7925 Aspen Highlands Dr, Austin, TX 78746 | (512) 705-7619 | jonathanzhao64@gmail.com | linkedin.com/in/jonathan-zhao-atx

Education

Texas A&M University - College Station, Texas

August 2021 - May 2025

Bachelor of Science, Major: Computer Science / Minor: Statistics

- GPA 3.78/4.0 - Engineering Student
- Related Coursework: Software Security, Computer and Network Security, Cloud Computing, Artificial Intelligence, Machine Learning, Statistical Computing, Operating System, Data Structure and Algorithms, Computer Graphics, Computer Systems, Computer Organization, Program Design and Concept, Principle of Data Science, Programming Studio, Computer Science Concept and Programming

Experience

Paycom - Irving, Texas

June 2025 - November 2025

Software Developer, Full-Time/On-Site

- Worked on the company's CRM product. Assisted with removing feature flags over 100+ files. Addressed maintenance issues, including fixing errors from incorrect SQL queries in column searches. Resolved issues where notes displayed client codes incorrectly. Troubleshooted errors when loading the Mission Control dashboard with specific feature flags enabled. (PHP, DBForge, Splunk, Docker)

Flomad International - Austin, Texas

May 2024 - August 2024

Software Engineer Intern

- Designed and developed a full-stack search feature for the AI Travel Planner Application, integrating ChatGPT and Google Gemini APIs to deliver real-time, travel-related information tailored to user queries. (AngularJS, TypeScript, Java, Spring Boot)
- Developed a comprehensive full-stack page showcasing flight offers for the company's flagship AI Travel Application, seamlessly integrating with Amadeus, a third-party API for flight information. (ReactJS, JavaScript, Java, Spring Boot)

Cox Automotive Inc. - Austin, Texas

May 2023 - August 2023

Software Engineer Intern

- Contributed to a Scrum team to enhance ProfitTime, the company's primary inventory management solution for used cars, by implementing dependency injection across multiple services in the codebase to decouple classes from their dependencies. (C#, Rally, GitHub)
- Implemented a new email subscription feature on the Notifications page, adding a checkbox and save functionality to create database entries, which was successfully deployed to production. (C#, SQL)

Extracurricular Activities

Texas A&M University - Aggie Coding Club, College Station, Texas

August 2022 - May 2025

Club Member

- Collaborated on The Brute VR Project to develop a 3D virtual reality game that incorporated gesture recognition for simulating attacks and artificial intelligence for enemy behavior. (C#, Unity, GitHub)
- Created and developed a video game ChronoHunt, that enables players to move, attack, and manipulate time to freeze enemy movements, while utilizing pathfinding algorithms to track the player. (C#, Unity)
- Participated in weekly meetings, collaborated on projects, and enhanced coding skills through workshops, while actively engaging in discussions about computer science and current trends in engineering. (Java)

Westlake High School - Computer Science Club, Austin, Texas

August 2019 - May 2021

Club Member

- Developed a comprehensive student information database for club members and their presentation topics in MySQL. Integrated a REST API with MySQL to facilitate access to this data. (MySQL, SQL, Java, REST API)
- Acquired diverse coding practices and algorithms through workshops, while actively contributing to weekly meetings and discussions on various computer science and programming topics with fellow members. (Java)

Skills

Programming Languages: Java, Python, C#, C/C++, Javascript/Typescript, HTML, PHP, CSS, Scheme, SQL

Technical Skills: Data Structures, Design Patterns, OOD/OOP, Full-Stack, DevOps, Relational Database

Technologies & Tools: Unix/Linux, Spring Boot, REST API, JSON, AWS, NextJS, Vercel, NodeJS, AngularJS, ReactJS, .NET, Jira, GitHub, Maven, CMake, Docker, VSCode, Unity, Postman, OpenGL, DBForge, MongoDB
