

JAYASRI

Denton, TX | +1 4693250806 | <mailto:jayasrip54@gmail.com> | [linkedin.com/in/jayasrip14](https://www.linkedin.com/in/jayasrip14)

Built and deployed scalable full-stack applications using Java, Spring Boot, Hibernate, React/Angular, and microservices architecture, improving performance and user experience by 40%. Automated CI/CD pipelines and cloud deployments on AWS & Azure with Jenkins, Docker, Kubernetes, and Terraform, ensuring 99.9% uptime and faster, reliable releases..

EXPERIENCE

LTIMindtree-Optum

Apr 2025 – present

Java Full Stack Developer —Java, Spring Boot, React, AWS, Docker, Kubernetes, Jenkins, MySQL,

Texas, USA

- Designed and optimized GraphQL and RESTful APIs, improving client-server response times by 30% and streamlining distributed data access.
- Developed Spring Boot microservices with Spring Core/Batch, boosting throughput by 40% and scaling to 1M+ transactions/day.
- Architected AWS deployments (Lambda, EC2, S3, RDS, ELB, CloudFront) with auto-scaling, ensuring 99.99% uptime and 25% cost savings.
- Built responsive UIs using React.js, Redux, and ES6+, enhancing frontend performance and user engagement by 40%.
- Automated CI/CD pipelines with Jenkins, Gradle, Terraform, and testing tools (JUnit, Jest), reducing release cycles by 50%.

Advithri Technologies-BOFA

Aug 2024 - Apr 2025

Java/J2EE Developer —Java, Spring Boot, React, AWS, Docker, Kubernetes, Jenkins, Kafka

Lewisville, TX

- Collaborated across Agile teams through the full SDLC to design, develop, and deploy RESTful and GraphQL APIs, aligning solutions with business objectives.
- Implemented Kafka for real-time data streaming and applied JUnit, Postman, and SonarQube to ensure 98% quality.
- Built modular microservices using Spring Boot, Spring Core, and Hibernate, improving system scalability and performance by 30%.
- Developed responsive UIs with React.js, Redux, and ES6+ JavaScript, delivering seamless integration and an enhanced user experience.
- Deployed containerized services via Docker and Kubernetes, streamlining cloud orchestration and achieving high deployment reliability.

BayMark Health Services

Apr 2023 – Apr 2024

Java Developer —Java, Spring Boot, React, or Python, Django, React

Texas

- Designed and launched a core mobile feature, enhancing user experience and driving a 15% increase in engagement and retention.
- Optimized database queries and refactored backend logic, improving application performance and response time by 20%.
- Collaborated with a cross-functional team of 5 developers to deliver scalable, maintainable code adhering to clean architecture principles.
- Contributed to Agile Scrum ceremonies (sprint planning, stand-ups, retrospectives), ensuring on-time delivery of high-quality releases.
- Performed rigorous code reviews and automated testing, strengthening code quality, reliability, and defect prevention.

Key Group IT solutions

Sep 2021 - Dec 2022

Full Stack Java Developer—Java , Spring Boot , AWS

Hyderabad

- Collaborated across Agile Scrum teams using Jira, driving the full SDLC to deliver high-quality, on-time software releases aligned with business objectives.
- Developed and optimized Spring Boot and Spring Core applications leveraging multithreading and Java Streams, improving performance and scalability by 30%.
- Built responsive, dynamic UIs with React.js, TypeScript, and Redux, boosting frontend performance and user satisfaction by 35% through efficient state management.
- Deployed and managed scalable cloud solutions on AWS (EC2, S3, RDS, Lambda) using Terraform (IaC), increasing system reliability and scalability by 35%.
- Automated CI/CD pipelines with Jenkins, Docker, Kubernetes, and secured services using Spring Security, reducing deployment issues and enhancing system security by 40%.

Tru Projects Pvt Ltd

Jan 2021 - Aug 2021

Software Developer —Java, Spring Boot, React, AWS, Jenkins

Hyderabad

- Developed and maintained scalable Java applications using Core Java, Spring Boot, JSP, and REST APIs, improving application performance and reliability by 30%.
- Designed and optimized backend services applying OOP principles and design patterns, enhancing code maintainability and reducing technical debt by 25% across projects.
- Enhanced front-end functionality with HTML, CSS, and JavaScript, delivering responsive, user-friendly UIs integrated seamlessly with RESTful services.
- Implemented CI/CD automation using Maven and Jenkins, streamlining build and deployment workflows to reduce release cycles by 40%.
- Collaborated within Agile teams using Git for version control and JUnit for testing, ensuring consistent, high-quality code and 98% test pass rate.

PROJECTS

Flexydial – Call Center Dialer Management System — Django, Redis, WebSockets, FreeSWITCH, Bootstrap, WebRTC

Jan 2023 – April 2023

- * Developed a full-stack WebRTC-based dialer system with inbound/outbound, predictive, progressive, and preview modes, improving call efficiency by 40%.
- * Implemented RBAC, real-time analytics, and SMS/email integrations, enhancing security, reporting accuracy, and campaign automation.

Human Resource Management System (HRMS) — Django, Bootstrap

Aug 2023 – Dec 2023

- Developed end-to-end HR modules covering recruitment, attendance, leave, and employee lifecycle tracking, improving process efficiency by 35%.
- Implemented role-based workflows for onboarding, approvals, and resignations with data-driven reporting, ensuring secure access and full compliance.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, SQL
Front-End Development: HTML5, CSS3, Bootstrap, Vue.js, React.js, Angular
Back-End Development: Spring Core, Spring Boot, Spring MVC, Spring Cloud, Spring Batch, Hibernate
Cloud, DevOps: AWS (EC2, S3, RDS, IAM, Lambda, API Gateway, CloudFront, ELB, SQS, SNS), Azure (Functions, App Service, Logic Apps, DevOps)
Testing & Quality: Unit Testing: JUnit, Mockito, Postman, Splunk
Database & Data Management: Hibernate ORM, JPA, DAO, JDBC, GraphQL, RESTful APIs, JSON, XML
Microservices & Architecture: Spring Boot, Spring Cloud, Microservices, Service-Oriented Architecture (SOA)
Containerization & Orchestration: Docker, Kubernetes.
CI/CD & Automation Tools: Jenkins, Azure DevOps, ANT, Maven, Gradle, SonarQube, Terraform
Monitoring & Performance Tools: Splunk, ELK Stack, Cloudwatch
Security & Authentication: Spring Security, OAuth 2.0

EDUCATION

Loyola Academy, Osmania university <i>B.sc Computer Science and Engineering</i>	July 2018-Aug 2021 <i>Hyderabad, India.</i>
University of North Texas <i>Master's in Information Systems and Technology</i>	Jan 2023 - May 2024 <i>Denton, TX</i>
CourseWork: Database Systems, Information Security Management, Emerging Information Technology, Strategic Management of Information Technology, Networking and Telecommunications, IT Security, Enterprise Applications of Business Analytics, Programming for Business Analytics, Information Systems Development, Data Visualization.	

EXTRACURRICULAR

Certifications: AWS Certified Solutions Architect, Azure Developer Associate, PCAP – Certified Associate in Python Programming
