

Harish Korukonda

Full Stack Java Developer

harishkorukonda488@gmail.com | 314-384-6668 | [harish-korukonda](#) | [Harry-portfolio](#)

PROFESSIONAL SUMMARY

- **5+** years of expertise in full **SDLC**, from requirement analysis to deployment, with proven skills in troubleshooting, debugging, and optimizing enterprise-grade web applications.
- Strong expertise in **OOP, Java/J2EE**, and client-server technologies with in-depth knowledge of design patterns, **MVC architecture**, and extensive experience in **Core Java, Servlets, JSP, JDBC, and JPA**.
- Proficient in **multithreading, exception handling, collections framework, garbage collection, and functional programming** concepts such as **streams, lambda expressions, and method references**.
- Collaborated on large-scale enterprise systems, integrating databases with efficient **ORM** tools like **Hibernate and JPA**.
- Skilled in **UML modeling** to produce class diagrams, sequence diagrams, and use-case artifacts.
- Proficient in **Spring Core, Spring MVC, Spring Boot, Spring Cloud, Spring Security, Spring Data** (JDBC/MongoDB/REST).
- Hands-on experience in developing **REST microservices** and scalable **APIs** using **Spring Boot** and **Spring Cloud**, with familiarity in **SOAP-based web services** and **third-party** service integration.
- Proven ability to optimize application performance and scalability by implementing **microservices architecture**, reducing response time by 40% and ensuring seamless integration across distributed systems.
- Hands-on experience in **React.js** with expertise in **React Hooks, Redux, Context API**, and functional components for state management, while designing modular reusable front-end components following **JavaScript MVC design patterns**.
- Experience in integrating front-end applications with backend services using **AJAX, RESTful APIs, and GraphQL**.
- Expertise in UI testing frameworks such as **Mocha** and **Chai** for **React**, ensuring robust and reliable front-end application testing.
- Skilled in **HTML, CSS, JavaScript (ES6+), AJAX, JSON, Bootstrap**, and modern **JavaScript** frameworks like **React.js, Vue.js, and TypeScript**.
- Proficient in AWS services including **EC2, S3, RDS, ELB, Auto Scaling, API Gateway, CloudFront, Route 53, Elastic Beanstalk, VPC, CloudWatch, SNS, SQS**. And **AWS (Flink on EMR, Kinesis)** for scalable real-time data processing.
- Developed and deployed secure, cloud-native applications on **AWS**, ensuring high availability while implementing AWS Security Best Practices using **AWS Shield, WAF, and Config**.
- Experience in designing and implementing highly scalable, fault-tolerant, and secure cloud-based architectures.
- **Skilled in developing and consuming RESTful and SOAP-based web services, with expertise in implementing secure authentication using OAuth2/JWT**.
- Proficient in microservices architecture, domain-driven design (DDD), and event-driven systems, ensuring scalable and maintainable applications.
- Experience with **Apache Kafka** for reliable, asynchronous message exchange across distributed systems.
- Experienced in using Automation frameworks such as **JUnit, Mockito, and Selenium** to ensure high-quality and reliable applications.
- Experienced in Agile (Scrum), **TDD**, and **CI/CD** pipelines, proficient in tools like **Git, GitHub, Bitbucket, SVN, Maven**, and **Gradle** for version control, build automation, and dependency management.
- Proven ability to troubleshoot, debug, and optimize application performance in production environments.

TOOLS AND TECHNOLOGIES

Languages	C, C++, Java 8 /11, J2EE, SQL, PL/SQL
J2EE Technologies	Servlets, JDBC, JSP, JSF, JMS, EJB, JNDI, Java Security
Markup/XML Technologies	HTML5, CSS3, JavaScript, jQuery, AJAX, React.js, JSP, JSTL, XML, XSD, XSL/XSLT, SAX/DOM, JSON
Tools	Framework: Struts, Hibernate, Spring MVC, Spring IOC, Spring AOP, Spring Boot, JSF, JUnit, SOAP UI, ANT, Maven, Jenkins, Struts MVC, Apache Active MQ, Apache Camel, Kafka
Web services	SOAP, Restful, UDDI, WSDL, JAX-RPC, JAX-RS, JAX-WS, JAX-B, Axis
Web/App Servers	IBM Web Sphere, Apache Tomcat, JBoss, Web Logic Server
Database	Oracle, SQL-Server, PostgreSQL, MySQL server, TOAD, Cassandra, MongoDB/NoSQL
IDEs	Eclipse, IntelliJ, Spring Tool Suite (STS).
OR mapping	Hibernate, I Batis
Testing Tools/ Others	JUnit, Soap UI, Putty, Rational Clear Quest, RTC, StarTeam
Version Control	Tortoise SVN, CVS, Rational ClearCase, Git and Mercurial, Docker
OS & Environment	Windows, Sun Solaris, UNIX, Linux
Cloud Technologies	AWS (Amazon Web Services), Cloud Foundry

