

Hailey Cook

Clinical Research Project Manager | ACRP Professional

HaileyCook616@gmail.com | 817-683-5444 | Dallas-Fort Worth, Texas | [Linked](#)

Professional Summary

A results-oriented Project Manager with a proven track record of successfully managing multiple complex clinical trials. With a strong foundation in developing and executing study protocols, managing regulatory submissions, and overseeing data management. Proficient in utilizing industry-standard tools (Jira, Zendesk, Google Workspace, EDC systems) to streamline operations. Skilled in utilizing project management tools to optimize operational efficiency and to develop comprehensive project plans, timelines, and resource allocations. Expertise in regulatory affairs, data management, and project management. Committed to delivering high-quality data and ensuring compliance with regulatory standards (e.g., GCP, ICH). Committed to staying ahead of industry trends and implementing best practices. I am seeking a challenging role in a dynamic organization where I can contribute to the advancement of novel therapies.

- Clinical Research Protocol Development & Management
- Regulatory Affairs Compliance
- Data Management & Reporting
- Project Management
- Communication & Interpersonal Skills
- Vendor Management
- Data Entry & Data Reconciliation
- Budget & Risk Management
- Contract Management
- CRO Management
- IRB Submissions Management

Professional Experience

Glooko, Remote – Clinical Trial Associate (Project Manager)

(July 2023 – Dec 2024)

- Client Relationship Management:** Cultivated strong relationships with clients to ensure project goals were met.
- Clinical Study Management:** Overseeing all aspects of clinical study execution, including study design, data collection, analysis, and reporting. Including the development of study and source materials (SOPs, IRB forms, NTFs, CAPAs, etc.). As the team lead, I successfully managed 6 concurrent clinical research studies for Glooko and 4 University research projects.
- Project Management:** Leveraged in-depth understanding of Glooko's products to identify and capitalize on clinical research opportunities. Work closely with the Data Science team to ensure the quality of clinical trials and data analysis, by performing weekly Data checks and reporting, including cross-functional collaboration between different departments such as regulatory affairs, data management, and other stakeholders.
- Regulatory Compliance:** Adhered to strict regulatory guidelines (e.g., FDA, GCP) to ensure data integrity and study compliance.
- Provisioning/ Inventory Management:** Ensured that study-specific devices and equipment were delivered to sites, by digitization procurement processes and working with the provisioning vendors. I also assisted and initiated in facilitating contract negotiations for ongoing clinical trials with vendors. Providing high levels of project progression with multiple reports generated to manage risks and implement mitigation strategies.
- Budget Management & Sales:** Streamlined procurement processes and optimized budget allocation by successfully executing multiple Change Orders and Purchase Orders, resulting in over \$500 thousand in revenue for the Clinical Operations team for Q2 and Q3 of 2024.
- Project Implementation:** At Glooko, I gained direct launch experience by helping roll out a new app for our Clinical Research products. Specifically, for two key clients, I facilitated the successful launch of this electronic data capture (EDC) app, which enabled the real-time collection of participant timesheets, diaries, and surveys, significantly enhancing our clinical research data collection capabilities.

Sanofi, Remote – Project Manager for GMSAT Team (Global Manufacturing Science & Technology)

(March 2022 – March 2023)

- Project Management:** Planning and Implementation of cross-functional programs and projects. Coordinate assigned activities in support of the MSAT Control and Validation organization. Provided project management expertise to various operations projects and was the TPT project manager to the Rare Blood Disorders team.
- Clinical Research Protocol Development & Management:** Develop and implement formal communication protocols and tools, including meeting minutes, dashboards, and management reports/presentations, that increase teams' reporting efficiency. Gain industry experience in understanding quality and cGMP principles for manufacturing.
- Risk Management:** Provide leadership and direction to assigned project teams through the application of expertise in project management tools and processes. Tools including Power BI and MS projects. Define strategies or processes in support of projects and programs, using Agile systems to help with support. Evaluate data to ensure the timely completion of deliverables and to improve current processes.
- Communication:** Coordinate assigned activities in support of the MSAT Control and Validation organization stakeholders and departmental leaders. By organizing, leading, and participating in assigned departmental/ team support meetings. Work in collaboration with the other organizations and functions within Global MSAT and outside Global MSAT (Regulatory Affairs, Quality, Manufacturing, etc.) to gather pertinent information, seek input, and provide project updates
- Data Management & Reporting:** Ensure timely and accurate reporting of project/program status, and alert MSAT Control and Validation Head and others in the event of project delays or issues. Develop report structure and written status reports for a variety of projects by offering creative, pragmatic, and innovative solutions to situations and helping identify potential risks that may affect project or program completion.

