WORK EXPERIENCE

Graduate Research Assistant | George Mason University

January 2026 – May 2026

- Developing a Power Platform-based web application to automate faculty evaluations using Power Apps, Power Automate, and SharePoint, with plans to extend it into a mobile app for improved efficiency and accessibility.
- Designing dynamic forms and end-to-end workflows to streamline evaluation distribution among professors.

Graduate Teaching Assistant (Research Assistant Volunteer) | George Mason University

August 2025 - January 2026

- Supported graduate-level instruction in Information: Representation, Processing, and Visualization while mentoring students through research projects, lab exercises, and academic evaluations.
- Assisted in research communication and stakeholder alignment while supporting data visualization, annotation, and analytical interpretation for ongoing academic work.

Junior Business Intelligence Developer | eMpulse Global

September 2023 – July 2024

- Training focused on BI development, data analysis, reporting, visualization, testing and data warehousing.
- Built interactive visualizations and client-ready dashboards and custom panels tailored to business requirements.
- Developing proficiency in writing SQL queries for data extraction, transformation, and analysis, and integrating data using Microsoft Dynamics AX, while assisting in AI/ML R&D and training new hires.

Data Science Trainee | TuringMinds.AI

January 2022 – April 2023

- Built a flight-delay prediction model using Random Forest, optimized via GridSearchCV, achieving 75% accuracy to support reduced airport wait time and improved traveler experience
- Strengthened end-to-end ML capability in Python (data cleaning, preprocessing, feature engineering, model selection, and evaluation) and applied statistical analysis and visualization to uncover trends/patterns.
- Delivered an end-to-end CFPB consumer complaint classification solution: developed an RNN-based NLP classifier to auto-route complaints without manual tagging, and deployed the model as a Streamlit web app.

PROJECTS

1. **Early Warning System for Transportation Risk Detection using Citizen Sensing and Physical Sensing Data Streams in partnership with the Virginia City Beach team** – Building a data-driven evacuation decision support system by integrating real-time traffic, weather, flood and incident data, performing spatiotemporal risk modeling to assess route reliability during floods/hurricanes, and prototyping interactive dashboards for scenario-based planning.
2. **Expert AI-Driven Know Your Customer (KYC) & Anti-Money Laundering (AML) Intelligence Platform for Regulated Financial Institutions in partnership with Accure Inc.** – Leading product vision and sprint execution to automate KYC onboarding and continuous AML monitoring using explainable AI workflows and IBM AML synthetic and public fraud/AML datasets for an audit-ready framework.

CERTIFICATIONS

1. PGP in Computational Data Science jointly presented by INSOFE & Case Western Reserve University, USA.
2. AWS Academy Cloud Foundations (Amazon Web Services, May 2025)

SKILLS

Programming Languages: Python, C, R, SQL

Machine Learning: Scikit-learn, TensorFlow, Keras, PyTorch, Regression, Random Forest, SVM, Naïve Bayes, Ensemble Models (Gradient Boosting), Evaluation Metrics, CNN, RNN, LSTM, GridSearchCV

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Zap BI, Power BI

Databases and Tools: Microsoft Dynamics AX, Jupyter Notebook, Git, Hadoop, Jira, AWS (EC2, S3, RDS, Databricks)

Business Intelligence: Dashboard design, data warehousing, ETL Process and Reporting

Technical skills: MS Office Suite (Excel, PowerPoint, Word)

Core Competencies: Machine Learning, Deep Learning, Statistics, Data Visualization, Data Analysis, Computer Vision, Natural Language Processing, A/B Testing.

EDUCATION

George Mason University | MS Data Analytics Engineering | GPA: 3.7/4

May 2026

K S Institute of Technology | BE in Telecommunications | GPA: 8.5/10

July 2022
