PROFESSIONAL SUMMARY

Software Engineer (3+ years experience) building systems with **Java, Spring Boot microservices, Kafka**, and **MongoDB/SQL**. **Improved automation by 50%** and **reduced processing time** across key workflows. Built **AI features with GPT-4 and LangChain**, integrated **secure OAuth2/JWT APIs with React frontends**, implemented **event-driven pipelines with Avro-backed Kafka**, and **modernized legacy systems** in Agile, distributed teams.

SKILLS

Programming Languages & Scripting: Java, JavaScript, Python

Backend: SpringBoot, Spring MVC, Hibernate, Spring Security, Spring Data JPA, Microservices, REST APIs, SOAP Web Services, Node.js, Express.js, FastApi, Maven, Gradle, Tomcat, OAuth2, JWT, Swagger / Open API

Frontend & Full-Stack: React.js, Angular, HTML5, CSS3, Responsive UI

Databases & Messaging: SQL, MongoDB, Apache Kafka, Redis, RabbitMQ, Stored Procedures, Query Optimization

Cloud & DevOps: AWS, Google Cloud (GCP), Microsoft Azure, Docker, CI/CD (Jenkins, GitHub Actions), SonarQube

Testing & Quality: JUnit, Mockito, TDD, Code Reviews, Postman

Monitoring & Performance: Splunk, Application Logging, (Log4j, SLF4j),

AI & Automation: LangChain, GPT Integration, Conversational Agents

Practices: Agile/Scrum, SDLC, Git, DesignPatterns

EXPERIENCE

Universal Business Solutions Inc

Software Engineer

Herndon, VA, USA

07/2025 – Present

- **Built and maintained React frontend components** integrated with Spring Boot REST APIs for secure data capture, validation, and UI rendering.
- **Developed scalable backend services using Java, Spring Boot, Hibernate, and RESTful APIs** following clean architecture and best practices.
- **Implemented event-driven data pipelines with Apache Kafka and Avro schemas** for reliable asynchronous processing and system integration.
- **Provisioned and managed AWS services including Aurora RDS, EC2, and Lambda** to support transactional persistence, background jobs, and automation workflows.
- **Designed and implemented authentication and authorization using Spring Security, OAuth2, JWT**, securing both APIs and UI access.
- **Integrated secure login flows into React**, including token handling, protected routes, and logout mechanisms.
- **Containerized and deployed services using Docker and CI/CD pipelines** with Jenkins and GitHub Actions across AWS, Azure, and GCP.
- **Monitored, maintained, and supported production environments**, ensuring reliability, performance, and scalability.
- **Worked in Agile teams**, participating in sprint planning, code reviews, retrospectives, and technical design discussions.
- **Collaborated cross-functionally with product, QA, and DevOps teams** to deliver high-quality features on schedule.

Optum (UnitedHealth Group)

Software Engineer

Hyderabad, Telangana

09/2022 – 06/2025

- **Designed and optimized Java (Spring Boot) REST APIs, Micro services, and Kafka pipelines** for renewals, quotes, and exception handling, increasing automation by 50% and reducing processing time by 40%.
- **Built micro-services with MongoDB & SQL** for renewal tracking, automated document generation, and downstream triggers, ensuring transactional accuracy and reliability.
- **Enhanced real-time event streaming with Kafka & MongoDB**, improving message reliability by 30% and enabling persistent auditing with idempotent processing.
- **Delivered React.js + Node.js dashboards** for underwriting and operations teams, improving productivity by 30% and enabling faster cross-team collaboration.

- **Developed an AI-powered GPT-4 + Lang Chain agent** to translate natural language queries into MongoDB aggregations, accelerating decision-making and reducing developer dependency.
- **Drove Agile delivery with 95% sprint commitment rate**, improving deployment speed and reliability via CI/CD pipelines (Jenkins, GitHub Actions, GitLab) and automated testing (JUnit, Mockito).
- Engineered and maintained **Spring Boot, Spring MVC, and REST API** solutions for high-volume insurance renewal systems.
- Contributed to **J2EE-based legacy modernization**—migrating JSP/Servlet modules to Spring Boot microservices with improved maintainability.
- **Collaborated with cross-functional teams** (QA, DevOps, Business Analysts) across multiple time zones to ensure smooth release cycles and high-quality deliverables.
- **Acted as a buddy/mentor for junior developers**, guiding them on Java best practices, code reviews, and microservices design, which reduced onboarding time and improved team productivity.

PROJECTS

Docsy.ai – AI-powered doctor appointment assistant/Project| 2025 Technologies: Java, Spring Boot, Python, LangChain, GPT, Google APIs, React, MongoDB

- Built an AI-powered doctor appointment platform with secure authentication, symptom analysis (Python, ML, LangChain), doctor-matching from MongoDB, GPT-powered conversational booking, and Dialog Flow-based speech automation.

AWARDS & Recognitions

- **Star Recognition Award (VP Optum)**– Recognized for driving AI/ML innovation through impactful artificial intelligence and machine learning solutions.
- **Engineering Excellence Award (VP Optum)**– Honored for outstanding software development and consistent delivery of high-quality engineering outcomes.
- **Bravo Award** – Awarded for fostering strong team collaboration and contributing to a positive, productive work culture.
- **Bravo Award** – Recognized for cross-functional collaboration and problem-solving that resulted in significant cost savings for 1,000+ Groups.
- Received a **Recommendation Letter from Optum Senior Manager** for exceptional contributions as a Software Engineer, specifically highlighting:
 - Proficiency in **Full Stack Engineering, AI/ML, and Conversational AI**.
 - Development of a **Conversational AI solution** that improved customer engagement and streamlined processes.
 - Strong collaboration, innovation, and problem-solving capabilities.

Certifications

- Google Cloud Digital Leader (2025)

EDUCATION

CMR COLLEGE OF ENGINEERING AND TECHNOLOGY

Bachelors in Electronics and Communication Engineering (GPA 7.32/10)

Hyderabad, Telangana

06/2022
