## EDUCATION

### Master of Science in Computer Science, University of Dayton

August 2022 – May 2024

**Modules:** Data Visualization, Research Methods in Deep Learning, Cloud Computing (GPA: 3.95)

### Bachelor of Engineering in Computer Science, University of Mumbai

June 2017 – August 2021

**Modules:** Data Structures, Algorithms, Database Management Systems, Operating System (GPA: 3.72)

## WORK EXPERIENCE

### PetSmart Inc.

Phoenix, AZ

Data Analyst

May 2023 – Present

- Engineered automated sales and inventory dashboards using **Amazon QuickSight** and **Power BI**, integrating real-time data from **Redshift** to track pet food and grooming product performance across **1,600+** stores. Enabled merchandising teams to make timely stock decisions, increasing in-stock rate by **11%**.
- Implemented a store-level demand forecasting system using **Python**, **SQL**, and **Redshift**, incorporating seasonal trends and regional buying patterns. Leveraged regression models and clustering algorithms to predict SKU-level demand, **reducing stockouts by 15%** and lowering excess inventory costs by 10%.
- Led **A/B testing** initiatives in partnership with the **CRM** and marketing teams to evaluate personalized pet wellness email campaigns. Built dynamic **A/B testing** dashboards and automated lift calculations in **Python**, improving email conversion by **22%**.
- Devised a customer **churn prediction model** using **logistic regression** and silhouette-optimized **K-Means clustering** on grooming and refill data. Enabled loyalty campaigns that raised repeat visits by **18%**.

### University of Dayton

Dayton, OH

Lead Teaching Assistant - Data Visualization

August 2023 – May 2024

- Assisted faculty in instructing Data Analytics and Visualization courses, guiding students on concepts like **SQL**, **Python**, **Tableau**, and **Power BI** for data driven decision-making.
- Conducted lab sessions and provided hands-on support for projects involving data wrangling, ETL pipelines and forecasting models using **Pandas**, **NumPy**, and **Scikit-learn**.
- Graded assignments provided detailed feedback that helped students improve their **analytical and problem-solving skills**.
- Developed and presented tutorials on SQL optimization techniques and best practices for data visualization, leading to a **20%** improvement in students project and performance.

### Mindtree

Mumbai, MH

Data Analyst

July 2020 – August 2022

- Automated document verification for healthcare insurance claims using **Google Cloud Vision API**, achieving 97% extraction accuracy and reducing manual labor by over **80%**, which accelerated claim processing and improved data validation reliability.
- Developed custom dashboards and business intelligence solutions in **Power BI and Excel**, reducing reporting cycles by **15%** and enabling real-time decision support for stakeholders.
- Applied **machine learning** techniques (clustering, classification, OCR) to healthcare and document processing projects, cutting claim processing and identification times by up to **40%**.
- Collaborated with **cross-functional teams** to gather data requirements, support model development, and improve data quality.

## Technical Proficiencies

|                                           |                                                                             |
|-------------------------------------------|-----------------------------------------------------------------------------|
| <b>Programming Languages:</b>             | Python (NumPy, Pandas), SQL, NOSQL, R                                       |
| <b>Tools &amp; Database:</b>              | Big Query, AWS, GCP, Azure, Spark, Databricks, Airflow, Excel, Alteryx      |
| <b>Analysis &amp; Visualization:</b>      | Looker, Tableau, PowerBI, Plotly, Seaborn, Matplotlib, Snowflake            |
| <b>Statistics &amp; Machine Learning:</b> | Statistics, Probability, Classification, Regression, Clustering, TensorFlow |
| <b>Other Skills:</b>                      | Data Visualization, Data Modeling, Data Warehousing, CICD, GIT, Jira, Scrum |

## Projects

- Transformed Sales and customer Insights for Strategic Decision-Making**   
Designed an end-to-end real-time sales insights dashboard using Tableau, Excel, and Python with API-integrated pipelines, enabling dynamic KPI tracking, customer segmentation, and data-driven decision-making.
- Advanced Health Data Analytics for Enhanced Decision-Making**   
Built and executed comprehensive healthcare data workflows using Python and statistical analysis to uncover actionable insights, driving informed decision-making through interactive visual reports.
- Facial Gesture Recognition using Convolutional Neural Networks (Research)**   
Created a user authentication system that uses facial gestures for identity verification. Captured facial landmarks using Python, OpenCV, and trained a K-Nearest Neighbors (KNN) model to recognize users based on unique facial features. Implemented in a Jupyter Notebook with real-time webcam input, the system successfully identified users and validated access.

## EXTRA-CURRICULAR ACTIVITIES

- Active contributor on **Leetcode** and **StrataScratch**, regularly solving real-world data problems involving data analysis, data visualization, statistical reasoning, and machine learning predictions. [Link](#)
- Presented research on facial gesture recognition using landmark points at the University of Dayton's **Stander Symposium 2023 & 2024**.
