SUMMARY

As a dedicated and passionate healthcare professional with a strong background in pharmaceutical education, clinical pharmacy, and patient care, I am looking to apply my extensive experience and academic knowledge in a dynamic role that will allow me to help advance healthcare services and education. I am skilled at problem-solving and conflict resolution. Experience in handling clients using strong networking skills. Have a good working knowledge on Tableau, Excel, Google Sheets and Google Docs

EDUCATION

Master of Science in Health informatics, University of Wisconsin, Milwaukee, Dec 2024 4.0

Doctor of Pharmacy, Acharya Nagarjuna University, Oct 2020 3.5

WORK EXPERIENCE

Priyadarshini Institute of Pharmaceutical Education and Research **Dec 2022 – Aug 2023**

Assistant Professor *India*

- Assisting with the preparation of research studies and grant proposals.
- As a Clinical Assistant Professor at the pharmacy college, I am actively involved in leading students through their academic journeys, developing courses, and giving instruction and mentorship.
- Taught a variety of subjects related to pharmacy practice, pharmaceutical sciences, pharmacotherapy, clinical research and pharmacology.
- Developed and delivered lectures, seminars, and practical sessions to undergraduate and graduate students.
- Staying up to date in my field through professional development is essential, ensuring that I bring the latest knowledge to my students and peers.

Aditya Multispeciality Hospital **Nov 2020 – Dec 2022**

Duty Medical Officer *India*

- Collecting and analyzing clinical data, including patient information, treatment plans, and outcomes.
- Clinically checked prescriptions daily for appropriate dosage, drug interactions, allergies and contraindications before dispensing medications.
- Monitored, handled, and cared for patients in the Outpatient Department (OPD), Inpatient Department (IPD), Intensive Care Unit (ICU), and Casualty.
- Upon hospital admission, detailed patient data was collected and documented, including current ailments, past medical history, and prescription use.
- Participated in ward rounds with physicians to get a thorough understanding of patient conditions and confirm the accuracy of patient case sheets.
- Collaborating with healthcare professionals to ensure accurate data collection and interpretation.

- Creating and maintaining databases to track clinical data.
- Conducting statistical analyses to identify patterns and trends in clinical data.
- Developing visualizations and reports to communicate findings to healthcare providers and other stakeholders.
- Ensuring data security and confidentiality in accordance with HIPAA regulations.
