EDUCATION

Bowling Green State University

M.S. in Computer Science – GPA: 3.6

- o **Related Coursework:** Data Science, Software Engineering, Seminar in Computer Science

Bowling Green, USA

August 2023 – May 2025

Acharya Nagarjuna University

B.Tech in Computer Science & Engineering – GPA: 3.2

- o **Related Coursework:** Linux Programming, Computer Networking, Data Structures

Guntur, India

October 2013 – May 2017

EXPERIENCE

Senecio Corporation 500

Software Programming Engineer Intern

Bowling Green, USA

Jun 2025 – Present

- Optimized system performance by integrating Prometheus and Grafana to enhance real-time monitoring and visualization, improving response times by 50% and reducing build errors by 25%.
- Automated AWS cloud infrastructure using Terraform and CloudFormation, resulting in a 30% decrease in manual provisioning time through structured Infrastructure-as-Code (IaC) deployment.
- Implemented comprehensive cost optimization and data visualization frameworks in Grafana, leveraging VMware-based analytics to deliver actionable operational insights.

Arcadis IBI Group

DevOps Engineer

Hyderabad, India

Mar 2023 – Aug 2023

- Streamlined CI/CD pipelines for Java applications using Jenkins, Maven, and Argo CD, reducing build and deployment times by 20% and ensuring consistent microservice rollouts on AWS EKS.
- Enhanced system responsiveness by 50% through Prometheus-Grafana monitoring integration, minimizing build errors by 25% and improving overall cost visibility using VMware tools.
- Automated AWS provisioning workflows with Terraform and Ansible, achieving a 30% reduction in manual setup time while maintaining cross-environment configuration stability.

Mouritech Pvt. Ltd

Software Engineer

Hyderabad, India

May 2021 – Nov 2022

- Redesigned CI/CD pipelines for Java-based applications using Gradle, leading to a 20% decrease in build and deployment times and enabling smoother cross-team delivery cycles.
- Drove containerization of 3 major microservice clusters using Docker and Kubernetes, improving cost efficiency by 20% through optimized resource orchestration and Ingress configuration.
- Deployed Infrastructure-as-Code solutions on AWS using Terraform to manage state files, backend locking, and S3/DynamoDB integrations for multi-team collaboration.

MicroSpark Software Solutions

Associate DevOps Engineer

Hyderabad, India

Mar 2018 - Mar 2021

- Led multiple enterprise releases for the Costco co-brand card migration, successfully converting 11 million accounts from AMEX to Bank of America with zero data loss.
- Developed Node.js backend features and conducted code reviews to ensure SDLC compliance, collaborating with QA teams for seamless enterprise-level integration and release readiness.
- Executed automation-driven release workflows, improving deployment consistency across multiple environments and reducing manual intervention by 20%.

PROJECTS

Open Telemetry

- Automated infrastructure operations using Ansible YAML for remote server configuration and patch management across Unix systems, ensuring system stability through custom Shell scripts that monitored CPU utilization.

SKILLS & CERTIFICATIONS

Languages: Java, Node.js, Python, Shell

Database: SQL, MySQL, MongoDB

Cloud Platforms: AWS (EC2, S3, Lambda, IAM, VPC, Route53, CloudFormation, EKS, ECS)

Others: Jenkins, GitHub Actions, Gitlab CI/CD, Docker, Kubernetes, Helm, Terraform, Ansible, YAML, Prometheus, Grafana, AWS CloudWatch, Git, Jira, Bitbucket

Certifications: [AWS Certified Cloud Practitioner](#) - Amazon Web Services Training and Certification