WORK EXPERIENCE

Client: CLS Group, NYC, NY
Role: Full Stack Java Developer

July 2023 – Present

Responsibilities:

- Participated in all phases of the Software Development Life Cycle (**SDLC**), including analysis, design, development, and testing, using Agile methodology for rapid and iterative development.
- Applied Composite View Pattern for the presentation layer and **J2EE** Design Patterns (Singleton, Facade, Proxy, Observer) for middle-tier development, enhancing scalability and maintainability.
- Integrated **Spring MVC** with various application modules, ensuring seamless front-end and back-end interaction, while designing RESTful microservices using **Spring Boot**, **Spring Data JPA**, and **Spring REST** with JSON serialization.
- Implemented **Spring Cloud Eureka** and **Spring Cloud Config Server** for efficient service discovery, centralized configuration management, and improved scalability in a distributed environment.
- Designed and implemented **Spring Boot microservices** integrated with cloud-based ecosystems, deployed using **Docker** containers, and managed with Kubernetes.
- Implemented Spring Kafka API to enable scalable, fault-tolerant message processing in microservices by configuring Kafka producers and consumers within Spring Boot, utilizing templates, listeners, and configuration classes for high-throughput, low-latency messaging.
- Applied **event-driven architecture** using **Kafka** for real-time data streaming.
- Implemented **authentication** and **authorization** using OIDC and OAuth 2.0 for secure web services.
- Developed database interaction modules with **Hibernate ORM** and DAO classes, using **Spring Framework** for dependency injection.
- Leveraged **AWS Elastic Beanstalk** and **Elastic Container Service (ECS)** for dynamic application deployment.
- Built and deployed Microservices on AWS with **Spring Boot** and Spring Cloud, utilizing S3 for object storage, Dynamo DB for **NoSQL** data storage, and RDS for relational databases.
- Experienced in container orchestration with **Kubernetes** and integrated with Docker for scalable deployment.

- Configured and orchestrated resources through **AWS Cloud Formation** for consistent, reproducible environments.
- Established **VPN** connections between the corporate data center and **AWS VPC**, enhancing data security and network integrity.
- Automated build and deployment pipelines using **Jenkins** and **Maven**, **streamlining CI/CD processes**.
- Integrating SonarQube with the CI/CD pipeline (Jenkins, GitHub Actions, etc.) to continuously analyze code quality.
- Configured and maintained **Tomcat application servers** for hosting Java applications.
- Design and implement real-time **stream-processing pipelines** using Apache Flink.
- Perform **time-based** or **count-based aggregations** (e.g., averages, sums, counts) using **windowing** techniques.
- Integrated **WebSockets** for real-time communication between the front-end and back-end, ensuring instant data updates across client sessions.
- Developed single-page applications (SPAs) using **React**, utilizing its components, Hooks, States Concepts, Redux and routing capabilities.
- Integrated React with RESTful APIs, utilizing Axios or Fetch for HTTP interactions and JSON data exchange.
- Tested backend web services using SOAP UI for seamless communication with front-end applications.
- Built user-friendly interfaces utilizing **JavaScript**, **TypeScript**, **Bootstrap**, **jQuery**, **HTML5**, **CSS3**, and **AJAX** for responsive web design.
- Developed and executed automated test suites for functional, smoke, and regression testing. Used Selenium for end-to-end (E2E) testing, and Mocha /chai for React **unit tests to ensure code quality and catch defects early**.
- Employed **Swagger** UI to provide visual API documentation, enabling efficient client-side integration. Used **POSTMAN** and **REST** Client for thorough API response testing and exception management.
- Proficient in SQL databases (Oracle DB, MySQL) with experience writing complex PL/SQL scripts, stored procedures, triggers, and views, and using TOAD for efficient database development and management of database objects.
- Employed **JUnit** for unit and functional testing in a **Test-Driven Development (TDD)** approach.
- Configuring logging frameworks like Log4j to capture application logs and error messages, ensuring effective monitoring and debugging.
- Leveraged JIRA to organize and track the progress of **Agile projects** by creating **user stories**, **tasks**, **epics**, and **sub-tasks**. Each task was broken down into manageable pieces of work and tracked throughout the **Sprint cycle** using **Kanban** or **Scrum boards**.

