coverage and reducing critical production bugs by 15%.
- Contributed to the **Agile development lifecycle** by partnering with the **DevOps** team to engineer **CI/CD** pipelines with **Jenkins** and manage **AWS** infrastructure using **Terraform**, which reduced platform downtime by 20% and maintained 99.9% uptime.

Graduate Teaching Assistant

Aug 2023 - May 2024

Georgia State University

Atlanta, Georgia

- Mentored 150+ students in **Mobile Application Development** using **Dart/Flutter**, providing guidance on software design principles, **state management**, and **Firebase** integration, improving students' project completion rates and coding proficiency.
- Collaborated with the Professor to enhance course materials, led weekly coding challenges and Q&A sessions, resulting in a 20% increase in student engagement and higher overall course satisfaction.

Software Engineer

Jul 2021 - Jul 2023

Cognizant Technology Solutions

Hyderabad, India

- Developed high-performance **React** applications with code-splitting, lazy loading, and optimized **Redux** state management, reducing dashboard load times by 30% and improving responsiveness for 50K+ daily users.
- Built **Spring Boot** and **Node.js REST APIs**, integrated **Kafka** for asynchronous order processing, and implemented **Redis** caching, processing 200K+ orders/day while reducing API response latency by 40% under peak loads.
- Optimized **PostgreSQL** schemas and queries using indexing and **Liquibase** migrations, ensuring data integrity, boosting batch order processing speed by 45%, and enabling zero-downtime production deployments.
- Designed secure integrations with external logistics platforms via **REST APIs** and **JWT authentication**, enabling real-time data synchronization across 50+ factories and reducing data latency by 35%.
- Partnered with the **DevOps** team to automate **CI/CD pipelines** using **Azure DevOps** and **Docker**, leveraging **Splunk** for log monitoring, cutting release cycles by 40% and ensuring high platform reliability.
- Collaborated in **Agile sprints** using **Jira** and **Confluence**, delivering 10+ critical features on-schedule while sustaining a 95% sprint velocity.

PROJECTS

- Holistic Fitness Tracker** | *React, Tailwind CSS, Node.js, REST API and PostgreSQL*
 - Built a full-stack fitness application using **React + Node.js**, delivering responsive workout/meal planning dashboards for 1K+ active users.
 - Optimized **SQL queries**, improving data retrieval speed by 40%, enabled secure **REST APIs** for personalized recommendations.
- Fraud Detection System** | *Python, Scikit-learn, Flask, REST API, Random Forest, HTML/CSS*
 - Developed a real-time fraud detection system using **Python, Flask and Vue.js** to process 1,000+ transactions/second and via **REST API**.
 - Integrated a **Random Forest** machine learning model achieving 95% **precision** and **reducing false positives** by 30%.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, TypeScript, JavaScript, Go, C, C++, HTML, CSS, Dart
- Databases:** MySQL, PostgreSQL, MongoDB, SQL Server
- Frontend Technologies:** Angular, React, Tailwind CSS, Flutter, Figma
- Backend Technologies & Frameworks:** Node.js, Express.js, Spring Boot, Flask, REST APIs, GraphQL, Kafka, Redis
- Cloud & DevOps:** Azure DevOps, Jenkins, Docker, Kubernetes, AWS (ECS, S3, CloudFront, CloudWatch, DynamoDB), Terraform
- QA & Testing:** Jest, Cypress, Selenium, Cucumber, Postman, JUnit
- Other Tools:** Git (Version Control), GitHub, Jira, Confluence, Agile, Scrum, Linux, Splunk, Microsoft Office (Word, Excel, PowerPoint)

CERTIFICATIONS

AWS Certified Cloud Practitioner, AWS Certified Developer - Associate, Salesforce Certified Platform Developer
