Professional Summary

Highly skilled Data Analyst with a Master's in Computer Science and **2+ years** of experience in analytics, **ETL**, and **data visualization**. Expertise in **Python, Power BI, SQL, and Excel (VBA, PivotTables)** for **data wrangling, workflow automation**, and developing **interactive dashboards**. Proven ability to **transform raw data**, including digital marketing analytics and abuse patterns, into **actionable insights** that drive **strategic decisions & business impact** enhancing the digital safety and optimized performance.

Skills

Programming Languages: Python, SQL, Java, JavaScript, HTML, CSS.

Data Analysis & Business Intelligence : Data Modelling, ETL, EDA, DAX, Statistical Analysis, Trend Analysis, Anomaly Detection.

Visualization Tools : Power BI (Desktop & Service), MySQL, Excel(VLOOKUP, Pivot Tables, Macros, Power Query), Tableau.

Data Integration & Tools : ETL Pipelines, Data Wrangling, Data Cleaning, Azure Maps, SSIS (SQL Server Integration Services)

Packages : NumPy, Seaborn, Pandas, Matplotlib, PyPlot, ggplot, scikit-learn.

Databases & Sources : MySQL, MongoDB, SQL Server, PostgreSQL, Kaggle (Data Science Community).

Methodologies : Agile, Scrum, Waterfall.

Frameworks & Tools : Git, Jira, React, Jupyter Notebook, VS Code.

Soft Skills : Analytical Thinking, Problem Solving, Critical Thinking, Cross- functional Collaboration, Leadership, Communication.

Work Experience

Data Analyst – Rebecca Everlene Trust

July 2025 - Present

- **Managing and processing various datasets** from multiple sources (Google Drive, Sterling reports, roster sheets) to ensure **data accuracy and consistency** for organizational record-keeping.
- Performed **data extraction** and reconciliation to update and standardize user information (names, roles) across Slack, directly supporting **Salesforce integration** and **improved personnel tracking**.
- Developed and executed a **systematic data management workflow** for identifying **missing information** and coordinating with **stakeholders** to complete critical user profile data.

Software Associate – Grey Campus

May 2022 – Jan 2023

- Drove significant efficiency gains by designing and **implementing a full ETL pipeline** (Python/Pandas, MySQL) that automated data flow, reducing **manual reporting time by 70%** and **improving data accuracy**.
- **Optimized business processes** and project delivery, **improved lead conversion by 20% via HubSpot marketing automation** and achieved **95% on-time project milestone** delivery through Agile methodologies.
- Leveraged front-end web development (**HTML, CSS, JavaScript**) to **boost UI responsiveness** and **cut page load time by 25%**, while optimizing HubSpot for marketing automation resulted in a **20% improvement in lead conversion**.

Education

Master's in Computer Science | Florida Atlantic University

3.8 CGPA

Aug 2023 – May 2025

Bachelor of Science in Honors (Software Engineering) | St. Francis College for Women

9.3 CGPA

Apr 2019 – May 2022

Certifications

AllofUS – Data Engineering Hackathon

HackerRank SQL, Python (Basic)

Python for Everybody

Project Management Principles and Practices

Google Data Analytics

IBM Data Science

Projects

Healthcare Analytics | PowerBI, Excel, DAX, Power Query, Azure Maps

- Developed a **Power BI Healthcare Analytics Dashboard**, transforming raw data using **DAX and advanced modeling** to calculate critical **KPIs** (Key Performance Indicator) delivering key insights into patient metrics and financial performance.
- Engineered a **highly interactive dashboard** featuring **dynamic visualizations** (Azure Maps, bar charts), a hide/show slicer panel, and a **dual-mode interface** (light/dark) to enhance user experience and **facilitate data-driven decision-making**.
- Implemented **robust slicers and filters**, enabling **dynamic trend exploration** and analysis of various healthcare dimensions, further enhancing **data accessibility** and **actionable insights**.

ETL – Driven Customer Behavior Analysis | Power BI, Python, Pandas, SQL,

- Engineered **ETL pipelines (Python, Pandas, SQL)** to transform raw sales data, calculating key customer metrics like CLV, AOV, and Repeat Purchase Rate, leading to a **70% reduction** in manual reporting time and increased data accuracy.
- Utilized **Python** for **data processing** to **cleanse datasets** by handling null values & discrepancies, ensuring **data quality**.
- Integrated **advanced DAX** (Data Analysis Expression) formulas for drill-through insights and **applied statistical testing** to identify key customer segments, enabling dynamic trend exploration and optimizing marketing campaigns for a **20% improved lead conversion rate**.

Smart Expense Tracker | Power BI, Excel, Python, Java Script, Flask, Tesseract OCR, HTML, CSS

- Automated expense data extraction and **processing from receipt images** using a **Python/Flask/React/SQL** web app with **OCR**(Object Content Recognition), significantly improving data entry efficiency by 60% and **text extraction accuracy by 30%**
- Developed **optimized SQL queries** and **real-time visualizations** within a user-friendly UI to support fast analytics, enhancing data accessibility and streamlining expense categorization for informed decision-making.
- **Analyzed near-real time data** using **Power BI Direct Query** to generate an **interactive expense dashboard**.
