DATA ANALYST | SR SOFTWARE ENGINEER | TECH ASSOCIATE

Dynamic Data Analyst skilled in turning data into actionable insights through effective analysis and visualization using Power BI, Excel, Python, and SQL Server. I excel at creating insightful visualizations that make data easy to understand and support informed decision-making. My skills in managing and optimizing databases enhances the effectiveness of projects. With over 7 years of experience as a Full Stack Developer, I mentor teams to adopt best practices and drive continuous enhancement in data strategies.

Key Expertise & Accomplishments

- Data Analysis
- Data Visualization
- Database Management
- Reporting Solutions
- Data-Driven Decision-Making
- Application Development
- Performance Optimization
- Team Leadership

Skills:

- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Data Manipulation:** Pandas, NumPy, Excel, VBA
- **Database:** MySQL, SQL Server, Oracle
- **Programming Languages:** Python, C#, ASP.NET, ADO.NET, ASP, VB
- **Platform:** Jupyter Notebook, Visual Studio Code
- **Version Control:** VSS, SOS, SVN, GitHub

Experience:

Mentor a promise - Data Analyst – Volunteer

Nov 2024 – Present

Contributing to educational initiatives by analyzing data to enhance student performance and program effectiveness.

- Creating data models and structuring databases to track student progress across tutoring phases.
- Developing interactive dashboards to visualize student distribution and enrollment trends while analyzing student responses to identify key learning gaps.
- Creating student performance dashboards that lead to a 25% improvement in personalized learning interventions through actionable insights to enhance assessment accuracy.
- Evaluating tutoring effectiveness by examining student performance data across program stages, generating insights that led to a 20% improvement in student success.

InvestInMinds – Data Analyst – Volunteer

Jan 2025 – Feb 2025

Conducted data analysis, statistical modeling, and research to guide nonprofit financial literacy initiatives.

- Researched, sourced, and prepared financial literacy datasets by handling missing data and inconsistencies.
- Analyzed financial literacy trends across demographics such as income, education, and location to identify target groups.
- Calculated key metrics, identified outliers, and conducted multiple linear regressions to find correlations.
- Summarized insights in a report and proposed strategies to improve financial literacy programs.

HCL Technologies, India - Sr. Software Engineer

April 2011 - Feb 2014

Led software development projects, focusing on database management and application performance enhancement.

- Developed and maintained SQL stored procedures, views, and triggers for application backends.
- Designed and optimized database indexing strategies, reducing query execution time by 40%.
- Automated data extraction and reporting in Excel, leveraging VBA macros for improved efficiency.
- Refactored application architecture, resulting in a 30% improvement in software response times.
- Led offshore teams, applying best practices for database optimization and performance tuning.

Atlas Systems, India - Sr. Software Engineer

Mar 2007 - Mar 2011

Specialized in report generation and database migration, enhancing operational efficiency and data accuracy.

- Built functional prototypes for cross tab analysis, improving report generation time by 30% through customizable crosstab data and integrating reporting tools.
- Generated ad-hoc reports in tight deadlines, fulfilling urgent client requirements.
- Led a DB migration project, achieving 95% reduction in data discrepancies.
- Migrated legacy VB components to C# libraries, enhancing performance and maintainability.
- Improved offshore team productivity by 20% through mentoring and performance evaluations.

GNSA Investor Services, India - Tech Associate

Apr 2006 - Mar 2007

Coordinated client requirements and streamlined data processes to enhance project outcomes.

- Gathered requirements and automated Excel imports with VBA, reducing manual time by 40%.
- Created SQL queries for client-specific reports, decreasing data retrieval time by 15%.

EDUCATION

M. Sc., (Software Science) Periyar University, India.