MDgroup, Remote – Global Project Manager

(Promoted: July 2021 – March 2022)

- **Stakeholder Communication:** The primary contact for the Clients of MDgroup, ensuring that the project is managed and delivered in line with client expectations and requirements, while providing a high level of quality customer service by ensuring that the assigned projects meet the client's expectations and that legal requirements are met until the project's closure.
- **Risk Management:** Collaborating with Quality Manager to maintain compliance; identify areas of weakness/ risks, recommend improvements, and assess the effectiveness of changes made. Ensuring all data complies with local Data protection/ Data privacy legislation and IRB/ Ethics regulations.
- **CRO Contract Management:** Led negotiations with client contracts and improved client retention on previously established contracts, with the addition of 3 new contracts added to the business. Collaborated with sponsors and sites to overcome barriers to mobile phlebotomy service adoption, including developing an expedited approval process and delivering comprehensive training, leading to 30 successful patient enrollments and the acquisition of 3 additional contracts from the sponsor.
- **Issue Resolution:** Sourced for accommodations with travel needed for US Medical Visa application support for patients.

MDgroup, Remote – Clinical Project Coordinator-Patientprimary

(December 2020– July 2021)

- **Communication:** Mediated between Project Managers and contracted clinical personnel to increase overall customer satisfaction.
- Organization of Mobile Home Health visits, being the primary point of contact when scheduling visits with the sites and health care providers.
- **Clinical Research Coordination:** QCing site documentation and visit request forms. Maintaining data reports and tracker systems. Keeping the Sponsor's CTMS records updated and accurate, along with any electronic communication with the patients and/or sites.
- **Operational Efficiency:** Introduced the development of reports and tracker systems on Airtable, Projects, PowerPoint, Microsoft Word, and Excel for the project managers. Training new project coordinators, managers, and health care providers on study protocols and SOPs. Creation of study documents and QC health care provider paperwork on a visit to the patient's home. Performed the duties of a clinical manager for 4 projects/studies. Created work orders for study vendors and reviewed contracts from clients, CRO's and sponsors for project-specific requirements.
- **Regulatory Compliance:** Reviewed Training and Credential documents of department HCP personnel. Provide oversight and quality control of our internal regulatory filing system into the EDC system. Adhered to strict regulatory guidelines (e.g., FDA, GCP) to ensure data integrity and study compliance.
- **Trail Management:** Manages all aspects of study screening and enrollment of participants. This included an informed consent process, collecting and confirming inclusion and exclusion criteria, managing study participant visits, and ensuring all assessments and procedures are performed according to protocol requirements.

CSL Plasma, Fort Worth, TX— Quality Manager

(Sep 2020 – Dec 2020)

- **Leadership:** Plasma Center Manager leadership team member. Provided leadership for conducting patient safety/ clinical risk assessments and adverse event investigations, including root cause analyses and implementation of effective corrective action plans
- **Regulatory Compliance:** Collaborate with Center Management to ensure the day-to-day activities of Center operations are compliant with Standard Operating Procedures (SOPs) and applicable federal and local regulations. Assist Center Management in ensuring the Center is "inspection ready" at all times and customer requirements meet the safety of donors and employees, including compliance with Occupational Safety and Health Administration (OSHA) and Environmental Health and Safety (EHS) regulations and Medical safety standards.
- **Budget Management:** Responsible for all Center financials, including annual budgets and monthly financial analysis. Collaborate with Center Management in collecting and analyzing KPIs to support continuous improvement and meet Center-established production goals.
- **Training:** Provided training to new team members.

EMSI, Irving, TX— Project Coordinator

(May 2018 – July 2020)

- **Stakeholder Communication:** Mediated between Project Managers and contracted clinical personnel to increase overall customer satisfaction. Acted as team lead representative for communication from Quest Labs and Labcorp on specimen testing progress and discrepancies. Ran weekly reports for clients on the progress of laboratory collection nationally, including Purto Reico.
- **Data Management & Reporting:** Processed monthly billing reports and accounts set up for new client registration. Support the onboarding of new resources for new clients.
- **Issue Resolution:** Facilitated the creation of SOP binders for Clinical Research projects to maximize customer service relations. Project support time recording/tracking reports, and audits. This increased the team's efficiency by 40%.
- **Training:** Developed training material for the team and new hires regarding new and current contracted projects.
- **Clinical Trial Protocols:** Clinical research experience with a wide range of therapeutic fields, including medical devices. Coordinator responsibilities included scheduling patients for their clinical trial appointments, data entry, management of the site's study supplies, shipment of supplies, and compiling and maintaining project-specific status reports.

Clear View Diagnostic Labs, Dallas, TX — Medical Laboratory Tech

(January 2018 – May 2018)

- The lead accessioner and QA assistant for specimen processing- data to HCP accounts.
- Implemented processes for Iron Mountain for record-keeping storage and digitalizing documents. This increased the team's efficacy by 40%.
- Processed blood and urine testing on DXI 800, AU 1500, and LabGen software.
