

Kanisa M. Reeves

Locust Grove, GA 30348 | 470-314-5035 | michellekanisa@gmail.com

Summary of Qualifications

Data analytics professional with 5+ years of healthcare experience, including advanced claims analysis and data-driven process improvements. Demonstrates expertise in managed health care, Power BI dashboards, and stakeholder collaboration to address complex issues. Proven ability to analyze consumer and provider complaint data and develop innovative solutions in fast-paced environments.

Education

Keller Graduate School of Management

Sep 2024 - Present

Master of Information Systems Management, Data Administration and Management concentration in Big Data Analytics

DeVry University

Apr 2021

Bachelors Degree, Technical Management concentration in Health Information Management

Professional Experience

NTT DATA

May 2024 - Present

Claims Analyst I

Atlanta, Ga

- Processed initial medical claims and ensured timely handling of pending claims by applying data analysis techniques aligned with managed health care standards.
- Validated and updated information on submitted claims, ensuring accuracy and compliance with provider contract provisions.
- Determined claim eligibility by applying policy guidelines and leveraging healthcare data analysis experience.
- Maintained accurate records and documentation to support data-driven decision making.
- Utilized workflow insights and data-focused methodologies in healthcare systems and claims processing.
- Managed EDI 837/835 transactions by translating complex healthcare requirements into actionable system and business solutions.
- Achieved departmental production and quality standards through consistent performance monitoring and data validation.

Anthem Blue Cross

May 2022 - May 2024

Business Analyst II

Atlanta, GA

Acted as liaison between business and IT to translate complex business needs into application software requirements, employing advanced problem-solving skills.

- Determined specific application requirements for addressing intricate healthcare scenarios and data exchange challenges.
- Developed project plans and coordinated resources, including those outside the unit, to support initiatives focused on healthcare data and managed care strategies.
- Collaborated with programming staff to incorporate requirements into system design and testing while ensuring data integrity.
- Utilized JIRA Enterprise and JIRA Business Agile systems for tracking projects and monitoring big data analytics in healthcare contexts.
- Consulted with business partners on the application and implementation of pharmacy benefit programs, emphasizing healthcare data integration.
- Engineered solutions based on root cause analysis and data integration to address complex business issues in healthcare operations.
- Identified, assessed, and mitigated risks that could impact healthcare data exchange and business processes.
- Supported healthcare data exchange initiatives, including EDI 837/835 transaction analysis and eligibility workflows, to enhance managed health care operations.
- Participated in system updates and data validation processes involving HL7 v2.x message structures to optimize member enrollment and claims adjudication.
- Collaborated with pharmacy and IT teams to explore FHIR-based APIs for medication reconciliation and integration of provider data.
- Mapped and validated healthcare data between payer platforms and third-party vendors using expertise in X12 standards.

Anthem Blue Cross

Feb 2015 - May 2022

Claims Accumulator Adjuster

Atlanta, GA

Responsible for using multiple systems which includes WGS, ESI, 3M, Dr Chrono, Ingenio Rx, Lites, Medco, and Star to research and providing precise calculations of member's adjustments and accums according to benefits plans. Developed and maintained end-to-end documentation of claims extract of information and accumulators, including workflows, data, and policies and procedures.

- ****Leadership:**** Acted as a key participant in all assigned new client implementations as a subject matter expert for all lines of business for accumulator and claims extract processes.
- ****Business Analysis:**** Analyzed and assessed existing business systems and operational procedures.
- ****Account Management:**** Reviewed members cost shares, auditing and correcting applied amounts on VIP group's updates by PCDC, INTAKE, and needed workflow.
- ****Data Analysis:**** Provided knowledge of adjustments, claim processing platform, external reports and ancillary processing systems that hold accum data for members.

Wellpoint Inc.

Sep 2012 - Feb 2015

Coordinated follow-up care plan needs for members by scheduling appointments or enrolling members in programs.

Assessed member compliance with medical treatment plans via telephone or through on-site visits.

- **Root Cause Analysis:** Identified opportunities that impact quality goals and recommends process improvements.
- **Product Management:** Recommended treatment plan modifications and determines need for additional services, in conjunction with case management and provider.
- **Documentation & Reporting:** Prepared reports to document case and compliance updates.
- **Stakeholder Engagement:** Established and maintained relationships with agencies identified in appropriate contract.

Southern Regional Medical Center

Feb 2012 - Jun 2012

Patient Accounts

Riverdale, GA

Responsible for the collection of all copays, co-insurance submissions and follow-up, to ensure accounts are balanced.

- **Account Analysis:** Conducted audits for all chart copies to ensure the correct and accurate coding and collections for all services rendered.
- **Billing Processing:** Ensured all billing changes and requirements are implemented and adhered to for insurance carriers.
- **Business Needs Assessment:** Coordinated benefits and any additional insurance information by acting as liaison between carriers and clients.
- **Business Process Support:** Processed delinquent accounts and provided counseling and routine insurance question.

Core Competencies

- **Data Analysis & Reporting:** Data Analysis, Data Modeling, Data Storytelling, Reporting
- **Technical Tools:** SQL, Python, Tableau, Excel (Pivot Tables), PowerBI Dashboard, Power Query, Big Data Tools, SAP & Oracle
- **Data Management & Governance:** Data Governance, Data Collection, Data Integration
- **Business & Problem Solving:** Problem-solving, Critical Thinking, Root Cause Analysis, Process Improvement, KPI Development
- **Systems & Methodologies:** JIRA & Agile Systems, Python Modeling
- **Industry & Domain Expertise:** Managed health care, Health care data, Demographic data, Geographic data

Improved Projects Section

Project 1: Healthcare Data Analysis and Visualization

- Developed a Tableau dashboard to analyze and visualize healthcare claims data, providing insights into cost trends and identifying areas for process improvement.
- Utilized Python for data cleaning, transformation, and integration from multiple sources.
- Collaborated with cross-functional teams to gather requirements and present findings to stakeholders.
- Skills: Python, Tableau, Data Analysis, Data Visualization, Stakeholder Management

Project 2: Predictive Modeling for Patient Readmission Risk

- Built a machine learning model using Python to predict the risk of patient readmission based on historical data.
- Performed data preprocessing, feature engineering, and model selection to optimize predictive performance.
- Integrated the model into a web application for healthcare providers to assess patient risk and plan interventions.
- Skills: Python, Machine Learning, Data Preprocessing, Web Development
