

JYOTHIKA REDDY REDDYBATHULA

+1 (314) 398-2118 | jyothikareddybathula@gmail.com | linkedin.com/in/jyothikareddyreddybathula | United States

PROFESSIONAL SUMMARY

AWS & Azure DevOps Engineer with 3+ years of experience designing, automating, and modernizing cloud infrastructure across financial and insurance technology environments. Hands-on expertise in Azure, AWS, Terraform, GitHub Actions, Jenkins, Docker, CI/CD pipelines, and infrastructure automation using Python, PowerShell, and Bash. Experienced in building reusable Infrastructure-as-Code modules, automating deployments, implementing security scanning, and managing cloud migrations. Strong background in observability, DevSecOps, containerized workloads, and production support across hybrid and cloud-native environments. Proven success reducing deployment times, improving infrastructure reliability, and automating operational processes in enterprise environments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, IAM, API Gateway, CloudFormation, CloudWatch, SNS, CodePipeline, ECS, CloudTrail, Config, Inspector), Azure (Microsoft Entra ID, Azure Virtual Desktop, Azure Update Manager, Application Gateway, Load Balancer, App Services, API Management, Azure Monitor, Log Analytics, Key Vault, Storage Accounts, Virtual Networks)

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD & DevOps: GitHub Actions, Jenkins, GitLab CI, Azure DevOps, AWS CodePipeline, GitHub, pull requests, branching strategies, code reviews

Containerization & Orchestration: Docker, Kubernetes (K8s), ECS Fargate

Automation & Scripting: Python, PowerShell, Bash, Azure CLI, YAML

Monitoring & Observability: AWS CloudWatch, Azure Monitor, Log Analytics, ELK Stack, custom dashboards, metric filters, alerting

Security & DevSecOps: Trivy, Anchore, IAM, Secrets Manager, SSM, KMS, AWS Config, Inspector, secret scanning, vulnerability scanning

Testing & APIs: PyTest, Postman, Swagger (OpenAPI), API testing

Databases: MySQL, DynamoDB, RDS, Azure SQL

Version Control: Git, GitHub, GitLab

Methodologies: Agile, Scrum, DevSecOps, SRE

PROFESSIONAL EXPERIENCE

Fifth Third Bank, Kentwood, MI
AWS DevOps Engineer

April 2024 – Present

- Audited legacy CI/CD pipelines built on manual approvals and XML configs; identified the top three bottlenecks and migrated core workflows to GitHub Actions with parallel testing, code analysis, and deployment stages, **reducing average build times from 40 minutes to under 12 and increasing deployment frequency by over 70%.**
- Designed and deployed reusable Terraform modules for VPC, EC2, RDS, S3, and IAM across multiple AWS environments, **cutting provisioning time from two days to under an hour and eliminating environment drift between staging and production.**
- Automated serverless application deployments using AWS Lambda and API Gateway for asynchronous banking event handling, **reducing event processing time by 25% and eliminating manual release steps.**
- Containerized six Flask-based Python microservices** using Docker and deployed them via ECS Fargate, replacing aging VM based deployments and **reducing operational costs by 18 to 20%.**
- Built AWS CloudWatch dashboards with custom metric filters and alerting, **cutting incident response time by 35%** and giving engineers immediate visibility into build failures and deployment stalls.

- Migrated sensitive environment variables from plaintext configs into SSM Parameter Store and Secrets Manager, **reducing secret exposure risk by 40% and increasing security compliance by 50%.**
- Integrated Swagger (OpenAPI) documentation and Postman end-to-end API testing covering authentication, error handling, and load performance, **achieving 98% test coverage across all API endpoints.**
- Executed blue green deployments with automated rollback on all production releases, **sustaining 99.9% uptime with zero unplanned downtime over the past year.**
- Wrote Python scripts to automate EC2 snapshot cleanup and S3 archival operations, **reducing storage costs by 30% with no manual intervention.**

Max Life Insurance, Hyderabad, India
AWS DevOps Engineer

June 2021 – July 2023

- Spearheaded full migration of legacy on-premises infrastructure to AWS Cloud, moving services in phases to avoid downtime, **achieving 99% uptime through the transition and cutting infrastructure costs by 50%.**
- Automated cloud resource provisioning using CloudFormation for S3, Lambda, CloudTrail, and RDS, **decreasing provisioning time by 40% and making Infrastructure as Code the team standard.**
- Built Jenkins CI/CD pipelines for containerized Python APIs across staging and production, **taking the team from weekly deployments to multiple daily releases with full confidence.**
- Integrated Trivy and Anchore container image scanning into every Docker build pipeline, **reducing security vulnerabilities by 60% and ensuring zero vulnerable images reached production.**
- Integrated DevSecOps practices including static code analysis and secret scanning pre-deployment, catching risks at the pipeline entry point before they reached staging or production.
- Centralized logging across CloudTrail, CloudWatch, and ELK Stack into unified dashboards, **reducing debugging time by 45% and cutting mean time to resolution on production issues.**
- Conducted AWS Config and Inspector security audits and implemented Lambda-based remediation functions, **reducing security incidents by 40% and maintaining continuous compliance.**
- Developed Python scripts for real-time service health checks and automated failover validation, **improving system reliability and reducing manual on-call intervention by 45%.**
- Configured ALB and NGINX reverse proxies for traffic routing between frontend and microservices, **optimizing API response times by 30%.**

EDUCATION

Saint Louis University, St. Louis, MO
Master of Science, Information Systems | GPA: 3.93

May 2025

Acharya Nagarjuna University, Andhra Pradesh, India
Bachelor of Technology, Computer Science

May 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2024)
- AWS Certified DevOps Engineer – Professional (In Progress)
- Terraform on AWS – Udemy
- Docker and Kubernetes Bootcamp – Udemy
- Python for DevOps – Coursera
- Jenkins Fundamentals – Linux Academy
