EDUCATION

Stevens Institute of Technology — B.E. Computer Engineering High Honors, GPA 3.7

Concentration: Network Security | Minor: Computer Science

Awards: EAS Scholarship, Jim Coleman Scholarship, Launchpad Incubator

Databricks — Certified Generative AI Engineer Associate

Independent- USAF AFOQT (99th %) • MIT OCW: AI/ML • NASA SAR • FAA Drone TRUST • FEMA IS-100/200 • BLS CPR

TECH SKILLS

LLMs: GPT-3.5/4, Grok 4, Gemini 3 BLOOM, OPT, LLaMA

Python/Data: GeoPanda, NumPy, Pandas, SciPy, MATLAB, LabVIEW automation

AI/LLM Engineering: PyTorch, TensorFlow, Transformers, RAG, LangChain, FAISS, Vector DBs, Databricks Lakehouse

Other: C++, Microprocessors, ARM Assembly, VHDL/Verilog, SDR, PCB/Embedded, React Native, n8n Workflows

SELECTED PROJECTS

RAG Platform: Building job-scraping tool with geographical data for focused job boards of specific regions in demand.

NASA DCRS x First Responders: Developing satellite data GUI for geospatial retrieval in disaster operation.

DoD Hackathon (1st Place): Created distributed UAV mesh relay with multi-hop search logic.

Microelectronics Lab: Private network w/ DNS/DHCP, cloud vs serverless infrastructure buildout.

EXPERIENCE

Falcon Space — Test Engineer (AI Data Automation, Rapid Prototyping)

Hawthorne, NJ Apr 2025 – Present

- Designed an **agent system for proprietary GUI** with retrieval-backed system for analyzing available aerospace test data.
- Implemented **RAG-style search workflows** using embedded structured test logs for rapid retrieval of internal documents subject to leadership's approval.
- Automated data acquisition via Python + LabVIEW, improving throughput **25–50%** mainly by architecting a data collection pipeline.
- Reverse-engineered RF waveguide & EM interactions via sensor tools to build components for new testing data.

Frenchtown Enterprises — Systems Engineer (Contract, NDA)

7 WTC, NYC Jan 2024 – Apr 2024

- Supported enterprise clients integrating AI-augmented Fortinet security workflows. Designed secure API-driven ingestion and retrieval pipelines. Network security consulting for provisioned clients for which we provided data security tools.
- Researching applications for our enterprise clients, managing relationships directly alongside GM & guidance of CEO -with board of directors of Silverstein Properties.

Schneider Electric — Operational Technology Security Engineer (Project Based)

Lyndhurst, NJ Jun 2022 – Jun 2023

- Oversaw server headend data in compliance with preventative maintenance of integrated security peripherals of critical system environments -PSE&G NERC-CIP control room, preventing downtime of critical operations.
- Ensured company protocol was upheld in conjunction with local NOC on site for our clients' using various hardware and software. Completed cyber audits: preventative maintenance & penetration testing to ensure consistent network security, 150% growth

Jefferies Group — SOC Analyst (Co-Op, NDA)

Jersey City, NJ Sep 2021 – Jan 2022

- Oversaw incoming cyber threats in SOC with CISO to ensure operations for entities in the Jefferies group
- Developed Python logic for automation in reducing SIEM false positives by ~10% by performing retrieval-style log analysis and threat correlation.

LEADERSHIP & VOLUNTEERING: United Sikhs NJ Ambassador • Stevens Alumni President & SSA Founder • Civil Air Patrol Cadet Captain • EMS/Fire Dept • Tutor • Robotics Club Coding Lead • Laangar di Sevadaar
