SUMMARY

Data Analyst with 3+ years of experience transforming large-scale financial, mortgage, and enterprise data into actionable insights that drive business performance and risk-informed decision-making. Expertise in SQL, Python, Power BI, Tableau, Snowflake, Amazon Redshift, and ETL/ELT processes, with hands-on experience in data modeling, dashboard development, KPI reporting, predictive analytics, and business intelligence. Skilled in credit risk analytics, portfolio monitoring, reporting automation, statistical analysis, and data governance, delivering scalable analytics solutions that improve operational efficiency, regulatory compliance, and executive decision-making.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy), SQL, Advanced Excel (Power Query, Pivot Tables, XLOOKUP)
Data Analysis & Statistics: Exploratory Data Analysis (EDA), Data Profiling, Data Validation, Data Cleansing, Statistical Analysis, Trend Analysis, Root Cause Analysis, Forecasting, Predictive Analytics, Variance Analysis, Cohort Analysis, A/B Testing
Business Intelligence & Visualization: Power BI (DAX, Power Query, Data Modeling, Semantic Models, Row-Level Security, Incremental Refresh), Tableau, Dashboard Development, Executive Dashboards, KPI Reporting, Self-Service Analytics, Data Storytelling
Databases & Data Engineering: SQL Server, Snowflake, Amazon Redshift, ETL/ELT Pipelines, Data Warehousing, Star Schema, Fact & Dimension Modeling, Data Integration, Query Optimization, SQL Views
Financial & Risk Analytics: Credit Risk Analysis, Delinquency Analysis, Portfolio Monitoring, Default Risk Assessment, Financial Reporting, ROI Analysis, NPV Analysis, Sharpe Ratio Analysis
Governance & Collaboration: SOX Compliance, SEC Reporting, Data Governance, Audit Support, Confluence, JIRA, Agile Scrum, Sprint Planning, User Stories, UAT, Stakeholder Management

EXPERIENCE

Data Analyst Freddie Mac, USA	Jan 2026 – Present
- Analyzed 10M+ mortgage and lending records using SQL, Snowflake, and Python to identify credit risk trends, delinquency patterns, and portfolio performance insights, improving risk assessment accuracy by 25%. - Developed enterprise Power BI semantic models and Tableau dashboards monitoring loan portfolio health, LTV ratios, DTI ratios, delinquency rates, default trends, and executive KPIs, reducing reporting turnaround time by 40%. - Built automated ETL/ELT workflows to extract, transform, validate, and reconcile data from multiple financial systems, improving reporting accuracy while ensuring regulatory compliance and data integrity. - Automated recurring reporting processes, analytical workflows, and data quality validation using Python and SQL, reducing manual reporting effort by 45% while improving operational efficiency. - Performed exploratory data analysis, trend analysis, statistical modeling, forecasting, and predictive analytics to identify high-risk loan segments and support portfolio optimization strategies. - Collaborated with underwriting, finance, and risk management teams to develop predictive risk models that improved high-risk borrower identification by 20% while supporting strategic lending decisions. - Optimized SQL queries, analytical datasets, Snowflake objects, and reporting processes, improving dashboard performance by 35% while accelerating executive reporting. - Developed reusable SQL views, standardized reporting datasets, and governed KPI definitions that enabled self-service analytics and improved reporting consistency across business teams.	
Data Analyst Kellton Tech, India	Jan 2022 – Jun 2024
- Partnered with business stakeholders to gather reporting requirements and translate business needs into scalable analytical solutions, improving reporting efficiency by 25% across financial operations. - Extracted, transformed, and integrated enterprise data from Amazon Redshift, SQL databases, CRM platforms, and Excel sources through automated ETL workflows supporting business intelligence reporting. - Developed interactive Power BI dashboards and executive KPI scorecards tracking portfolio performance, operational metrics, financial trends, investment returns, and credit exposure across multiple business functions. - Performed SQL- and Python-based analysis on 2M+ records to identify trends, anomalies, operational bottlenecks, and business improvement opportunities, improving reporting efficiency by 15%. - Conducted data profiling, validation, reconciliation, and quality assurance activities, improving reporting accuracy while ensuring consistency across enterprise datasets. - Automated recurring reporting and data preparation workflows using Python, SQL, and Power BI, reducing report generation time by 40% while improving reporting reliability and data accessibility. - Presented analytical findings, KPI trends, and business recommendations through executive dashboards and stakeholder presentations, enabling faster decision-making and continuous business process improvements. - Collaborated with Agile teams to develop user stories, coordinate UAT, manage reporting enhancements, and deliver analytics solutions aligned with business objectives.	

PROJECTS

Enterprise Financial Performance Analytics Platform <i>Power BI, SQL, Python, Snowflake</i>
- Developed an enterprise analytics platform integrating lending and financial datasets into Power BI dashboards, reducing manual reporting by 40% while improving executive KPI visibility. - Built automated ETL workflows using SQL, Python, and Snowflake to standardize data transformation, automate KPI calculations, and enable self-service analytics, improving reporting accuracy and operational efficiency.
Credit Risk & Portfolio Intelligence Dashboard <i>SQL, Python, Tableau, Snowflake</i>
- Developed an end-to-end credit risk analytics solution using SQL, Python, and Snowflake to analyze delinquency trends, borrower behavior, portfolio performance, and default risk, improving early-warning capabilities for risk management. - Designed executive Tableau dashboards tracking credit exposure, default rates, loan performance, and portfolio health, enabling business leaders to monitor risk metrics and make proactive, data-driven lending decisions.

EDUCATION

Masters in Computer Science <i>University of North Texas, Denton, TX</i>	May 2026
Bachelor in Computer Science And Engineering <i>Shri Vishnu engineering college, Andhra Pradesh, India</i>	Mar 2024

CERTIFICATIONS

- Python Essentials 1 — Cisco Networking Academy / OpenEDG Python Institute
- AWS Academy Cloud Security Foundations — AWS Academy
- Machine Learning Internship — 1Stop.ai