Environment: Java 8/11, JSP, React JS, Servlets, J2EE, HTML, CSS, JavaScript, React, Bootstrap, JSON, Hibernate, Spring MVC, JBoss, WebLogic, JUnit, jQuery, Tomcat, SOAP and RESTful Web Services, Kafka, AWS, Oracle, Agile, Git.

Client: Dmantz Technologies PVT LTD, India.

June 2019 -July 2022

Role: Full Stack Java Developer

Responsibilities:

- Designed and implemented robust backend solutions using **Java**, **Spring Boot**, and **Spring MVC** with an annotation-driven approach.
- Designed and developed **modular microservices** using **Spring Boot** and **Spring Cloud**, focusing on decoupling different business functionalities into independent, self-contained services.
- Developed **Spring Boot-based** REST services, utilizing **Spring IOC**, **AOP**, and **Data JPA** for efficient data management.
- Successfully developed and deployed a suite of **Microservices** on AWS, improving application efficiency by 30%.
- Deployed **Microservices** in **Docker** containers on **AWS EC2** and integrated them with **Kubernetes** for container orchestration.
- Deployed serverless applications using **AWS** and configured **Docker** registries for **Micro service** authentication builds.
- Automated **AWS cloud** provisioning and scaling tasks with **Python scripts**, achieving faster infrastructure setup times.
- Developed and deployed REST APIs using AWS Lambda and API Gateway to ensure high availability, scalability, and optimized response times in a serverless architecture.

- Configure and manage Flink clusters in **Kubernetes** or on **AWS** for high availability and fault tolerance.
 - Proficient in AWS Cloud Services: **EC2, S3, Lambda**, and **Cloud Formation templates**.
 - Integrated **Elasticsearch** with native queries for optimized data retrieval in product search functionalities. Extensive use of **Hibernate Query Language (HQL)** to improve database interaction efficiency.
 - Designed and implemented event-driven microservices using **Amazon SNS, SQS, and EventBridge**.
 - Implemented inter-service communication using **Kafka** for scalable, real-time asynchronous messaging between microservices.
 - Developed and documented **REST APIs** and implemented OAuth2.0 and **Spring Security** for secure authentication and authorization.
 - Followed **Domain-Driven Design (DDD)** principles to build modular and maintainable services.
 - Configured and managed CI/CD pipelines using **GitHub Actions or GitLab CI/CD** in addition to Jenkins.
 - Automated deployment processes using **Jenkins** and **Docker**, reducing manual effort by 40%.
 - Developed responsive and user-friendly web interfaces using **ReactJS**, leveraging **Virtual DOM, JSX**, and component-based architecture.
 - Utilized **Redux** for managing **application state** in a predictable manner across multiple components in a **React** application.
 - Delivered user-friendly, dynamic web applications using **ReactJS**, improving user satisfaction metrics by 25%.
 - Resolved cross-browser compatibility issues to ensure seamless user experiences across various browsers.
 - Experience in **e-commerce platforms** handling payment gateways and high-traffic APIs.
 - Expertise in **NoSQL** databases, including **MongoDB, Cassandra, and DynamoDB**.
 - Developed efficient database schemas and performed CRUD operations using JDBC and Node.js.
 - Integrated **SonarQube** into the development pipeline to enforce coding standards, ensure clean code, and automate static code analysis, improving overall code quality and maintainability.
 - Utilized **Log4j** and **Slf4j** for logging, enabling efficient tracking of system events, errors, and performance metrics, ensuring enhanced system monitoring and easier debugging during development and production stages.
 - Designed business continuity plans and optimized database interactions for high availability and performance.
 - Actively participated in sprint planning, retrospectives, and daily stand-ups to ensure project milestones were met.
 - Established **Jenkins** build tasks to support automated builds triggered by **GIT** commits and scheduled overnight builds to meet high development and deployment standards.
 - Conducted comprehensive software analysis, design, and testing phases to ensure high-quality deliverables. Developed robust unit and integration tests using **JUnit**, achieving high code coverage and reliable functionality.
 - Applied Agile/Scrum methodologies to streamline development processes and enhance team collaboration.
- Environment:** Java1.8, Spring MVC, Spring Boot, Microservices, Kafka, AWS, Jenkins, CI/CD, ReactJS, JIRA, Hibernate, MongoDB, HTML5, CSS3, Selenium, GIT, JBOSS, Selenium, JavaScript, XML, SOAP, JUnit, Maven.

EDUCATION

- Master's in Computer Science, Saint Louis University, MO, USA, 2024.
