

Jhanvi Patel | Healthcare Data Analyst

Pittsburgh, PA | +1 937-381-9717 | jpatelatwork1406@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Healthcare Data Analyst with **3+ years of experience** in healthcare analytics, clinical data reporting, and healthcare data management across HealthVerity, eClinicalWorks, and Zydus Lifesciences. Proficient in SQL, Python, Advanced Excel, Power BI, Tableau, EHR/EMR Systems, ETL, and data visualization. Experienced in healthcare data analysis, population health analytics, KPI reporting, data quality management, HIPAA compliance, regulatory reporting, dashboard development, and delivering data-driven insights to support operational efficiency, compliance, and business decision-making.

TECHNICAL SKILLS

Healthcare Analytics: Healthcare Data Analysis, Clinical Data Reporting, Population Health Analytics, Healthcare Metrics, Patient Data Analysis
Data Analysis: SQL, Python, Advanced Excel, Data Validation, Data Cleansing, Data Quality Management, Trend Analysis
Business Intelligence: Power BI, Tableau, Dashboard Development, KPI Reporting, Data Visualization
Healthcare Systems: EHR/EMR Systems, Electronic Health Records (EHR), Healthcare Data Management
Databases: SQL Server, MySQL, Relational Databases, Data Extraction, ETL
Compliance & Reporting: HIPAA Compliance, Regulatory Reporting, Healthcare Data Privacy, Data Governance
Tools: Power Query, Git, Jupyter Notebook, Microsoft Office
Business Skills: Requirements Gathering, Stakeholder Collaboration, Business Reporting, Cross-functional Collaboration, Process Improvement

PROFESSIONAL EXPERIENCE

HealthVerity, PA, USA Jan 2026 – Current

Healthcare Data Analyst

- Analyzed healthcare datasets using SQL and Python, improving reporting accuracy by 28% across payer and provider analytics.
- Developed Power BI dashboards tracking healthcare KPIs, reducing manual reporting time by 40% for business stakeholders.
- Validated clinical and claims data through automated quality checks, increasing data completeness by 24% while supporting HIPAA compliance.
- Optimized ETL workflows for healthcare data integration, reducing processing time by 32% and improving reporting availability.
- Performed SQL data profiling and healthcare trend analysis, supporting accurate reporting across payer and provider datasets.
- Collaborated with cross-functional teams to deliver population health insights, supporting strategic decisions across 15+ healthcare performance metrics.

eClinicalWorks, India

Jul 2023 - Jun 2024

Healthcare Data Analyst

- Optimized SQL queries supporting EHR reporting, improving dashboard performance and timely clinical data accessibility across teams.
- Evaluated EHR data using SQL and Excel, improving clinical reporting accuracy by 25% across patient care operations.
- Created Tableau dashboards monitoring provider performance, reducing report preparation time by 35% for operational leadership.
- Performed data validation and reconciliation across healthcare records, decreasing reporting discrepancies by 22% during monthly audits.
- Supported regulatory reporting by maintaining healthcare datasets, achieving 99% data accuracy across compliance submissions.
- Worked with clinical stakeholders to identify reporting requirements, improving dashboard adoption by 30% across healthcare departments.

Zydus Lifesciences, India

Jan 2022 - Jun 2023

Data Analyst

- Collaborated with business stakeholders gathering reporting requirements, delivering accurate analytical insights supporting operational decision-making.
- Explored pharmaceutical and operational datasets using SQL and Excel, improving reporting efficiency by 27% across business teams.
- Developed KPI reports tracking manufacturing and quality metrics, reducing manual analysis effort by 33% through reporting automation.
- Cleaned and standardized enterprise datasets, improving data integrity by 26% for downstream analytical reporting.
- Supported ETL data preparation and validation, reducing processing errors by 21% across multiple reporting workflows.
- Generated trend analyses for business stakeholders, enabling data-driven decisions that improved operational performance by 18%.

EDUCATION

Duquesne University, Pittsburgh, PA

May - 2026

Master of Science in Computer Science

LDRP Institute of Technology, India

Apr – 2023

Bachelor of Engineering in Computer Engineering

PROJECTS

Healthcare Analytics Dashboard & KPI Reporting

- Developed interactive Power BI dashboards using SQL and Python, monitoring healthcare KPIs and reducing manual reporting efforts by 40%.
- Analyzed clinical, claims, and EHR datasets to identify performance trends, improving reporting accuracy and supporting data-driven operational decisions.
- Automated healthcare reporting workflows through ETL optimization and data validation, increasing data completeness while ensuring HIPAA-compliant analytics.

Clinical Data Quality & Population Health Analytics

- Built SQL-based data validation pipelines improving clinical data quality, reducing reporting discrepancies and supporting regulatory compliance across healthcare systems.
- Performed population health analysis using healthcare datasets, generating actionable insights that improved provider performance monitoring and patient outcome reporting.
- Collaborated with cross-functional stakeholders to develop Tableau dashboards, enhancing healthcare reporting efficiency and increasing business adoption of analytical insights.
