

HALAN LE – DATA ANALYST

Lake Forest, CA | (949) 382-9156 | halanle20@gmail.com | [linkedin.com/in/halan-le/](https://www.linkedin.com/in/halan-le/) | github.com/halanle

OBJECTIVE

Highly driven Data Analyst with a proven track record of improving data quality and accessibility, seeking opportunities to grow skills and contribute to impactful data-driven projects

INTERNSHIP & WORK EXPERIENCE

Intratek Computer Inc., Orange, CA

01/2024 – Present

Data Analyst Contractor for OCTA

- Develop and optimize **QlikView** data models, scripts, and reports for new and existing dashboards, applying advanced data modeling techniques to enhance performance, accuracy, and user experience
- Design **Power BI** data model to create self-service sandbox environment for business users to independently create custom reports and visuals, improving data accessibility, decision making, and reporting efficiency
- Utilize **SQL** scripts to validate data used by dashboards to verify structure, accuracy, and quality of data and dashboard development to ensure data consistency across the board
- Built **Python** scripts to automate the comparison of Excel data discrepancies with SQL data warehouse, implementing a system to update status indicators, improving data accuracy and error resolution by **50%**
- Create **Python** scripts to automate data extraction from APIs, process aggregated conversation metrics, and securely insert data into Oracle SQL database, improving process efficiency by **20%**

L&T Precision, Poway, CA

08/2021 – 10/2021

Process Improvement Intern

- Led and collaborated with cross-functional teams to drive data-informed improvements in manufacturing processes, ensuring compliance with AS9100 quality standards and enhancing operational efficiency
- Facilitated cross-departmental meetings to address process issues, utilizing analytical tools like 5 Whys and Fishbone Diagrams to drive root cause analysis and implement process improvements
- Contributed to process enhancements by identifying and rectifying shipping inefficiencies, such as missing smaller pieces in specific products, improving assembly packaging and reducing shipment errors

OTHER WORK EXPERIENCES

Sleeping Disorder Data Analysis

- Conducted in-depth analysis on sleep disorder data using advanced statistical techniques to derive insights and create intuitive visualizations, achieving a **90.7%** accuracy rate in predicting conditions like sleep apnea and insomnia
- Leveraged **Python** for machine learning techniques, including Logistic Regression, Random Forest, and XGBoost to predict sleep disorder, and build data visualizations to highlight correlations between occupation, stress levels, and sleep disorders

Customer & Social Analytics - Mental Health Survey Analysis

- Led a 6-member team to analyze the impact of factors like gender, employer benefits, and work interference on employees' mental health treatment, achieving **85%** accuracy rate in predicting the need for treatment
- Utilized **Python** for data cleaning and visualization, and applied XGBoost, Logistic Regression, and Random Forest to predict treatment likelihood

SKILLS

Technical Skills: Python, SQL, R, DAX, Power BI, QlikView/QlikSense, Microsoft Office Suite, Adobe Suite

Soft Skills: Strong analytical and problem-solving abilities, effective communication, collaborative team player, creativity

CERTIFICATIONS

Microsoft Power BI Data Analyst
