SUMMARY

Full Stack Software Developer with **4 years of professional experience** delivering scalable, secure, and high-performance applications using **Java Spring Boot, React, and cloud-native architectures**. Proven expertise in building RESTful microservices, responsive front-end interfaces, and highly available systems on **AWS and Google Cloud**. Strong background in **CI/CD automation, Docker, Kubernetes, and application security**, with hands-on experience supporting **mission-critical healthcare and enterprise platforms**.

EXPERIENCE

Java Developer | McKesson | USA

Mar 2025 - Present

- Designed and developed scalable **Java Spring Boot microservices** supporting mission-critical healthcare workflows, improving system modularity, performance, and reliability.
- Built and optimized **RESTful APIs** for patient and provider management systems, reducing response times by **25%** through JPA optimization and database tuning.
- Implemented **CI/CD pipelines** using GitHub Actions and Jenkins, accelerating release cycles by **40%** and reducing deployment errors.
- Secured **AWS infrastructure** (EC2, IAM, VPC) with fine-grained access controls and network segmentation, aligning services with **HIPAA-compliant security standards**.
- Managed **PostgreSQL schema design and migrations** using Flyway, ensuring data integrity across automated deployments.

Software Developer | Airbnb

Aug 2021 - Jul 2023

- Architected and developed high-volume **Java (11) Spring Boot microservices** for real-time booking and transaction processing, reducing booking-related failures by **35%**.
- Designed and implemented high-performance **REST APIs** supporting **15,000+ daily active users** across global platforms.
- Strengthened application security using **JWT-based authentication and Spring Security**, ensuring secure handling of sensitive customer data.
- Improved API response times by **3x** during peak traffic through PostgreSQL query optimization and backend performance tuning.
- Deployed containerized services on **AWS using Docker and Kubernetes**, achieving **99.99% system availability**.
- Accelerated delivery by implementing **end-to-end CI/CD pipelines**, reducing deployment cycles from weeks to days.
- Integrated **CloudWatch and ELK Stack** monitoring, reducing production incidents by **25%** through proactive observability.

Frontend Developer | Trinity Technolabs

Feb 2021 - Jul 2021

- Developed responsive web applications using **React and Angular**, improving user experience and frontend performance.
- Automated UI regression testing and deployment validation using **Python**, reducing manual QA effort by **40%**.
- Integrated frontend services with **MongoDB** to manage and query large-scale datasets (100GB+).
- Streamlined frontend build and deployment pipelines using **Jenkins**, increasing release frequency and reducing failures.

TECHNICAL SKILLS

- Frontend:** React.js, Redux, Angular, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, D3.js, Three.js, jQuery
- Backend:** Java, Spring Boot, REST APIs, Microservices, Node.js, .NET Core, Python, PHP, C#
- Database:** PostgreSQL, SQL Server, MongoDB, Oracle, Cassandra, Oracle Cloud
- Cloud & DevOps:** AWS (Lambda, EC2, S3, API Gateway), GCP (Cloud Run, Pub/Sub, Cloud SQL), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Shell Scripting, Terraform
- AI & Data:** AI Model Integration, Python (ML APIs), Spark, Data Visualization, ChatGPT API
- CMS & Frameworks:** WordPress, Drupal (Themes, Templates, Custom Modules), MVC Frameworks
- Testing & Security:** JUnit, Jest, OAuth2.0, JWT, RBAC, SOX, GDPR
- Version Control:** Git, GitHub, GitLab
- Other Tools:** XML, JSON, Agile Scrum, JIRA, Confluence

PROJECTS

Healthcare Microservices Platform | Java, Spring Boot, React, AWS:

- Built full stack healthcare application using Spring Boot microservices and React.
- Implemented secure REST APIs with JWT/OAuth2 and deployed on AWS using Docker and Kubernetes.

Cloud-Native Booking System | Java, PostgreSQL, AWS:

- Developed high-performance Spring Boot APIs with optimized PostgreSQL queries.
- Automated CI/CD pipelines and achieved high availability with AWS deployments.

EDUCATION

Master of Science in Applied Computer Science | Southeast Missouri State University | MO, USA

Aug 2023 - Dec 2024
