SUMMARY

Results-oriented Technical Expert with hands-on experience testing cellular connectivity across Apple platforms. Proven ability to improve test efficiency, diagnose complex wireless and system issues, and deliver actionable insights to engineering teams. Strong background in 5G/LTE technologies, Python automation, stability and performance testing, and cross-functional collaboration in fast-paced environments.

WORK EXPERIENCE

Software QA Automation Engineer - Cellular CE - Apple

Jan 2025 – June 2025

- Executed stability, functional, and performance testing for cellular features across multiple Apple device lines, identifying defects prior to production release.
- Developed and maintained Python automation scripts, improving test efficiency by over 50% and reducing manual regression effort.
- Analyzed modem behavior using 3GPP benchmarks and wireless KPIs to diagnose connectivity failures and performance regressions.
- Investigated system crashes, modem resets, and field-reported issues to expand test coverage and improve defect reproducibility.
- Collaborated closely with wireless and software engineers to validate fixes, patches, and build changes.

Technical Expert - Apple

Oct 2019 – Present

- Performed advanced diagnostics and repairs for iPhone models 4–17, achieving a 99.3% successful repair rate through accurate root cause identification.
- Delivered customer-facing technical support with emphasis on precise issue triage across software, hardware, and wireless systems.
- Utilized structured troubleshooting frameworks to isolate failures involving cellular, Wi-Fi, Bluetooth, and system software.
- Served as a technical escalation resource for complex device and connectivity issues.

Volunteer Champion - Apple

Jan 2021 – Jan 2023

- Planned, facilitated, and led community volunteer events that brought Apple employees together to serve local nonprofit organizations
- Coordinated a large-scale volunteer initiative across 3 retail locations, engaging 150+ employees in a single community impact event resulting in \$15,000 raised in one day

Lead – CE - Apple

Sept 2020 – Oct 2021

- Led sales initiatives and managed daily operations to ensure consistent service execution.
- Mentored and coached team members, supporting performance development and technical skill growth.
- Assisted with complex technical escalations, ensuring timely and accurate resolution.

ADDITIONAL INFORMATION

- **Technical Skills:** 5G, LTE, Wi-Fi testing, Bluetooth testing exposure, Python automation scripting, stability and performance testing, test plan development, modem and crash log analysis, Jira, Confluence, Notion, Git, Canva
- **Certified Platforms:** iOS, macOS, iPadOS, watchOS, tvOS, visionOS
- **Skills:** Cross-functional communication, debugging, root cause analysis, leadership, mentoring

EDUCATION

Associate of General Studies

Florida SouthWestern State College
