

Hunter Lehr

Chicago, IL, 60618 | 417-689-0843 | hunter.lee.lehr@gmail.com | [linkedin.com/in/hlehr](https://www.linkedin.com/in/hlehr)

SUMMARY

A Biostatistician II with 3+ years of experience at Rho supporting large and small population Phase I, Phase II, and Phase I/II studies, with a main focus on BARDA vaccine trials and kidney transplant studies for NIAID DAIT and ITN. Previously spent 6 years in the health insurance industry as a Compliance Coordinator at Combined Insurance, managing UAT for hundreds of new products each year and interpreting complex needs between the Legal, Compliance, and IT teams.

EDUCATION

M.S. Biostatistics	May 2022
University of Illinois Chicago, School of Public Health	GPA 4.0

B.S. Biological Engineering, Emphasis in Biomedicine	May 2013
University of Missouri – Columbia	

SKILLS

- *Software Knowledge:* SAS, R, Medidata Rave EDC, Excel, Word, Powerpoint, Stata, MATLAB, LaTeX
- *Technical Skills:* Sample size and power calculation for trial comparing means, proportions, and survival curves; data visualization; CDISC ADaM standards
- *Interpersonal Skills:* Oral & written communication, curiosity, team player, storyteller, creative, critical thinker, organized, detail-oriented

TRAINING AND CERTIFICATIONS

- | | |
|---|-----------|
| • GDPR Compliance: Essential Training | Jul 2022 |
| • John Hopkins, Bloomberg SPH, COVID-19 Contact Tracing | Sept 2020 |

PROFESSIONAL EXPERIENCE

Rho	Jun 2022 – Apr 9, 2025
------------	------------------------

Biostatistician II, Oct 2024–Apr 9, 2025

Biostatistician I, Jun 2022–Oct 2024

- Developed and drafted Statistical Analysis Plans, Randomization Plans, Statistical Methods sections, and TLF shells for study protocols.
- Developed specifications for Spotfire displays and coordinated implementation with programmers.
- Developed and drafted CT.gov reports for 8 studies.
- Drafted sections of Clinical Study Reports and manuscripts, as well as reviewing the full documents.
- Reconciled incoming data transfers with clinical data on a weekly and monthly basis.
- Created SAS-based automated email alerts for disposition summaries and activations of study and participant stopping rules.
- Planned and detailed specifications of the structure of ADaM datasets.
- Reviewed and validated specifications of the structure of SDTM datasets.
- Developed and validated datasets (ADaM and ad-hoc), TLF displays, and statistical analyses.
- Conducted planned and exploratory statistical analyses using SAS and R.

- Interpreted the results of planned and exploratory statistical analyses using written, oral, and visual methods.
- Validated the analysis of data, TLF displays, and written text.
- Prepared statistical reports and displays for study DSMBs, for interim and final analyses, for presentation at meetings or conferences, and for publication in regulatory documents and professional journals.
- Performed sample size calculations in conjunction with clinical staff in order to determine the appropriate number of subjects necessary for the investigation.
- Deidentified and coordinated review of study immunological mechanistic data with data curators at NIH Immport.

University of Illinois Chicago

Sept 2020 – Jan 2022

Contact Tracer/Data Analyst

- Interviewed several hundred individuals with COVID-19 diagnosis or exposure to collect data on symptoms, exposures, and all contacts during period of concern and recorded all data in REDCAP database.
- Provided individuals with guidance and resources for isolation or quarantine.
- Created weekly epidemiology reports, using R Markdown, that were shared during weekly University epidemiology committee meetings.
- Performed ad-hoc analysis to find various proportions of interest requested by University epidemiology committee by creating filters in REDCAP.

