iOS Developer

PROFESSIONAL SUMMARY:

Dedicated and detail-oriented iOS Developer with a strong foundation in Swift programming language and iOS development frameworks. Proven ability to design, develop, and maintain user-friendly mobile applications that meet project requirements and exceed client expectations. Skilled in troubleshooting and debugging to ensure optimal app performance across various iOS devices. Strong collaborator with a passion for learning and staying updated with the latest industry trends and technologies. Seeking to contribute technical expertise and creativity to a dynamic development team experience.

EDUCATION:

- **Swift Code Academy** *iOS Development (2024)*
- **COURSEA**
iOS Developer Certification (2023)
Version Control Certification (2023)
- **Metropolitan Institute of Health and Technology**
Medical Assistant Program (2020-2021) ○
Comprehensive training in phlebotomy and EKG analysis. ○ Certified Medical Assistant (CMA) obtained in 2021.

AWARDS AND CERTIFICATIONS:

- Certified Medical Assistant (CMA) - 2021
- Basic Life Support (BLS) Certified - 2022
- American Heart Association CPR Certification – Current
- META iOS Development Certification
- META Version Control Certification

PROFESSIONAL EXPERIENCE:

- Provided exceptional patient-centered care: Demonstrated a strong commitment to patient well-being by ensuring their comfort, addressing concerns, and fostering trust.
- Efficiently managed administrative tasks: Maintained meticulous patient records, optimized scheduling, and facilitated smooth clinic operations.
- Expert in phlebotomy and specimen handling: Conducted blood draws and effectively processed specimens, ensuring accuracy and timeliness in laboratory testing.
- Collaborated seamlessly with healthcare providers: Assisted in examinations and procedures, anticipating physician needs and enhancing patient experiences.
- Proficiently removed sutures, casts, and applied stents: Demonstrated exceptional skill and precision in delicate clinical procedures, ensuring patient comfort and safety throughout the process.

- Designed and developed custom iOS applications for clients, focusing on user-centric design and functionality.
- Managed project timelines, requirements gather, and client communications.
- Implemented third-party APIs for additional features and data integration.

QUALIFICATIONS:

- Swift Programming: Proficiency in Swift programming language, including syntax, data types, and control flow.
- iOS Development Frameworks: Familiarity with iOS frameworks such as UIKit, Core Animation, Core Data, and SwiftUI.
- User Interface Design: Ability to design and create user-friendly interfaces following Apple's Human Interface Guidelines.
- Version Control Systems: Experience with version control systems like Git for managing code repositories and collaboration with teams.
- Debugging and Troubleshooting: Skill in identifying and fixing bugs, memory leaks, and performance issues in iOS applications.
- Knowledge of Apple Technologies: Stay updated with Apple's latest technologies, tools, and SDKs for iOS app development.
- Collaboration and Communication: Ability to work collaboratively in a development team, communicate effectively, and contribute to project planning and execution.

Created Apps:

When in Rome – A creative functionality that allows users to discover different unique places across the UK to read and learn about certain monumental places and objects that they have never seen before.

Simple – A simple way to take notes and mark down ideas that's easy to use and learn like the first iPhone.
