PROFESSIONAL SUMMARY

Experienced **Business Data Analyst** with **7+ years** of expertise in process improvement, statistical analysis, strategic forecasting, advanced analytics, decision analytics, data solutions and data management. Proficient in data analysis, data mining, problem-solving, decision analysis, CRM systems, Databricks, workflow rules, and Business Process Modelling.

EXPERIENCE

Phoenix Innovations, Alpharetta, USA

Jun 2023 – Present

Business Data Analyst , Mobility, AT&T (Client)

- Conducted **price trend analysis** using **Python, advanced SQL, & machine learning models (ARIMA, Holt-Winters, Regression)** to optimize procurement strategies & identify cost-saving opportunities, achieving **\$100M** in savings.
- Forecasted **supplier trends** using **Holt-Winters & moving average models**, enhancing decision-making & predicting future performance.
- Created a **rule-based AI system** to automate recommendations for sourcing managers, leveraging **SQL & stored procedures** to identify trends, flag issues, and provide actionable insights for **price optimization & compliance**.
- Led **product consolidation** to cut procurement costs by analysing product descriptions with **NLP techniques (tokenization, TF-IDF, cosine similarity)** and identifying similar items.
- Implemented the '**Credit and Rebates**' project, automating credit tracking for **100+ vendors**, saving **\$663M** through **Python-driven rebate and sales calculations**.
- Applied **clustering algorithms (K-means, DBSCAN)** to group similar products, addressing supplier price discrepancies and reducing costs via **supplier rationalization**.
- Created a **centralized Power BI dashboard** to monitor **supplier credits**, improving tracking accuracy by **30%** and managing **\$100K annually**.
- Facilitated **cross-functional requirement gathering & training** for the '**Credit & Rebates**' project, ensuring smooth adoption & delivery.
- Enhanced **end-to-end solutions** for **data analytics projects** like **supplier rationalization & product consolidation**, integrating **Power BI for dynamic reporting**.
- Utilized **SQL and Snowflake** for **advanced data extraction, trend analysis, & ensuring compliance** with supplier contracts, supporting cost-saving initiatives.
- Expanded **Power BI dashboards** to **visualize complex datasets, streamline operations, & drive procurement strategy improvements**.

Mu-Sigma, Austin, USA

Feb 2023 – May 2023

Apprentice Leader (Solution Architect), Airline Industry, Southwest Airlines (Client)

- Facilitated **agile development** as a **Scrum Master**, ensuring **timely delivery of software products**, promoting **collaboration**, and driving continuous improvement.
- Used **Alteryx** for **clustering algorithms (Hierarchical, Gaussian Mixture, Mean Shift)** to analyze **flight delay patterns** for **Southwest Airlines**, improving **on-time performance and efficiency**.
- Migrated **Southwest Airlines' data science models (flight delay prediction, demand forecasting, price optimization)** from **Alteryx to Python**, enhancing **analytics and operations**.
- Designed a **Tableau dashboard** showcasing **flight operation KPIs** to support **data-driven decision-making**.
- Improved **ETL workflows** and managed **data architecture** using **Alteryx and MS SQL**, automating **data processes** and improving analysis efficiency.

Northeastern University, Boston, USA

Graduate Teaching Assistant

Aug 2022 – Dec 2022

- Guided by Professor Kate Ashley to help students to understand basics of **statistics** and **data analysis** for business.
- Held weekly office hours to clarify doubts faced by **50+ students**.

Student Success Guide

Jan2022 – Dec 2022

- Administer support and provide **mentorship** to **first-year undergraduate students** joining Northeastern University.
- Used a new platform to create **referrals** related to **Academic Habits & Career**.

Capgemini, Mumbai, India

Associate Consultant, Logistic, DB Schenker (Client)

Jan 2018 – Jun 2021

- Applied **clustering techniques**, such as **K-means** and **Hierarchical Clustering**, in **Python** to identify common traits, resulting in a **40% improvement in user experience**.
- Worked in **Agile software development process** for deployment of **Change Requests (CR)**; **Effort time estimation** using **Excel**.
- Identified **key metrics (CTQs and KPIs)** that drive the business, ensuring alignment between **business objectives**, technical solutions, and business performance using **standardized & custom reports in Tableau**.
- Conducted **Data Modeling** and developed **E-R diagrams** for new requirements using **System Architect**.
- Led **documentation and gathering of business requirements** and translated them into **technical requirements**, creating **use cases, functional design, user stories, and business processes**, ensuring **alignment between development and testing teams** for new product development.
- Organized **client demos, training sessions**, and provided **support & consultation** to onsite clients and internal stakeholders, ensuring **understanding of new enhancements** for each release cycle, **delivering 40+ CRs in a year**.
- Spearheaded **thought leadership initiatives**, promoting **knowledge sharing and self-service analytics adoption** for cross-functional teams.
- Reviewed and provided feedback on testing strategy, **test cases, and test plans**, ensuring **complete coverage and tracking** of the testing process and maintaining **quality standards**.

Volvo Cars (Client)

Sep 2016 – Jan 2018

Senior Analyst, Supply Chain Management

- Forecasted **new car sales** with **95% accuracy** using **machine learning models (ARIMA, Holt-Winters Method, Prophet)** in **Python**, along with **demand analytics**, enabling clients to **optimize production strategies**.
- Make a **web application** to forecast **raw material requirements**, utilizing **HTML, PLSQL, and UNIX scripts**, helping factory workers maintain optimal inventory levels.
- Managed **data modeling** for **new requirements** and eliminated **inconsistencies in databases** through **SQL queries**, enhancing **data accuracy** and improving **decision-making capabilities**.

SKILLS

Workflow Management	Agile, Waterfall Methodologies, Scrum
Programming Languages:	R, Python, MS SQL, PLSQL, BigQuery
Data Visualization/Analytical Skills/ Business Intelligence Tools:	Tableau, Power BI, Jupyter notebook, Qlik, Databricks
Machine Learning Models:	Time Series Forecasting: ARIMA, Holt-Winters Regression Analysis: Linear Regression, Lasso Regression Clustering Algorithms: K-means, Hierarchical Clustering, Gaussian Mixture Models, Mean Shift, DBSCAN Classification Algorithms: Decision Trees, Random Forests
Natural Language Processing (NLP) Techniques:	Text Analysis: Tokenization, TF-IDF (Term Frequency-Inverse Document Frequency) Similarity Measures: Cosine Similarity, Sentiment Analysis
Other Tools & Skills:	JIRA, Alteryx, A/B Testing, JSON, XML, Statistics, Mathematics, API, MS Excel

EDUCATION

Master of Science in Business Analytics - Northeastern University, Boston, MA | **2022**

Bachelors of Electrical Engineering - Savitribai Phule Pune University, Pune, India | **2016**

ACADEMIC PROJECTS

Donaldson Project –Sentiment Analysis (Business Analytics Capstone)

- Conducted sentiment analysis for the Donaldson project, focusing on consumer attitudes toward alternative powertrains (battery vehicles, fuel cells, etc.) in the truck and heavy equipment sector.
- Employed Natural Language Processing (NLP) techniques on Twitter data collected via the Twitter API to extract insights and inform strategic decisions.

CERTIFICATIONS

Alteryx Designer Core Certified, Google Data Analytics Professional, CITI Social and Research Behavior,