Combined Insurance

Jul 2014 – Aug 2020

Compliance Coordinator/Contract Specialist

- Coordinated with Legal, Compliance, and IT departments by planning and conducting user testing on long-term projects involving all several hundred new products, product updates, and system enhancements each year.
- Implemented data input and output capabilities in contract forms for all new and updated products in the United States, using IBM i, Adobe, and Javascript.
- Developed master policies and modeled all group rates for all new and updated business.
- Supervised and delegated tasks to two junior contract specialists to meet tight project deadlines. Created and maintained transparent workflow progress on a Scrum-like timeline housed in Excel.

PRESENTATIONS

-
- | | |
|--|-------------|
| • “Basic Descriptive Analysis in Tableau” | Spring 2022 |
| <i>University of Illinois Chicago</i> | |
| • “Monte Carlo Methods: Powering for Logistic Regression” | Fall 2021 |
| <i>University of Illinois Chicago</i> | |
| • “COVID-19 Prevention Practices in the Face of the Delta Variant” | Summer 2021 |
| <i>University of Illinois Chicago</i> | |

PUBLICATIONS

-
- Yong Wang, Kai Tian, Lehr L. Hunter, Brandon Ritzo, Li-Qun Gu. Probing molecular pathways for DNA orientational trapping, unzipping, and translocation in nanopores by using a tunable overhang sensor. Royal Society of Chemistry. July 2014.

TEACHING EXPERIENCE

University of Illinois Chicago

Aug 2021 – May 2022

Teaching Assistant

“Quantitative Methods for DrPH Students”

- Co-taught over Zoom to 21 DrPH students during the lab and lectures, provided live feedback to student group approaches to exercises, and demonstrated how to implement statistical methods in Excel and SAS.
- Collaborated with instructor and contributed my statistical knowledge in preparation and review of lecture slides.
- Facilitated discussions and answered student questions about lecture material in an online forum.

- Supported instructor by grading exams and weekly assignments.

“Introduction to Epidemiology: Principles and Methods”

- Monitored and responded to questions posed by students via email and discussion board posts, assisted instructor in creating new questions for exams, and graded all assignments and exams for 20 student cohort.

ACTIVITIES

Secretary/Treasurer 2021-2022

Student Alliance for Public Health and Environment, University of Illinois Chicago

- Planned and marketed all organizational events that year, including group meetings, movie night, book club, a guest speaker event, and booth representation at an environmental activism street festival.

Performer, **iO and CIC Theaters** 2014-Present

- Perform improvisational comedy on house teams at both theaters.
- Ran a comedy show for several months, fundraising over \$1,000 from show profits that were then donated to the ACLU and Hope for the Day.

AWARDS

- Delta Omega Society, Lambda Chapter inductee (2022)

PROJECT EXPERIENCE

“EHR Predictors of Poor Outcomes in ICU Patients” Spring 2022

University of Illinois Chicago

- Cleaned data and analyzed electronic health record data of 1,068 patients.
- Submitted written report and presented results to clients within two weeks.

“Effect of Drug Concentrations on Artery Pressure Over Time” Spring 2022

University of Illinois Chicago

- Constructed a mixed effects model on repeated measures for a small study of 46 patients.
- Wrote a report of the methods and results of the analysis.

“Survival Outlooks of HNSCC Patients by Metastasis Presence” Spring 2022

University of Illinois Chicago

- Built a proportional hazards regression model to examine survival data of patients with and without metastasis.
- Communicated the findings and interpretations of analysis in a written report.

“Environmental Exposures’ Effect on Birth Weight” Spring 2022

University of Illinois Chicago

- Analyzed training data of 1,301 mother-children pair subjects.
- Performed a sensitivity analysis of the cross-validation of all predictive models.
- Sent a report of the methods, results, and conclusions to the clients.

“Benchmarks in Quality of Care of Mammography Screening Facilities” Spring 2022

University of Illinois Chicago

- Consulted with client in initial meetings to determine the research question and provided weekly updates.
- Reorganized and cleaned dataset containing over 148,000 individual patient records.
- Compared crude and adjusted measures with Repeated ANOVA.
- Presented final results of analysis to the client in the form of a written report and oral presentation.
