

Harshini Naidu Ganapathy

DATA ANALYST

Washington,DC • 571-259-4418 • harshininaidu2802@gmail.com • [linkedin.com/in/harshininaidu777/](https://www.linkedin.com/in/harshininaidu777/)
• <https://github.com/harshi-2801>

SKILLS

Programming Languages: Python (Pandas, NumPy, SciPy, Matplotlib) , SQL(joins, window functions)

Data Analysis Tools: MS Excel (Power Query, Pivot Tables), SQL, Python , Power BI (DAX, Power Query), Tableau

Data Management Tools: My SQL, SQLite ,PostgreSQL,Snowflake,Alteryx,AWS

PROJECTS

Hotel Churn Analysis

February 2025

- Executed exploratory data analysis on approximately 119,000 hotel bookings, pinpointing critical factors influencing a 37% cancellation rate while uncovering significant seasonal trends and price sensitivity among consumers.
- Analyzed booking channels and geographic data, uncovering a 46% OTA reliance and high cancellations from Portugal, leading to targeted recommendations.Developed visualizations in Power BI, applied web scraping for competitor insights, and provided actionable strategies to optimize pricing, promotions, and direct bookings.

Workforce Analytics and Performance Insights Dashboard

Jan 2025

- Developed and deployed interactive **Power BI** dashboards to analyze workforce data, improving data-driven decision-making by 30%.Utilized Power BI, DAX, and data modeling to create **KPIs** and visualizations for cross-departmental analysis across India and New Zealand.
- Developed and maintained complex data workflows using Alteryx for automation, and SQL to analyze flight occupancy, revenue streams, and pricing strategies, identifying 10 underperforming routes and aircraft.

Flight Revenue Maximizer – Airline Occupancy and Profitability Analysis

December 2024

- Crafted interactive data models utilizing SQL queries to assess flight utilization levels, revealing critical issues with specific routes, leading to actionable recommendations aimed at boosting overall capacity by 25%.
- Executed detailed simulations on fare class performance, revealing strategies for achieving a 10% boost in seat occupancy while ensuring zero increases to ongoing operational costs and enhancing overall profitability.
- Formulated actionable strategies using **Data Storytelling** to optimize fare structures and resource deployment, improving aircraft utilization by 20 seats per flight and enhancing **Decision-Making Support**, leading to a significant increase in annual revenue streams.

WORK EXPERIENCE

CodeAdvantage DC LLC

Washington, DC

STEM/Coding After-School Instructor

February 2025 - Present

- Collaborated with peers to test and refine instructional materials, ensuring accuracy and effectiveness for all students.
- Extracted meaningful trends from structured lesson tracking methods to refine instructional strategies, resulting in a more tailored and effective educational experience for 100% of enrolled students.

Myedmaster

Leesburg, VA

Data Science Intern

May 2024 - October 2024

- Developed and maintained a database of vital statistics, ensuring data quality and governance, using SQL and Microsoft Office Suite for data entry and analysis. Performed data curation and leveraged open-source intelligence tools to create accessible formats for public health communications, ensuring compliance with relevant healthcare legislation.
- Designed and implemented SQL queries to extract critical information from 30+ research papers, building structured datasets to analyze exercise impacts on asthma, arthritis, and cholesterol, improving health decisions through efficient data collection and market intelligence analysis, contributing to the development of evidence-based healthcare policy.

EDUCATION

The George Washington University , Washington DC

Expected May 2025

Master of Science in Computer Science (STEM)

3.78 CGPA

Coursework - Data Mining, Machine Learning, Computer Vision, Cloud Computing(AWS), Management of Technical Organizations.

RMK Engineering College , India

August 2019 - May 2023

Bachelor of Science in Computer Science

3.83 CGPA

Coursework - Data Structures, Statistics , Operating systems, AI, GIS , SCM, Design Analysis of Algorithms.
